

1 Q. Further to response to Request for Information NP-NLH-136:
2 Please compute the demand charge per month in the wholesale rate to
3 Newfoundland Power that would be proposed (based upon the proposed rate
4 design methodology) if the 2013 Test Year wind purchases were classified as 100%
5 energy.
6
7

8 A. []
9

10 Based on the Newfoundland Power demand rate recommendation included in
11 Section 4.5 of Hydro's Amended Application, a change in the service classification of
12 wind purchases in the 2015 Test Year Cost of Service Study would not result in a
13 change in the proposed demand charge in the wholesale rate to Newfoundland
14 Power. See Hydro's response to CA-NLH-157.
