## Independent Auditors' Report

To the Directors of  
Newfoundland and Labrador Hydro

We have audited the balance sheet of Newfoundland and Labrador Hydro as at December 31, 2007 and the statements of income and retained earnings and comprehensive income and cash flows for the year then ended. These financial statements have been prepared on a non-consolidated basis for regulatory purposes. The financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2007 and the results of its operations and its cash flows for the year then ended in accordance with the basis of accounting described in Note 1 to the financial statements. As required by The Hydro Corporation Act, we report that, in our opinion, these principles have been applied on a basis consistent with that of the preceding year, except as disclosed in Note 3.

These financial statements, which have not been, and were not intended to be, prepared in accordance with Canadian generally accepted accounting principles, are solely for the information and use of the Directors of Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities. The financial statements are not intended to be and should not be used by anyone other than the specified users or for any other purpose.

## **NEWFOUNDLAND AND LABRADOR HYDRO NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

Newfoundland and Labrador Hydro (Hydro) is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador (Province) as a Crown corporation and is exempt from paying income taxes under Section 149 (1)(d) of the Income Tax Act. The principal activity of Hydro is the development, generation and sale of electricity.

### **1. PRINCIPLES OF FINANCIAL STATEMENT PRESENTATION**

These financial statements have been prepared in accordance with the significant accounting policies set out below. These financial statements materially differ from Canadian generally accepted accounting principles because they are non-consolidated. Hydro's investments in its subsidiary and jointly controlled companies have been accounted for using the equity method of accounting. Consolidated financial statements for the same period have been prepared for presentation to the Lieutenant-Governor in Council of the Province.

Preparation of these financial statements requires the use of estimates and assumptions that affect the amounts reported and disclosed in these statements and related notes. Key areas where management has made complex or subjective judgements include the fair value and recoverability of assets, litigation, amortization and property, plant and equipment, environmental and asset retirement obligations, amortization, property, plant and equipment and other employee future benefits. Actual results may differ from these estimates, including changes as a result of future decisions made by the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB).

### **2. SIGNIFICANT ACCOUNTING POLICIES**

#### **Rates and Regulations**

Hydro's revenues from its electricity sales to most customers within the Province are subject to rate regulation by the PUB. As well, Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service (COS) methodology. The allowed rate of return on rate base is 7.4%. Hydro applies various accounting policies that differ from enterprises that do not operate in a rate regulated environment. Generally these policies result in the deferral and amortization of costs or credits which will be recovered or refunded in future rates. In the absence of rate regulation these amounts would be included in the determination of net income in the year the amounts are incurred. The effects of rate regulation on the financial statements are more fully disclosed in Note 5.

#### **Cash Equivalents and Short-Term Investments**

Cash equivalents and short-term investments consist primarily of Canadian treasury bills and banker's acceptances. Those with original maturities at date of purchase of three months or less are classified as cash equivalents whereas those with original maturities beyond three months and less than twelve months are classified as short-term investments. Both are stated at cost, which approximates market value. There were no cash equivalents or short-term investments outstanding at December 31, 2007 (2006 - \$5.7 million bearing interest rates ranging from 4.30% to 4.35%).

#### **Fuel and Supplies**

Fuel and supplies inventories are recorded at average cost.

## 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)

### Property, Plant and Equipment

Property, plant and equipment are recorded at cost, which comprises materials, labour, contracted services, other costs directly related to construction, and an allocation of certain overhead costs. Expenditures for additions and betterments are capitalized and normal expenditures for maintenance and repairs are charged to operations. The cost of property, plant and equipment under construction is transferred to property, plant and equipment in service when construction is completed and facilities are commissioned, at which point amortization commences.

Construction in progress includes the costs incurred in preliminary feasibility studies, engineering and construction of new generation, transmission and distribution facilities. Interest is charged to construction in progress at rates equivalent to the weighted average cost of capital.

Hydro recognizes asset retirement obligations in the period in which they are incurred if a reasonable estimate of fair value can be determined. Asset retirement obligations are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related asset retirement obligation cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is legally required to remove, an asset retirement obligation will be recognized at that time.

Contributions in aid of construction are funds received from customers and governments toward the cost of property, plant and equipment. Contributions are treated as a reduction to property, plant and equipment and the net property, plant and equipment are amortized.

Gain or losses on the disposal of property, plant and equipment are recognized in income as incurred.

Amortization is calculated on hydroelectric generating plant and on transmission plant in service on the sinking fund method using interest factors ranging from 5.25% to 15.79%. Amortization on other plant in service is calculated on the straight-line method. These methods are designed to fully amortize the cost of the facilities, after deducting contributions in aid of construction, over their estimated service lives.

Estimated service lives of the major assets are as follows:

Generation Plant	
Hydroelectric	50, 75 and 100 years
Thermal	25 and 30 years
Diesel	20 years
Transmission	
Lines	40 and 50 years
Switching stations	40 years
Distribution system	30 years
Other	3 to 50 years

Hydroelectric generation plant includes the powerhouse, turbines, governors, and generators, as well as water conveying and control structures, including dams, dykes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks, and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dykes and liners, and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kV. Switching stations assets are used to step up voltages of electricity from generating to transmission and to step down voltages for distribution.

Distribution system assets include poles, transformers, insulators, and conductors.

Other assets include telecontrol, computer software, buildings, vehicles, furniture, tools and equipment.

## 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)

### **Impairment of Long-Lived Assets**

Hydro reviews the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that the expected undiscounted net cash flows could be lower than the carrying value of the property and assets. An impairment loss corresponding to the amount by which the carrying value exceeds fair value is recognized, if applicable.

