

1 Q. **Re: Response to LWHN-004.**

2 The forecasts for capacity and energy, expressed in MW and GWh respectively, for
3 the Labrador Interconnected System in the response are different from those given
4 in Table 2.18 on p.2.43 of Volume I of the GRA. Please explain for the difference.

5

6

7 A. The MW and GWh requirements forecast provided in Hydro's response to LWHN-
8 NLH-004 are Hydro's current forecast of requirements that was not available at the
9 time the GRA submission was prepared. The forecast MW and GWh requirements
10 presented in Table 2.18 on p. 2.43 of Volume I of the GRA were prepared at an
11 earlier date.
