

- 1 **Q.** **[InterGroup Consultants Evidence, page 63, line 9 to page 64 line 2]**
- 2 **Please provide the net effect of a customer undertaking CDM (in cents/kWh) based**
- 3 **on the marginal cost of energy following completion of the Labrador infeed.**
- 4 **A.** The effect is uncertain as the net effect depends on the operation of the RSP (and in
- 5 particular the load variation provision, and the marginal cost of energy), which must be
- 6 revised with the initiation of Labrador infeed. The approach to those revisions is
- 7 presently unknown.
