

1 Q. **Re: Rates Schedules, page 20 of 47.**

2 Have any costs been incurred with respect to Conservation and Demand
3 Management programs offered to L'Anse au Loup customers? If so, please describe
4 and quantify them, and explain how their costs are to be recovered. If not, please
5 explain in detail why these customers have been excluded from the Conservation
6 and Demand Management program.

7

8

9 A. The programs offered to customers in the L'Anse au Loup System are the same as
10 available to the Labrador Isolated customers as described in IN-NLH-015. The
11 proposed recovery mechanism is outlined in Hydro's 2013 GRA, Volume I, Section
12 4.7, Other Deferral and Recovery Mechanisms. Program costs are not tracked
13 separately for the L'Anse au Loup System but are included with expenditures for the
14 Island Interconnected, Island Isolated and Labrador Isolated Systems. The costs
15 have been separated where possible in the response to NP-NLH-104.
