

1 **Q.** **Re: Wilson Pre-Filed Testimony, pages 21 -22. Dr. Wilson provides a**
2 **calculation of the impact of the load variation provision on each of**
3 **Newfoundland Power (NP) and Industrial Customers (IC) due to 1 kW.h**
4 **changes in load for each of NP and IC.**

5
6 **Please provide the same calculation, indicating the dollar value**
7 **impact on each class (NP and IC) of a 1 % increase in the loads**
8 **of each of the respective classes.**
9

10
11 **A.** Dr. Wilson has not made the requested calculation because it would not be
12 informative. NP's kWh load is more than ten times the IC load, and that large
13 difference in load would dominate the dollar value amount. In order to be
14 meaningful, the load variation comparison must be done with a fixed kWh
15 amount as at pages 21-22 of the Report.
