

1 Q. Re: LWHN-NLH-10, Att. 1, p. 38 of 42

2 From the 1996 Report on Rural Electric Service:

3 **The Board recommends that both generation assets and the 138 kV transmission line**
4 **on the Great Northern Peninsula be assigned, on a provisional basis, as being of common**
5 **benefit to all interconnected customers and that sub-transmission costs (for lines whose voltage**
6 **is below 138 kV) be specifically assigned. The Board further recommends re-examination of**
7 **these cost assignment decisions, and the rules for cost assignment, at a future hearing.**
8

9 Since the 1996 Report, has the Board re-examined these cost assignment decisions
10 and the rules for cost assignment? If so, please provide references.
11

12
13 A. The Board has re-examined the Great Northern Peninsula generation assets and
14 transmission line cost assignments on two separate occasions since the 1996 Report
15 on Rural Electric Service. Please refer to the following:
16

- 17 • Order No. P.U. 7 (2002-2003), pages 110 – 113; and
18 • Order No. P.U. 14 (2004), pages 89 – 93.
