

1 Q. **Rates**

2 **Re: Amended Application, p. 4.41, lines 4-10**

3 Citation:

4 Rates for Rural General Service Customers on the isolated systems are
5 normally adjusted by the average rate of change approved for the
6 customers of NP. However, in the Amended Application, the proposed rate
7 increases are higher than that resulting from the proposed wholesale rate
8 for NP. This is because the proposed rates for the 2015 Test Year for
9 Domestic and General Service customers on Isolated Diesel Systems reflect
10 the cumulative effect of the 2007 Test Year cost increases and the average
11 retail rate change resulting from the proposed change in the NP wholesale
12 rate.

13 Please provide detailed worksheets showing how "the proposed rates for the
14 2015 Test Year for Domestic and General Service customers on Isolated Diesel
15 Systems reflect the cumulative effect of the 2007 Test Year cost increases and
16 the average retail rate change resulting from the proposed change in the NP
17 wholesale rate".
