

1 Q. **Re: NLH cover letter dated July 30, 2013, p. 3, note 4.**

2 Note 4 states: “With the annual Northern Strategic Plan subsidy, residential
3 customers in the L’Anse au Loup System pay the equivalent electricity rates as
4 Labrador Interconnected customers for their basic electricity needs. The
5 proposed increase to Labrador Interconnected Customers will mean that the
6 average rate of increase for domestic L’Anse au Loup customers, after the
7 subsidy is considered, will be 4.5%.”

8 Please explain in detail the operation of the Northern Strategic Plan subsidy for
9 domestic customers in the L’Anse au Loup System, and provide supporting
10 documents, including:

- 11 - government documents enacting the subsidy and setting out its operational
- 12 details, and
- 13 - copies of bills or other correspondence showing the amounts claimed and
- 14 paid since 2011.