### **Revenue Recognition**

Revenue is recognized on the accrual basis, as power and energy deliveries are made, and includes an estimate of the value of electricity consumed by customers in the year, but billed subsequent to year-end. Sales within the Province are primarily at rates approved by the PUB, whereas sales to Hydro-Québec and certain major industrial customers are at rates under the terms of the applicable contracts.

### **Foreign Currency Translation**

Foreign currency transactions are translated into their Canadian dollar equivalent as follows:

- (a) At the transaction date, each asset, liability, revenue or expense is translated using exchange rates in effect at that date.
- (b) At each balance sheet date monetary assets and liabilities are adjusted to reflect exchange rates in effect at that date. Any resulting gain or loss is reflected in income.

### **Credit Risk**

Hydro is exposed to credit risk associated with trade receivables. Although a significant portion of the total accounts receivable balance are due from one customer, management does not consider Hydro to be exposed to a material credit risk since that customer is another regulated utility.

### **Employee Future Benefits**

Employees participate in the Province's Public Service Pension Plan, a multiemployer defined benefit plan. The employer's contributions are expensed as incurred.

Hydro provides group life insurance and health care benefits on a cost-shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee future benefits is accounted for on an accrual basis and has been actuarially determined using the projected benefit method prorated on service and management's best estimate of salary escalation, retirement ages of employees and expected health care costs. The excess of cumulative net actuarial gains and losses over 10% of the accrued benefit obligation are amortized over the expected average remaining service life of the employee group, which is approximately 13 years.

## 3. NEW ACCOUNTING POLICIES

Effective January 1, 2007, Hydro adopted four new accounting standards issued by The Canadian Institute of Chartered Accountants' (CICA). Section 1530, "Comprehensive Income," introduces a new financial statement which captures unrealized gains and loss on financial instruments. Section 3855, "Financial Instruments - Recognition and Measurement," establishes standards for recognizing and measuring financial instruments, namely financial assets, financial liabilities and derivatives. Depending on financial instruments' classification, changes in subsequent measurements are recognized in net income or Other Comprehensive Income (OCI). Section 3861, "Financial Instruments - disclosure and presentation" establishes standards for presentation of financial instruments and non-financial derivatives, and identifies the information that should be disclosed about them. Section 3865, "Hedges" specifies when and how hedge accounting may be applied. Hydro did not engage in any hedging relationships during this period.

### 3. NEW ACCOUNTING POLICIES (cont'd.)

Under the new standards, all financial instruments are classified into one of the following five categories: held-to-maturity, loans and receivables, available-for-sale, held-for-trading or other liabilities. All financial instruments, including derivatives, are carried at fair value on the balance sheet except for loans and receivables, held-to-maturity investments and other financial liabilities, which are measured at amortized cost. Held-for-trading financial instruments are measured at fair value and all gains and losses are included in net income in the period in which they arise. Available-for-sale financial instruments are measured at fair value with revaluation gains and losses included in OCI until the instrument is derecognized or impaired.

The Company has classified its financial instruments as follows:

Cash and cash equivalents	Held-for-trading
Short-term investments	Held-to-maturity
Accounts receivable	Loans and receivables
Sinking funds - investments in same Hydro issue	Held-to-maturity
Sinking funds - other investments	Available for sale
Long-term receivable	Loans and receivables
Bank indebtedness	Other liabilities
Accounts payable and accrued liabilities	Other liabilities
Promissory notes	Other liabilities
Long-term debt	Other liabilities
Due to related parties	Other liabilities

These new standards have been applied prospectively without restatement of prior period amounts. Hydro recognized an increase to opening retained earnings of \$2.3 million upon adoption of these standards. This adjustment arose from the measurement of outstanding long-term debt at amortized cost, using the effective interest method. As well, Hydro recognized an opening balance of accumulated other comprehensive income arising from unrealized gains on sinking fund investments of \$19.3 million.

Total regulatory liabilities		<b>39.0</b>	50.3	
Less current portion		<b>23.5</b>	33.7	
		<b>15.5</b>	<b>16.6</b>	

The following is a description of each of the circumstances in which rate regulation affects the accounting for a transaction or event. Regulatory assets represent future revenues associated with certain costs, incurred in current or prior periods, that are expected to be recovered from customers in future periods through the rate-setting process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are expected to be refunded to customers as a result of the rate-setting process. The risks and uncertainties related to regulatory assets and liabilities are subject to periodic assessment. When Hydro considers that the value of these regulatory assets or liabilities are no longer likely to be recovered or repaid through future rate adjustments, the carrying amount is reflected in operations.

**Rate Stabilization Plan and Related Long-Term Receivable**

Fuel expenses are included in allowed rates on a forecast basis. On January 1, 1986, Hydro, having received the concurrence of the PUB, implemented a rate stabilization plan (RSP) which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, levels of precipitation and load. Adjustments are required in retail rates to cover the amortization of the balance in the plan and are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

Pursuant to Order No. P.U. 7 (2002-2003) and Order No. P.U. 40 (2003) RSP balances which accumulated prior to March 31, 2003, have been converted to a long-term receivable which bears interest at the weighted average cost of capital and is to be recovered over a four-year period, which commenced in 2004. The recovery period for industrial customers ended on December 31, 2007 and any remaining balances were transferred to the current plan. The recovery period for the utility customer will end on June 30, 2008. Any subsequent balances accumulating in the RSP including financing charges, are to be recovered in the following year, with the exception of hydraulic variation, which will be recovered or refunded at a rate of twenty-five percent of the outstanding balance at year-end. Additionally, a fuel rider is calculated annually based on the forecast fuel price and is added to or subtracted from the rates that would otherwise be in effect.

