

1    Q.    **Re: IN-NLH-238**

2            The response indicates that “Isolated Systems Commercial Custom” refers to the  
3            Isolated Systems Business Efficiency Program (ISBEP), which has not been  
4            discontinued.

5            Please explain why forecast expenditures for this program in 2015F are zero, if the  
6            program has not been discontinued.
