

1    Q.    What actions has NL Hydro taken to encourage conservation on the Labrador  
2           Interconnected System, included conservation by non-regulated customers?

3

4

5    A.    Hydro has rebate programs available to residential and commercial customers on  
6           the Labrador Interconnected System which have been described in response to IN-  
7           NLH-023. As well, the Industrial Energy Efficiency Program (IEEP) also provides  
8           financial incentives to Industrial Customers on the system. Hydro has sponsored an  
9           electricity end use audit for each Industrial Customer to identify opportunities for  
10          efficiency and to encourage participation in the IEEP.