Hydro recognizes the RSP balances as a regulatory asset or liability based on the expectation that rates will be adjusted annually to provide for the collection from, or refund to, customers in future periods. In the absence of rate regulation, generally accepted accounting principles would require that the cost of fuel be recognized as an operating expense in the period in which it was consumed. In 2007, \$31.5 million was recognized (2006 - \$3.9 million deferred) in the RSP and \$8.9 million (2006 - \$83.6 million) was recovered through rates included in energy sales with a corresponding cost amortized in fuel expenses.

## 5. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)

### Foreign Exchange Losses

Hydro incurred foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt in 1975 and 1985, respectively, which were recognized when the debt was repaid in 1997. The PUB has accepted the inclusion of realized foreign exchange losses related to long-term debt in rates charged to customers in future periods. Any such loss, net of any gain, is deferred to the time of the next rate hearing for inclusion in the new rates to be set at that time. Accordingly, these losses are recognized as a regulatory asset. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include the losses in operating costs, in each year that the related debt was outstanding to reflect the exchange rates in effect on each reporting date.

Commencing in 2002, the PUB ordered Hydro's deferred realized foreign exchange losses be amortized over a forty-year period. This amortization, of \$2.2 million annually, is included in interest expense (Note 13).

### Deferred Regulatory Costs

Pursuant to Order No. P.U. 14 (2004), the PUB approved the deferral of external costs associated with the general rate application and hearing, to be amortized over a three-year period, which commenced in 2004. Pursuant to Order No. P.U. 8 (2007), the PUB approved the deferral and amortization of external costs associated with Hydro's 2006 General Rate Application in the amount of \$0.6 million. These costs are recognized as a regulatory asset. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include these costs in operating costs in the year in which they were incurred. In 2007, \$0.2 million (2006 - \$0.7 million) of amortization was recognized in operations and administration expenses.

### Deferred Major Extraordinary Repairs

In its report dated April 13, 1992, the PUB recommended that Hydro adopt a policy of deferring and amortizing the costs of major extraordinary repairs in excess of \$500,000, subject to PUB approval on a case-by-case basis. In 2005, Hydro started an asbestos abatement program at the Holyrood Thermal Generating Station (HTGS). This program was carried out over a three-year period. Pursuant to Order No. P.U. 2 (2005) the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, the costs incurred in each year of the program will be recognized as a regulatory asset which will be amortized over the subsequent five-year period. In 2006, Hydro incurred \$2.3 million in expenses to repair a boiler tube failure at the HTGS. Pursuant to Order No. P.U. 44 (2006) the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, these costs are being amortized over a five-year period. In 2007, Hydro incurred \$2.0 million in expenses to repair a turbine at Holyrood Thermal Generating Station. These costs have been deferred as a major extraordinary repair. Subject to PUB approval, these costs will be amortized over a five-year period commencing in 2008. In the absence of rate regulation, generally accepted accounting principles would require that Hydro expense the cost of the asbestos abatement program and the boiler tube and turbine repairs in the year in which they were incurred. In 2007, \$2.1 million (2006 - \$1.1 million) of amortization was recognized in operating costs.

### Deferred Study Costs

Pursuant to Order No. P.U. 14 (2004) the PUB directed Hydro to conduct an independent study of the treatment of Newfoundland Power's generation in Hydro's Cost of Service study (COS), and an independent marginal cost study, and to accumulate these costs in a deferral account to be dealt with at the next general rate application. Pursuant to Order No. P.U. 8 (2007), Hydro received approval for recovery of these costs over a three year period commencing in 2007. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include the cost of these studies in operating costs in the year in which they were incurred. In 2007, \$0.2 million (2006 - \$0.2 million) was deferred in relation to these studies and \$0.1 million (2006 - nil) of amortization was recognized in operating costs.

## 5. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)

### Deferred Purchased Power Savings

In 1997, Hydro interconnected communities in the area of L'Anse au Clair to Red Bay to the Hydro Quebec system. In its report dated July 12, 1996, the PUB recommended that Hydro defer the benefits of a reduced initial purchased power rate, to be amortized over a 30-year period. These savings are recognized as a regulatory liability. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include the actual cost of purchased power in operating costs in the year in which they were incurred.

### Property, Plant and Equipment

The PUB permits an allowance for funds used during construction (AFUDC), based on Hydro's weighted average cost of capital, to be included in the cost of capital assets and amortized over future periods as part of the total cost of the related asset. Since Hydro's AFUDC (7.6%) is lower than its cost of debt (8.0%), the amount capitalized is lower and interest expense is higher by \$0.3 million (2006 - \$0.3 million) than that which would be permitted in the absence of rate regulation (Note 13).

Hydro depreciates its hydroelectric generating assets and transmission assets using the sinking fund method, as approved by the PUB. In the absence of rate regulation, these assets would likely be amortized using the straight-line method.

During 2005, pursuant to Order No. P.U. 7 (2002-2003) Hydro engaged an independent consultant to conduct an amortization study. The scope of this study included a review of Hydro's amortization methods as well as a statistical analysis of service life estimates and calculation of appropriate amortization rates and annual and accrued amortization balances as at December 31, 2004. Based on the results of this study, management currently estimates that accumulated amortization is approximately \$170-180 million lower than it would otherwise be, and annual amortization expense is \$10-11 million lower, primarily due to the use of sinking fund rather than straight line amortization for hydroelectric and transmission assets. An update to this study is planned for 2008.

## 6. LONG-TERM RECEIVABLES

Included in long-term receivables are two refundable deposits associated with an application for transmission service into Québec, bearing interest at prime until April, 2007 and at one year Guaranteed Income Certificate (GIC) rates thereafter.

