

1 Q. **Load forecasts**

2 **Re: IN-NLH-003, rev. 1**

3 Preamble:

4 The RFI requested load forecast data for "each of the Isolated communities
5 in Labrador, Sheshatshiu, Natuashish, Northwest River, Happy Valley-Goose
6 Bay, Labrador City, and Wabush."

7 The response provides monthly forecast data for the Test Year for Lab City
8 and Wabash only. No explanation is provided as to why similar information
9 is not presented for Sheshatshiu, Northwest River and Happy Valley-Goose
10 Bay.

11 Please provide data similar to that found in IN-NLH-003, Rev. 1, page 2, for
12 Sheshatshiu, Northwest River and Happy Valley-Goose Bay, or for Labrador East as
13 a whole.

14

15

16 A. Please see Hydro's response to IC-NLH-030 (Revision 1, Nov 21-14), page 10, which
17 provides Hydro's forecast of customers, energy consumption (in MWh) and
18 demands (in kW/kVA) by rate class for the Happy Valley-Goose Bay distribution
19 system that includes the communities of Sheshatshiu, Northwest River and Happy
20 Valley-Goose Bay. Please note that Hydro does not prepare individual load forecasts
21 for the communities requested. Also note that Hydro does not forecast demand for
22 rate classes without a demand charge.
