

1 Q. **Re: NLH Evidence, Section 2, page 2.39, lines 9-13**

2 “In 2007, the Government introduced an electricity rebate program for
3 domestic customers in isolated Labrador coastal communities, including the
4 communities on the L’Anse au Loup system. The Labrador rebate reduces
5 customer electricity costs on the first block of energy and basic customer
6 charge to the equivalent of costs paid by customers on Labrador
7 Interconnected Systems.”

8 Please confirm that this electricity rebate program is identical to the Northern Plan
9 Subsidy referred to in notes 4 and 5 of page 3 of the Cover Letter dated July 30,
10 2013. If this is not the case, please:

- 11 • describe in detail the electricity rebate program referred to here,
12 • provide details as to its functioning, and
13 • provide details as to its interaction with the rural subsidy and the Northern
14 Strategic Plan subsidy.

15

16

17 A. It is confirmed that Hydro’s Evidence, Section 2, page 2.39, lines 9-13 references the
18 Northern Strategic Plan subsidy.
