

1 Q. Section 7 Corner Brook Pulp and Paper Frequency Converter page 48, lines 8 to
2 14: Please provide copies of all communications from Hydro to CBPP relating to
3 capital expenditures at the frequency converter since the last GRA, including
4 notification of the planned capital work and capital cost and rate estimates that
5 were provided to CBPP.

6 A. This information is not available to InterGroup, and is not expected to be readily
7 available to CBPP. It is assumed that Hydro has this record of communication in
8 the event it is desired for the present proceeding.

9 However, please note that the referenced paragraph in the Pre-filed Testimony
10 was based on Hydro's response to IC-NLH-100, where Hydro notes that "[i]t has
11 not been Hydro's practice to provide communication on an individual project
12 basis to each of its customers...."
