

1 Q. **Re: IN-NLH-032**

2 Charts 1-4 apparently do not break down the assets by system, as requested. On
3 page 1, it is mentioned that “Hydro do not track information on capital
4 expenditures by system during the course of a capital project.”

5 Please present charts similar to Charts 1-4, including only those projects that
6 concern the Labrador Interconnected System.

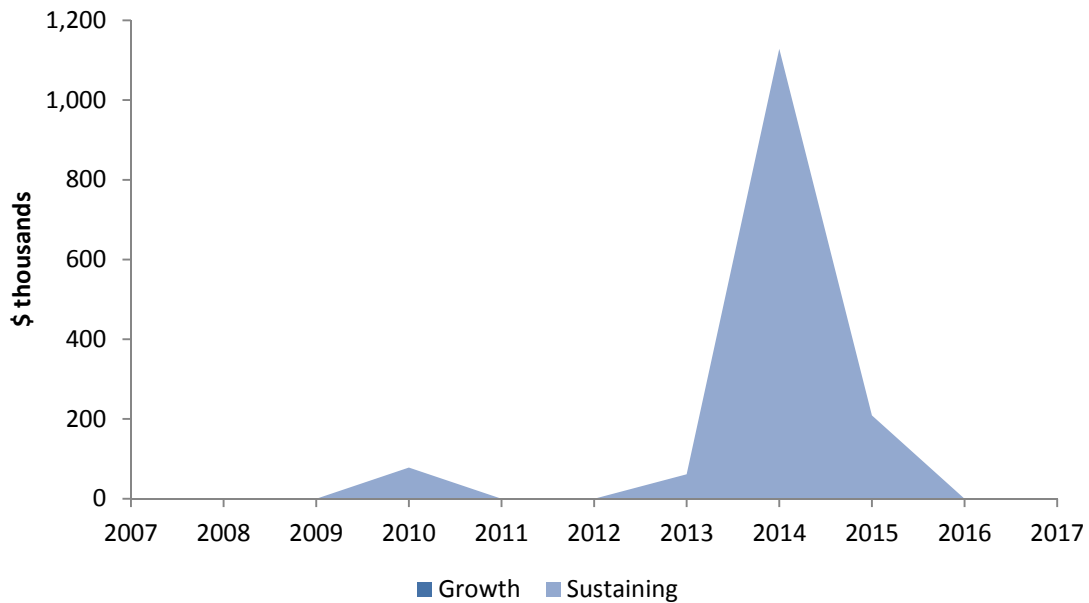

7 If Hydro is unable to comply with this request, please provide a list of all the capital
8 projects summarized in Charts 1-4, indicating the location of each.

9

10

11

12 A Please see Charts 1 to 3 below which show capital expenditures and forecasts for
13 2007 to 2017 at the time of evidence preparation by generation, distribution and
14 other with growth and sustaining expenditures segregated pertaining to the
15 Labrador Interconnected System. Please note that these charts exclude capital
16 projects such as vehicle replacements, power transformer upgrades, and computer
17 replacements that could have components pertaining to the Labrador
18 Interconnected System. There were no capital expenditures by transmission assets
19 for the Labrador Interconnected System. As well, Hydro’s GRA filing in July, 2013
20 did not include the new transmission line currently planned for Labrador West and
21 thus is not reflected in this response.

Chart 1: Generation CAPEX - Growth vs. Sustaining**Chart 2: Distribution CAPEX - Growth vs. Sustaining**
