

1    Q.    NL Hydro has indicated (Vol.1, p.1.2 and p.3.23 footnote 14) That it has made  
2           capital expenditure of approximately \$39 million on the Labrador Interconnected  
3           System over the period 2007-2013. Please provide a breakdown of these expenses  
4           by component and give the rationales for the allocation the cost between regulated  
5           and non-regulated customers. Identify the main beneficiaries of the expenditures.

6  
7  
8    A.    Please see Hydro's response to CA-NLH-089. Based on Hydro's approved COS  
9           methodology, IOCC was allocated a portion of the revenue requirement relating to  
10          the generation and transmission costs. The remainder of the related costs were  
11          assigned to regulated customers.
