

1    Q.    **2013 General Rate Application, Cost of Service**

2           Exhibit 13, Schedule 3.1 - Provide the Energy Amounts at Distribution Level

3           (Substation, Primary Lines, Line Transformers, Secondary Lines) for each of the rate

4           classes in the same format as shown for demand and customers in Schedules 3.1- A,

5           B, C, D, and E.

6

7

8    A.    As energy is not used for allocation at the distribution levels noted above, Hydro

9           does not calculate energy amounts at these levels. Please refer to the “MWh

10          Losses Distributed” tab of the Loss Model provided in response to PUB-NLH-114 for

11          the levels at which energy amounts are calculated.
