

NP-NLH-180
2013 NLH General Rate Application

Page 1 of 1

1 Q. Further to response to Request for Information NP-NLH-124:
2 Does Lummus Consultants agree that it is inefficient for Newfoundland Power and
3 its customers to incur material costs to curtail load at times when the curtailment is
4 not required for system support? If not, why not?
5
6
7 A. Not necessarily. Any material costs need to be evaluated against material savings,
8 such as the deferral of capacity related capital.
