

Undertaking 73

RE: Number of air blast circuit breakers and power transformers per crew

Undertaking 73, Attachment 1 shows the air blast circuit breakers and power transformers broken out for the Whitbourne, Bishop's Falls, Stephenville and TRO Northern crews.

The crews in each of the areas are comprised of the following positions:

- Whitbourne (14 total): five Electrical Maintenance A, two Mechanical Maintenance A, three Terminal Maintenance A and four Protection and Control Technologists. This includes the Hardwoods GT.
- Bishop's Falls (11 total): four Electrical Maintenance A, four Terminal Maintenance A and three Protection and Control Technologists.
- Stephenville (10 total): three Electrical Maintenance A, two Mechanical Maintenance A, two Terminal Maintenance A and three Protection and Control Technologists. This includes the Stephenville GT.
- TRO Northern (10 total): four Electrical Maintenance A, four Mechanical Maintenance A and two Protection and Control Technologists. This includes the Southern Labrador diesel plants, St. Anthony diesel plant and Hawke's Bay diesel plant.
