

1     Q.     **Re: IC-NLH-030, pp. 6 and 10 of 10**

2           On p. 6, Hydro Rural Interconnected is broken down into Goose Bay, Churchill Falls,  
3           Wabush and Labrador City. On p. 10, Hydro Rural System Sales are broken down  
4           into Happy Valley-Goose Bay and Labrador West.

5           Please indicate where in these tables the forecasts for Sheshatshiu and Northwest  
6           River are to be found.

7  
8  
9     A.     The load forecast labeled 'Goose Bay' on page 6 of 10 and the sales forecast labeled  
10           'Happy Valley – Goose Bay' on page 10 of 10 includes the requirements for  
11           Sheshatshiu and North West River. Please note that the labels used by Hydro reflect  
12           the geographic areas being forecast as opposed to communities. Please also note  
13           that Hydro's annual load forecast process does not include the preparation of sales  
14           or load forecasts for the individual communities of Sheshatshui or North West  
15           River.
