

1 Q. Re: [http://www.alderonironore.com/ resources/financials/ADVFSMDA2013Q3.pdf](http://www.alderonironore.com/resources/financials/ADVFSMDA2013Q3.pdf)
2 , p.7.

3 Alderon Iron Ore Corporation, in its 2013 third quarter financial statement, has
4 stated that Nalcor will provide power directly to the Kami site's main substation by
5 means of a 315 kV transmission line. (a) Please confirm the accuracy of this
6 statement, (b) what will the transmission line and related infrastructure cost? and
7 (c) explain whether any of that cost will be borne by ratepayers of the Labrador
8 Interconnected System.

9

10

11 A. a) [] The Government provided direction to Hydro to construct a 315 kV
12 transmission line to Labrador West as per OC2014-035. The construction of this
13 line has been suspended pending Alderon's confirmation of the schedule for
14 completion of the KAMI site.

15

16 b) The cost of the new transmission line and related infrastructure is estimated to
17 be \$300 to 400 million.

18

19 c) Cost recovery of any new infrastructure will be subject to Board approval as per
20 OC2014-034.
