

- 1 Q. Further to response to Request for Information NP-NLH-046:
2 The 2014 forecast Holyrood production cost is approximately \$52 million (25%)
3 higher than the 2013 Test Year forecast. Does Hydro believe it would be reasonable
4 to adjust the 2013 Test Year forecast and use the 2014 forecast Holyrood
5 production to better reflect the cost of providing service for the period that
6 customer rates will be in effect? If not, why not?
7
8
- 9 A. Please see Hydro's response to NP-NLH-184.
