

1 Q. (Rate Schedules)

2 Please file a table comparing average current rates in cents/kWh to average  
3 proposed rates and showing the percentage increase proposed for each customer  
4 class.

5

6

7 A. The table below compares average current rates in cents/kWh (tax excluded) to  
8 average proposed rates, and provides the percentage increase proposed, related to  
9 each customer class for which Hydro performs rate design. Newfoundland Power  
10 completes rate design for its customers, and Hydro uses the same rates for its  
11 Island Interconnected, L'Anse au Loup, and Isolated Domestic basic customer  
12 charge and lifeline rate, and isolated streetlight rates. Hydro uses NP's percentage  
13 change by rate class for its other Isolated System rates, and therefore does not have  
14 proposed rate components available for comparison.

#### Labrador Interconnected

Rate Class	Percentage Increase	Existing Rates ¢/kWh	Proposed Rates ¢/kWh
Domestic	26.0%	3.5	4.4
2.1 G S 0-10 kW	28.5%	6.2	8.0
2.2 G S 10-100 kW	16.6%	3.1	3.6
2.3 G S 110-1000 kVa	16.9%	2.7	3.1
2.4 G S over 1000 kVa	22.0%	2.0	2.5

#### Isolated Systems - Government

Rate Class	Percentage Increase	Existing Rates ¢/kWh	Proposed Rates ¢/kWh
Domestic Government	17.7%	80.4	94.7
2.1 G S Government	22.1%	74.0	90.4
2.2 G S Government	27.7%	68.4	87.4
