

1 Q. [InterGroup Consultants Testimony, Section 7.3].

2 Further to NP-IC-009 above, provide a breakdown of the compensation Corner
3 Brook Pulp and Paper received from Hydro for providing support to the system
4 during the 2013-2014 winter season.

5 A. InterGroup does not have access to the requested information beyond that noted
6 in other public regulatory filings regarding the outage review.

7 Intergroup does note that the agreements between CBPP and Hydro regarding the
8 support of the system during the 2013-2014 winter season outages, including
9 payments made by Hydro to CBPP for increasing operating parameters or for
10 reducing load are not part of the “normalized” 2013 Test Year revenue requirement
11 or cost of service, and as such do not affect the GRA rate proposals.
