

1 Q. Further to IC-NLH-99 (Rev 1) Attachment 1: Please confirm that the capital spending  
2 provided on page 6 for 2008 is all and only capital work related to “upgrade work  
3 on the rotor and stator” noted in Hydro’s 2013 Capital Budget Application, pages D-  
4 164 to D-165. If not, please indicate which items are for this capital project and  
5 which items are for other capital projects and indicate the project to which they  
6 relate.

8

9 A. IC-NLH-099 Attachment 1, page 6 lists a number of assets for the Corner Brook  
10 Frequency Converter for 2008. The first 12 assets listed (the wall bushings) were  
11 installed under *Replace Insulators – Various Stations* capital project. These bushings  
12 are part of the electrical connections into and out of the frequency converter.

13

14 The remaining four assets that are listed were installed as part of the project  
15 *Upgrade Corner Brook Frequency Converter* that took place in 2007 and 2008 with  
16 completion in 2008. This project included the upgrade work on the rotor and  
17 stator.
