

1     Q.     Further to the response to PUB-NLH-050 (Rev 1, Nov 18-14), provide the impact in  
2             2015 on Hydro and its customers if the Holyrood conversion factor varies by +/- 10  
3             kWh from that now proposed by Hydro of 607 kWh/barrel.

4

5

6     A.     Please refer to Hydro's response to PUB-NLH-050 (Revision 2). This table indicates  
7             the impact in 2015 on Hydro if the Holyrood conversion factor varies by +/- 10 kWh  
8             from that now proposed by Hydro of 607 kWh/barrel. Hydro had omitted to  
9             update the corresponding conversion rates in the first column of the table in its first  
10            revision of that response.
