

1 Q. Further to response to Request for Information NP-NLH-136:  
2 Please compute the demand charge per month in the wholesale rate to  
3 Newfoundland Power that would be proposed (based upon the proposed rate  
4 design methodology) if the 2013 Test Year purchases from CBPP were classified as  
5 100% energy.  
6  
7

8 A. [ ]  
9

10 Based on the Newfoundland Power demand rate recommendation included in  
11 Section 4.5 of Hydro's Amended Application, a change in the classification of  
12 purchases from CBPP in the 2015 Test Year Cost of Service Study would not result in  
13 a change in the proposed demand charge in the wholesale rate to Newfoundland  
14 Power. See Hydro's response to CA-NLH-157.
