5

6 A. Hydro has acted as a contractor for the Mushuau Innu First Nation (MIFN) in the
7 construction and installation of distribution assets in Natuashish since the Davis
8 Inlet community relocation. Requests for service extensions are received by Hydro
9 from the community, a technical assessment performed and a budget prepared,
10 and work completed in a timely manner as per customer requirements. Work is
11 then billed to the MIFN. Hydro understands that funding is provided to the MIFN
12 for electrical infrastructure expansion by the Federal government through the
13 Department of Aboriginal Affairs and Northern Development.
