

1 Q. **Reference: RFI V-NLH-3**

2 Attachment 1 of V-NHL-3 indicates that purchased energy from 'NP at Hydro
3 Request' is in excess of 20 ¢/kWh. What is the source of generation for this energy
4 and under what circumstances does Hydro request this energy?

5

6

7 A. The purchased energy indicated as 'NP at Hydro Request' is generated from
8 Newfoundland Power's standby diesel and gas turbine generation located in various
9 areas of the Island portion of the Province. Hydro pays for the fuel used for
10 generation at its request. As indicated in Hydro's response to CA-NLH-072, this
11 generation may be requested in the event of a system emergency such as a
12 generation shortage or significant loss of transmission.