## 7. INVESTMENTS

<i>millions of dollars</i>	Ownership Interest	2007	2006
Churchill Falls (Labrador) Corporation Limited	65.8%		
Shares, at cost		167.2	167.2
Equity in retained earnings at beginning of year		171.0	154.2
Equity in net income for the year		15.6	18.1
Dividends for the year		(3.3)	(1.3)
		350.5	338.2
Lower Churchill Development Corporation Limited	51.0%	2.7	2.7
Gull Island Power Company Limited	100.0%	-	-
		<u>353.2</u>	<u>340.9</u>

(a) A portion of Hydro's shareholding in CF(L)Co. is deposited in a voting trust pursuant to an agreement with Hydro-Québec in relation to CF(L)Co's General Mortgage Bonds. Effective February 25, 2008, the bonds were retired removing the requirement for the shares to be held in trust.

Effective June 18, 1999, the two shareholders of CF(L)Co., Hydro and Hydro-Québec, entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of CF(L)Co. be subject to approval jointly by representatives of Hydro and Hydro-Québec. CF(L)Co. also receives revenues from Hydro-Québec, under a guaranteed winter availability contract through 2041.

## 7. INVESTMENTS (cont'd.)

(b) The Lower Churchill Development Corporation Limited (LCDC) was established with the objective of developing all or part of the hydroelectric potential of the Lower Churchill River (Lower Churchill Development) in Labrador.

Hydro, the designate for the Province's shareholding in LCDC, holds 1,540 Class A common shares of LCDC. Five hundred and twenty shares were acquired in 1979 pursuant to the signing of an Option Agreement between LCDC and the Province, dated November 24, 1978, and expiring November 24, 2008. Five hundred and ten shares were acquired in each of the years 1980 and 1981, by way of capital contributions from the Province.

(c) Gull Island Power Company Limited (GIPCo.) is incorporated under the laws of Canada. Its objective was to develop the hydroelectric potential at Gull Island on the Lower Churchill River in Labrador, and construct a direct current transmission system from Labrador to the island of Newfoundland (Gull Island Project). All project costs were funded by way of capital contributions from the Province. Hydro suspended all work on the Gull Island Project in 1976, in the absence of satisfactory arrangements for the financing of the project and the marketing of available power.

Upon agreement to continue with the Lower Churchill Development, LCDC has the option to purchase the GIPCo. assets pursuant to the provisions of the Option Agreement.

## 8. LONG-TERM DEBT

Series	Interest Rate %	Year of Issue	Year of Maturity	2007	2006
<i>millions of dollars</i>					
AA	5.50	1998	2008	<b>199.9</b>	199.6
V	10.50	1989	2014	<b>124.4</b>	124.7 (a)
X	10.25	1992	2017	<b>149.0</b>	149.4 (a)
Y	8.40	1996	2026	<b>292.7</b>	294.5 (a)
AB	6.65	2001	2031	<b>307.1</b>	306.6 (a)
AD	5.70	2003	2033	<b>123.5</b>	123.6 (a)
AE	4.30	2006	2016	<b>223.3</b>	223.2
Total debentures				<b>1,419.9</b>	1,421.6
Less sinking fund investments in own debentures				<b>60.8</b>	56.4
Other				<b>1,359.1</b>	1,365.2
Less current portion				<b>0.3</b>	0.5
				<b>1,359.4</b>	1,365.7
				<b>208.3</b>	8.3
				<b>1,151.1</b>	1,357.4

(a) Sinking funds have been established for these issues.

Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada or any province of Canada, and have maturity dates ranging from 2013 to 2033. Hydro debentures which Management intends to hold to maturity are deducted from long-term debt while all other sinking fund investments are shown separately on the balance sheet as assets. Annual contributions to the various sinking funds are as per bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 4.50% to 9.86% (2006 - 4.50% to 9.86%).

Promissory notes, debentures and long-term loans are unsecured and unconditionally guaranteed as to principal and interest and where applicable, sinking fund payments, by the Province. The Province charges Hydro a guarantee fee of one percent annually on the total debt (net of sinking funds) guaranteed by the Province, outstanding as of the preceding December 31.

Hydro uses promissory notes to fulfill its short-term funding requirements. At year-end the promissory notes outstanding were at an interest rate of 4.45% (2006 - 4.30%).

## 8. LONG-TERM DEBT (cont'd.)

Hydro maintains a \$50.0 million Canadian or US equivalent unsecured operating credit facility with its banker. Advances may take the form of a prime rate advance or the issuance of a Bankers' Acceptance (BA) with interest calculated at the prime rate or prevailing Government BA fee. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the prime rate.

Required repayments of long-term debt and sinking fund requirements over the next five years will be as follows:

<i>millions of dollars</i>	2008	2009	2010	2011	2012
Sinking fund requirements	8.2	8.2	8.2	8.2	8.2
Long-term debt repayments	<u>200.1</u>	<u>0.1</u>	<u>-</u>	<u>-</u>	<u>-</u>
	<u><u>208.3</u></u>	<u><u>8.3</u></u>	<u><u>8.2</u></u>	<u><u>8.2</u></u>	<u><u>8.2</u></u>

## 9. EMPLOYEE FUTURE BENEFITS

### Pension Plan

Employees participate in the Province's Public Service Pension Plan, a multiemployer defined benefit plan. The employer's contributions of \$3.8 million (2006 - \$3.5 million) are expensed as incurred.

### Other Benefits

Additionally, Hydro provides group life insurance and healthcare benefits on a cost-shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2007, cash payments to beneficiaries for its unfunded other employee future benefits was \$1.9 million (2006 - \$2.0 million). The most recent actuarial valuation was performed as at December 31, 2007.

