

1 **Q. Re: Wilson Pre-Filed Testimony, pages 21 -22. Dr. Wilson provides a**
2 **calculation of the impact of the load variation provision on each of**
3 **Newfoundland Power (NP) and Industrial Customers (IC) due to 1 kW.h**
4 **changes in load for each of NP and IC.**

5
6 **Please provide the same calculation, indicating the dollar value**
7 **impact on each class (NP and IC) of a 1 % increase in the loads**
8 **of each of the respective classes.**
9

10
11 **A. Dr. Wilson has not made the requested calculation because it would not be**
12 **informative. NP's kWh load is more than ten times the IC load, and that large**
13 **difference in load would dominate the dollar value amount. In order to be**
14 **meaningful, the load variation comparison must be done with a fixed kWh**
15 **amount as at pages 21-22 of the Report.**
