

1 Q. Further to V-NLH-111, Attachment 1: Please confirm that the calculation will need
2 to be done separately for transmission lines and terminal stations as some
3 customers share terminal station related costs, but not transmission line related
4 costs.

5

6

7 A. It is so confirmed. However, Hydro notes that the methodology outlined in Hydro's
8 response to V-NLH-111 was intended to be illustrative and provide a high-level
9 impact of considering the effect of inflation in the calculation of Specifically
10 Assigned Operating and Maintenance costs. Therefore, the same method applying
11 the breakdown between transmission lines and terminal stations is not readily
12 available.