<i>millions of dollars</i>	2007	2006
Accrued benefit obligation		
Balance at beginning of year	<u>57.1</u>	<u>41.4</u>
Current service cost	<u>1.9</u>	<u>1.7</u>
Interest cost	<u>3.1</u>	<u>2.5</u>
Actuarial (gain) loss	<u>(2.4)</u>	<u>13.5</u>
Benefits paid	<u><u>(1.9)</u></u>	<u><u>(2.0)</u></u>
Balance at end of year	<u><u>57.8</u></u>	<u><u>57.1</u></u>
Plan deficit at end of year	<u>57.8</u>	<u>57.1</u>
Unamortized actuarial loss	<u>(17.7)</u>	<u>(21.3)</u>
Unamortized past-service cost	<u>(0.3)</u>	<u>(0.3)</u>
Accrued benefit liability at end of year	<u><u>39.8</u></u>	<u><u>35.5</u></u>

<i>millions of dollars</i>	2007	2006
Components of benefit cost		
Current service cost	<u>1.9</u>	<u>1.7</u>
Interest cost	<u>3.1</u>	<u>2.5</u>
Actuarial (gain) loss	<u>(2.4)</u>	<u>13.5</u>
	<u><u>2.6</u></u>	<u><u>17.7</u></u>
Adjustments		
Difference between actual actuarial loss and amount recognized	<u>3.6</u>	<u>(12.5)</u>
Benefit expense	<u><u>6.2</u></u>	<u><u>5.2</u></u>

## 9. EMPLOYEE FUTURE BENEFITS (cont'd.)

The significant actuarial assumptions used in measuring the company's accrued benefit obligations and benefit expense are as follows:

	2007	2006
Discount rate	5.5%	5.3%
Rate of compensation increase	3.5%	3.5%

Assumed health care trend rates:

	2007	2006
Initial healthcare expense trend rate	8.0%	12.0%
Cost trend decline to	5.0%	5.0%
Year that rate reaches the rate it is assumed to remain at	2011	2010

A 1% change in assumed healthcare trend rates would have had the following effects for 2007:

<i>millions of dollars</i>	Increase	Decrease
Current service cost	0.4	(0.3)
Interest cost	0.6	(0.4)
Accrued benefit obligation	10.0	(7.7)

## 10. SHAREHOLDERS' EQUITY

### Share Capital

<i>millions of dollars</i>	2007	2006
Common shares of par value \$1 each Authorized 25,000,000 shares; issued 22,503,942 shares	<u>22.5</u>	<u>22.5</u>

### Contributed Capital

<i>millions of dollars</i>	2007	2006
Lower Churchill Development Corporation	15.4	15.4
Muskrat Falls Project	2.2	2.2
	<u>17.6</u>	<u>17.6</u>

## 11. ACCUMULATED OTHER COMPREHENSIVE INCOME

Changes in the fair market value of sinking fund investments designated as available for sale constitute the sole item in Accumulated Other Comprehensive Income.

<i>millions of dollars</i>	2007	2006
Adjusted opening balance arising from adoption of new accounting policies regarding financial instruments	19.3	-
Change in fair value of sinking fund investments	<u>0.2</u>	<u>-</u>
Balance, end of year	<u>19.5</u>	<u>-</u>

## 12. FINANCIAL INSTRUMENTS

### Fair Value

The estimated fair values of financial instruments as at December 31 are based on relevant market prices and information available at the time. The fair value of long-term debt is estimated based on the quoted market price for the same or similar debt instruments. The fair value estimates below are not necessarily indicative of the amounts that Hydro might

## 12. FINANCIAL INSTRUMENTS (cont'd.)

receive or incur in actual market transactions. As a significant number of Hydro's assets and liabilities, including fuels and supplies and property, plant and equipment, do not meet the definition of financial instruments, the fair value estimates below do not reflect the fair value of Hydro as a whole.

	Carrying Value	Fair Value	Carrying Value	Fair Value
<i>millions of dollars</i>	2007		2006	
Long-term debt including current portion	1,359.4	1,691.4	1,365.7	1,726.1

## 13. INTEREST EXPENSE

<i>millions of dollars</i>	2007	2006
Gross interest		
Long-term debt	101.4	101.9
Promissory notes	0.9	5.2
	102.3	107.1
Accretion of long-term debt	0.7	0.9
Amortization of foreign exchange losses	2.2	2.2
	105.2	110.2
Less		
Interest capitalized during construction	6.3	4.9
Interest earned	12.9	16.5
	86.0	88.8
Less		
Interest attributable to CF(L)Co. share purchase debt	0.9	1.7
Net interest attributable to Hydro	85.1	87.1
Debt guarantee fee	13.1	14.0
Net interest and guarantee fee	98.2	101.1

## 14. CHANGE IN NON-CASH BALANCES

<i>millions of dollars</i>	2007	2006
Accounts receivable	(9.7)	(2.2)
Fuel and supplies	(15.5)	5.9
Prepaid expenses	0.3	0.8
Long-term receivable	(5.2)	(18.1)
Regulatory assets	49.7	39.1
Regulatory liabilities	(11.3)	37.6
Accounts payable and accrued liabilities	27.1	(10.4)
Accrued interest	-	1.3
Due to related parties	(3.3)	0.3
Employee future benefits	4.3	3.2
	36.4	57.5

## 15. SEGMENT INFORMATION

Hydro operates in two business segments. Regulated operations encompass sales of power and energy to most customers within the province of Newfoundland and Labrador while other energy activities are primarily engaged in energy project development and sales to markets outside the province. The designation of segments has been based on regulatory status. The segment's accounting policies are the same as those described in Note 2.

