

1 Q. (Re: Response to NP-NLH-48) What is the probability that purchases from Nalcor
2 will vary from forecast by +/- 10%, and alternatively +/- 5%?

3

4

5 A. The probabilities that the purchases from Nalcor will vary from forecast by +/- 10%,
6 and +/- 5% were determined from the analysis which produced Chart 2 of Hydro's
7 response to NP-NLH-049.

8

9 The probability that the purchases from Nalcor will be in the range of +/- 10% of the
10 forecast (between 560 GWh and 684 GWh) is approximately 96%. Conversely,
11 there is only an approximately 4% chance that the purchases will vary more than +/-
12 10%.

13

14 The probability that the purchases from Nalcor will be in the range of +/- 5% of
15 forecast (between 591 GWh and 653 GWh) is 55%. Conversely, there is an
16 approximate 45% chance that the purchases will vary more than +/-5%.
