

1 Q. Have the costs for staffing, maintenance or supplies at the Corner Brook frequency
2 converter changed since the last GRA, including with the completion of the unit
3 improvements?

4

5

6 A. Please refer to Hydro's response to IC-NLH-144 for a description of the treatment of
7 costs associated with the Corner Brook frequency converter. Since the last GRA
8 there has been no change in the maintenance staff FTEs in the Terminal Station
9 business unit and the only increases would have been related to general wage
10 increases. With respect to maintenance material and supplies, the following table
11 provides a comparison of costs for the Generation Interconnected business unit for
12 2007 actuals and 2013 Test Year budget.

	2007 Actual	2013 Test Year
Total Material (\$000)	261.8	254.1