**15. SEGMENT INFORMATION (cont'd.)**

	Regulated Operations	Other Energy Activities	Total
<i>millions of dollars</i>	<b>2007</b>		
Revenue	440.7	58.5	499.2
Depreciation	38.4	-	38.4
Interest	103.2	(5.0)	98.2
(Loss) Income from operations	2.9	53.6	56.5
Other Income - CF(L)Co			25.1
Net Income			<u>81.6</u>
Assets	1,733.3	143.2	1,876.5
Investment in Churchill Falls (Labrador) Corporation			350.5
Total Assets			<u>2,227.0</u>
Capital Expenditures	36.0	45.7	81.7
<i>millions of dollars</i>	<b>2006</b>		
Revenue	416.5	57.4	473.9
Depreciation	36.6	-	36.6
Interest	102.4	(1.3)	101.1
(Loss) Income from operations	(6.9)	50.5	43.6
Other Income			26.4
Net Income			<u>70.0</u>
Assets	1,732.9	92.3	1,825.2
Investment in Churchill Falls (Labrador) Corporation			338.2
Total Assets			<u>2,163.4</u>
Capital Expenditures	41.6	14.7	56.3

In 2007, sales to Hydro's two largest customers amounted to 66.8% and 11.1% (2006 - 62.4% and 13.5%) of total energy sales revenue. At December 31, 2007 approximately 69.7% (2006 - 69.0%) of the total accounts receivable balance outstanding is due from one customer.

**Geographic Information**

Revenues by geographic area:

	2007	2006
<i>millions of dollars</i>		
Newfoundland and Labrador	445.1	421.4
Québec	54.1	52.5
	<u>499.2</u>	<u>473.9</u>

Substantially all of Hydro's assets are located in the Province.

**16. COMMITMENTS AND CONTINGENCIES**

(a) Hydro has received claims instituted by various companies and individuals with respect to outages and other miscellaneous matters. Although such matters cannot be predicted with certainty, management currently considers Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, to be \$1.2 million (2006 - \$1.4 million).

## 16. COMMITMENTS AND CONTINGENCIES (cont'd.)

### (a) (cont'd.)

One of Hydro's industrial customers commenced legal proceedings in 1997, claiming approximately \$21.8 million related to outages and plant shutdowns. Hydro is defending this claim and Management believes that this claim will not be successful.

- (b) Outstanding commitments for capital projects total approximately \$16.5 million at December 31, 2007 (2006 - \$3.6 million).
- (c) Hydro has entered into a number of long-term power purchase agreements as follows:

Type	Rating	In-Service Date	Term
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	15 MW	1998	25 years
Hydroelectric	4 MW	1998	25 years
Hydroelectric	32 MW	2003	30 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2008	20 years

Estimated payments due in each of the next 5 years are as follows:

<i>millions of dollars</i>	2008	2009	2010	2011	2012
Power purchases	37.3	56.0	59.0	65.8	66.5

- (d) Hydro has issued two irrevocable letters of credit, one in the amount of \$7.2 million to New Brunswick System Operator as credit support related to application for point to point transmission service. The second letter of credit has been issued to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement.

## 17. RELATED PARTY TRANSACTIONS

The Province, CF(L)Co, LCDC and GIPCo are related parties of Hydro. In addition, the PUB is related to Hydro by virtue of its status as an agency of the Province.

<i>millions of dollars</i>		2007	2006
Due to GIPCo.	- promissory notes at 4.3% (2006 - 4.25%)	0.1	0.1
Due to (from) CF(L)Co.	- nil (2006 - promissory notes at 4.30% - 4.55%) - other	- 0.1 0.2	3.5 (0.1) 3.5

- (a) Hydro has entered into a long-term power contract with CF(L)Co. for the purchase of \$6.1 million (2006 -\$6.1 million) of the power produced by CF(L)Co.
- (b) Under an agreement between Hydro and CF(L)Co., Hydro provides certain engineering, technical, management and administrative services to CF(L)Co. These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties. For the year ended December 31, 2007 the fees paid to Hydro for these services amounted to approximately \$2.2 million (2006 - \$1.9 million).

**17. RELATED PARTY TRANSACTIONS (cont'd.)**

(c) Hydro is required to contribute to the cost of operations of the PUB as well as pay for the cost of hearings into applications it makes. During 2007, Hydro paid \$1.2 million to the PUB (2006 - \$0.8 million) of which \$0.1 million was included in accrued liabilities reflected at December 31, 2007.

**18. SUBSEQUENT EVENTS**

Effective January 1, 2008, the Province created a new crown corporation to hold its investments in the energy sector. Hydro is in the process of transferring its non-regulated assets and personnel including its investments in CFLCo GIPCo and LCDC to the new parent company. The segment information related to regulated operations in Note 15 is indicative of the operation that will remain in Hydro.

**19. COMPARATIVE FIGURES**

Certain of the 2006 comparative figures have been reclassified to conform with the 2007 financial statement presentation. Specifically, deferred charges in the amount of \$3.4 million have been reclassified to debt as a result of the adoption of CICA Section 3855. In addition, a reclassification of investments of \$19.8 million is reported with the sinking funds as opposed to an offset against debt.

**NEWFOUNDLAND AND LABRADOR HYDRO  
NON-CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2008**

## Auditors' Report

To the Directors of  
Newfoundland and Labrador Hydro

We have audited the balance sheet of Newfoundland and Labrador Hydro as at December 31, 2008 and the statements of income and retained earnings and comprehensive income and cash flows for the year then ended. These financial statements have been prepared on a non-consolidated basis for regulatory purposes. The financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with the basis of accounting described in Note 1 to the financial statements. As required by The Hydro Corporation Act, we report that, in our opinion, these principles have been applied on a basis consistent with that of the preceding year, except as disclosed in Note 3.

