

1    Q.    (Re: Response to CA-NLH-32) Given that Hydro is not in position to "determine the  
2        appropriate price signals", why is it proposing to more than double the price signal  
3        in the NP demand charge?

4

5

6    A.    Hydro is proposing a cost-based demand rate for NP, similar to the cost-based  
7        demand rate in place for the IC.
