

1 Q. What is NP's hydraulic peak installed capacity, annual average energy and load
2 factor?

3

4

5 A. Newfoundland Power's hydraulic peak installed capacity, annual average energy
6 and load factor (as of April, 2013) are as follows:

- 7 • Hydraulic Peak Installed Capacity: 97.1 MW
- 8 • Annual Average Energy: 429.1 GWh
- 9 • Annual Load Factor: 0.50
