5

6 A. The fuel price for the 2013 Test Year of \$108.74/bbl (page 1.7 footnote 7; Finance
7 Schedule 1) is the average *consumption* price which takes into account the starting
8 inventory price and volume, purchase prices and volumes, and usage throughout
9 the year. The forecast for 2013, as per Schedule V, of \$108.11/bbl is the average
10 *purchase* price which takes into account only purchase prices and volumes
11 throughout the year.
