

1 Q. **Re: IN-.NLH-087**

2 The table provides annual fuel consumption by the Natuashish diesel plant from
3 2007 through 2013 (Jan-Sept).

4 Please indicate the amounts that Hydro would have paid for the purchase of these
5 quantities of diesel fuel, using average annual prices paid by Hydro under similar
6 circumstances for other isolated communities.

7

8

9 A. Table A below provides estimates of annual fuel costs for the fuel consumption
10 presented in IN-NLH-087. The dollar amounts are representative of the amounts
11 that Hydro would have paid for the purchase of these quantities of diesel fuel,
12 using average annual prices paid by Hydro under similar circumstances. Hydro
13 assumes that similar circumstances means similar fuel volumes delivered to the
14 north coast of Labrador by sea-borne tanker.

Table A

2007	\$1,786,779
2008	\$2,403,158
2009	\$1,741,644
2010	\$2,063,352
2011	\$2,638,057
2012	\$2,599,239
2013	\$2,034,418
