

1 Q. (Re: Response to PUB-NLH-333) The response relates to treatment of NP generation
2 and curtailable load from an operating perspective. Please address the question
3 from a cost of service perspective.

4

5

6 A. The fact that curtailable load does not have the same reliability as NP's generation
7 does introduce complexities from a cost of service perspective. This is discussed
8 more fully in Section 2.1 of Hydro's Exhibit 9 in the GRA. However, Hydro is open to
9 reviewing proposals from NP, the CA and other interested stakeholders for the
10 treatment of NP curtailable load that addresses the concerns outlined in Section
11 2.1.