These financial statements, which have not been, and were not intended to be, prepared in accordance with Canadian generally accepted accounting principles, are solely for the information and use of the Directors of Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities. The financial statements are not intended to be and should not be used by anyone other than the specified users or for any other purpose.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. PRINCIPLES OF FINANCIAL STATEMENT PRESENTATION**

Newfoundland and Labrador Hydro is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador ("Province") as a Crown corporation and is exempt from paying income taxes under Section 149 (1)(d) of the Income Tax Act. The principal activity of Hydro is the development, generation and sale of electricity.

These financial statements have been prepared in accordance with the significant accounting policies set out below. These financial statements materially differ from Canadian generally accepted accounting principles because they are non-consolidated. Hydro's investments in its subsidiary and jointly controlled companies have been accounted for using the equity method of accounting. Consolidated financial statements for the same period have been prepared for presentation to the Lieutenant-Governor in Council of the Province.

Preparation of these financial statements requires the use of estimates and assumptions that affect the amounts reported and disclosed in these statements and related notes. Key areas where management has made complex or subjective judgements include the fair value and recoverability of assets, litigation, amortization and property, plant and equipment, environmental and asset retirement obligations, and other employee future benefits. Actual results may differ from these estimates, including changes as a result of future decisions made by the Newfoundland and Labrador Board of Commissioners of Public Utilities ("PUB").

**2. SIGNIFICANT ACCOUNTING POLICIES**

**Rates and Regulations**

Hydro's revenues from its electricity sales to most customers within the Province are subject to rate regulation by the PUB. As well, Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service ("COS") methodology. The allowed rate of return on rate base is 7.4% (2007 - 7.4%). Hydro applies various accounting policies that differ from enterprises that do not operate in a rate regulated environment. Generally these policies result in the deferral and amortization of costs or credits which will be recovered or refunded in future rates. In the absence of rate regulation these amounts would be included in the determination of net income in the year the amounts are incurred. The effects of rate regulation on the financial statements are more fully disclosed in Note 5.

**Cash and Cash Equivalents and Short-Term Investments**

Cash and cash equivalents and short-term investments consist primarily of Canadian treasury bills and banker's acceptances. Those with original maturities at date of purchase of three months or less are classified as cash equivalents whereas those with original maturities beyond three months and less than twelve months are classified as short-term investments. Both are stated at cost, which approximates market value. There were no cash equivalents or short-term investments outstanding at December 31, 2008 (2007 - nil).

**Fuel and Supplies**

Fuel and supplies inventories are recorded at the lower of average cost or net realizable value.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Property, Plant and Equipment**

Property, plant and equipment are recorded at cost, which comprises materials, labour, contracted services, other costs directly related to construction, and an allocation of certain overhead costs. Expenditures for additions and betterments are capitalized and normal expenditures for maintenance and repairs are charged to operations. The cost of property, plant and equipment under construction is transferred to property, plant and equipment in service when construction is completed and facilities are commissioned, at which point amortization commences.

Construction in progress includes the costs incurred in preliminary feasibility studies, engineering and construction of new generation, transmission and distribution facilities. Interest is charged to construction in progress at rates equivalent to the weighted average cost of capital.

Hydro recognizes asset retirement obligations in the period in which they are incurred if a reasonable estimate of fair value can be determined. Asset retirement obligations are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related asset retirement obligation cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is legally required to remove, an asset retirement obligation will be recognized at that time.

Contributions in aid of construction are funds received from customers and governments toward the cost of property, plant and equipment. Contributions are treated as a reduction to property, plant and equipment and the net property, plant and equipment are amortized.

Gain or losses on the disposal of property, plant and equipment are recognized in income as incurred.

Amortization is calculated on hydroelectric generating plant and on transmission plant in service on the sinking fund method using interest factors ranging from 5.25% to 15.79%. Amortization on other plant in service is calculated on the straight-line method. These methods are designed to fully amortize the cost of the facilities, after deducting contributions in aid of construction, over their estimated service lives.

Estimated service lives of the major assets are as follows:

Generation Plant	
Hydroelectric	50, 75 and 100 years
Thermal	25 and 30 years
Diesel	20 years
Transmission	
Lines	40 and 50 years
Switching stations	40 years
Distribution system	30 years
Other	3 to 50 years

Hydroelectric generation plant includes the powerhouse, turbines, governors, and generators, as well as water conveying and control structures, including dams, dykes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks, and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dykes and liners, and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kV. Switching stations assets are used to step up voltages of electricity from generating to transmission and to step down voltages for distribution.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

Distribution system assets include poles, transformers, insulators, and conductors.

Other assets include telecontrol, computer software, buildings, vehicles, furniture, tools and equipment.

**Impairment of Long-Lived Assets**

Hydro reviews the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that the expected undiscounted net cash flows could be lower than the carrying value of the property and assets. An impairment loss corresponding to the amount by which the carrying value exceeds fair value is recognized, if applicable.

**Revenue Recognition**

Revenue is recognized on the accrual basis, as power and energy deliveries are made, and includes an estimate of the value of electricity consumed by customers in the year, but billed subsequent to year-end. Sales within the Province are primarily at rates approved by the PUB, whereas sales to Hydro-Québec and certain major industrial customers are at rates under the terms of the applicable contracts.

**Foreign Currency Translation**

Foreign currency transactions are translated into their Canadian dollar equivalent as follows:

- (a) At the transaction date, each asset, liability, revenue or expense is translated using exchange rates in effect at that date.
- (b) At the date of settlement and at each balance sheet date monetary assets and liabilities are adjusted to reflect exchange rates in effect at that date. Any resulting gain or loss is reflected in income.

