

2 Q. Re: NLH Evidence, Section 2, page 2.16, lines 10-12

4 Please provide a graph indicating historical hydraulic inflows used for system
5 planning, and indicating the critical dry sequence.

5

6

10 A. The (revised) chart below shows the total inflows in each year from 1950 to 2013, in
11 millions of cubic metres to Hydro's main reservoirs: Victoria, Meelpaeg and Long
12 Pond in the Bay d'Espoir System, Hinds Lake and Cat Arm. The critical period, from
13 1959 to 1961 is shown.
