

1 Q. 2013 Amended General Rate Application, November 10, 2014, page 2.65: Update
2 Table 2.16 to include the referenced footnote. Explain why the 2014 forecast is
3 “n/a”.
4
5

6 A. Please see Table 2.16 below, which includes the referenced footnote. The 2014
7 forecast is not available as Hydro did not prepare a load forecast of TwinCo
8 requirements for 2014, which reflected the outlook for Wabush Mines energy
9 requirements or IOCC’s TwinCo requirements in 2014. Hydro did not prepare a
10 forecast of TwinCo requirements because the TwinCo requirements in 2014 did not
11 impact Hydro’s cost of service. Hydro did have a TwinCo energy requirements
12 forecast that was prepared prior to 2014, which reflected non-current iron ore
13 mining requirements; Hydro considered this forecast to be invalid and was
14 therefore not included when Table 2.16 was prepared.
15

Table 2.16

Summary of Total IOCC and Wabush Mines Electricity Requirements 2007 to 2015									
	2007 Actual	2008 Actual	2009 Actual	2010 Actual	2011 Actual	2012 Actual	2013 Actual	2014 Forecast⁽¹⁾	2015 Forecast
IOC	1,520	1,726	1,398	1,680	1,458	1,544	1,549	n/a	1,720
Wabush Mines	420	412	365	399	390	380	339	n/a	70
Total Industrial Load	<u>1,940</u>	<u>2,138</u>	<u>1,763</u>	<u>2,079</u>	<u>1,848</u>	<u>1,924</u>	<u>1,888</u>	<u>n/a</u>	<u>1,790</u>

Note 1. The TWINCo industrial requirements for 2014 are not available on a forecast basis.
