

1 **Q. Please explain why Table 5-2 on page 32 uses weather-adjusted demand and**
2 **actual energy sales rather than weather adjusted demand and weather- adjusted**
3 **energy sales.**

4 **A.**

5 The referenced table was prepared based on Hydro's response to IC-NLH-012 Rev1.
6 This RFI response does not include weather adjusted sales to NP. Therefore, the actual
7 sales have been used in the Table 5-2.

8 Further, the response to IC-NLH-12 Rev.1 shows in the column entitled "weather
9 adjusted – energy sales to NP" in each year "NA", and the response text indicates: "Also
10 note that Hydro does not weather adjust its actual energy sales to NP and these are
11 therefore not available".