**Employee Future Benefits**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions are expensed as incurred.

Hydro provides group life insurance and health care benefits on a cost-shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee future benefits is accounted for on an accrual basis and has been actuarially determined using the projected benefit method prorated on service and management's best estimate of salary escalation, retirement ages of employees and expected health care costs. The excess of cumulative net actuarial gains and losses over 10% of the accrued benefit obligation are amortized over the expected average remaining service life of the employee group, which is approximately 13 years.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**3. CHANGES IN ACCOUNTING POLICIES**

Effective January 1, 2008, Hydro adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants ("CICA").

**Inventories**

Section 3031, Inventory requires inventories to be measured at the lower of cost or net realizable value; disallows the use of last-in-first-out inventory costing methodology; and requires that, when circumstances which previously caused inventories to be written down no longer exist, the amount of the write-down is to be reversed. This new standard did not have any impact on Hydro's financial results or disclosures.

**Disclosure and Presentation of Financial Instruments**

Section 3862, Financial Instruments, Disclosures and Section 3863, Financial Instruments, Presentation sets out new accounting recommendations for disclosure and presentation of financial instruments. The new recommendations require disclosure of both quantitative and qualitative information that enables users of financial statements to evaluate the nature and extent of exposure to risks from financial instruments. These new standards did not have any impact on Hydro's financial results. The additional disclosure is included in Note 13.

**Capital Disclosures**

Section 1535, Capital Disclosures requires Hydro to include additional information in the notes to the financial statements about its capital and the manner in which it is managed. This additional disclosure includes quantitative and qualitative information regarding objectives, policies and processes for managing capital. The additional required disclosure is provided in Note 11 to these financial statements.

**4. PROPERTY, PLANT AND EQUIPMENT**

	Capital Assets in Service	Contributions in aid of Construction	Accumulated Amortization	Construction in Progress	Net Book Value

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**4. PROPERTY, PLANT AND EQUIPMENT (cont'd.)**

At the end of 2008, pursuant to an asset transfer agreement ("the Transfer Agreement") between Hydro and Nalcor Energy ("Nalcor"), Hydro's parent company, \$157.2 million worth of property, plant and equipment was transferred from Hydro to Nalcor for consideration equal to net book value (Note 18 (d)).

**5. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION**

<i>(millions of dollars)</i>	<b>2008</b>	<b>2007</b>	<b>Remaining Recovery Settlement Period (years)</b>
Regulatory assets			
Long-term receivable	-	12.1	-

	<b>74.6</b>	<b>81.3</b>	
Regulatory liabilities			
Rate stabilization plan	<b>53.2</b>	38.3	n/a
Deferred purchased power savings	<b>0.6</b>	0.7	19.0
Total regulatory liabilities	<b>53.8</b>	39.0	
Less current portion	<b>22.3</b>	23.5	
	<b>31.5</b>	<b>15.5</b>	

The following is a description of each of the circumstances in which rate regulation affects the accounting for a transaction or event. Regulatory assets represent future revenues associated with certain costs, incurred in current or prior periods that are expected to be recovered from customers in future periods through the rate-setting process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are expected to be refunded to customers as a result of the rate-setting process. The risks and uncertainties related to regulatory assets and liabilities are subject to periodic assessment. When Hydro considers that the value of these regulatory assets or liabilities are no longer likely to be recovered or repaid through future rate adjustments, the carrying amount is reflected in operations.

**Rate Stabilization Plan and Related Long-Term Receivable**

Fuel expenses are included in allowed rates on a forecast basis. On January 1, 1986, Hydro, having received the concurrence of the PUB, implemented a rate stabilization plan ("RSP") which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, levels of precipitation and load. Adjustments are required in retail rates to cover the amortization of the balance in the plan and are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**5. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)**

**Rate Stabilization Plan and Related Long-Term Receivable (cont'd.)**

Pursuant to Order No. P.U. 7 (2002-2003) and Order No. P.U. 40 (2003) RSP balances which accumulated prior to March 31, 2003, were converted to a long-term receivable bearing interest at the weighted average cost of capital to be recovered over a four-year period, which commenced in 2004. The recovery period for industrial customers ended on December 31, 2007 and for the utility customers on June 30, 2008. Any remaining balances were transferred to the current plan. Any subsequent balances accumulating in the RSP including financing charges are to be recovered in the following year, with the exception of hydraulic variation, which will be recovered or refunded at a rate of twenty-five percent of the outstanding balance at year-end. Additionally, a fuel rider is calculated annually based on the forecast fuel price and is added to or subtracted from the rates that would otherwise be in effect.

Hydro recognizes the RSP balances as a regulatory asset or liability based on the expectation that rates will be adjusted annually to provide for the collection from, or refund to, customers in future periods. In the absence of rate regulation, generally accepted accounting principles would require that the cost of fuel be recognized as an operating expense in the period in which it was consumed. In 2008, \$9.1 million was recognized (2007 - \$31.5 million) in the RSP and \$14.9 million (2007 - \$8.9 million) was recovered through rates and included in energy sales, with a corresponding cost amortized in fuels expenses.

**Foreign Exchange Losses**

Hydro incurred foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt in 1975 and 1985, respectively, which were recognized when the debt was repaid in 1997. The PUB has accepted the inclusion of realized foreign exchange losses related to long-term debt in rates charged to customers in future periods. Any such loss, net of any gain, is deferred to the time of the next rate hearing for inclusion in the new rates to be set at that time. Accordingly, these losses are recognized as a regulatory asset. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include the losses in operating costs, in each year that the related debt was outstanding to reflect the exchange rates in effect on each reporting date.

Commencing in 2002, the PUB ordered Hydro's deferred realized foreign exchange losses be amortized over a forty-year period. This amortization, of \$2.2 million annually, is included in interest expense (Note 14).

**Deferred Regulatory Costs**

Pursuant to Order No. P.U. 8 (2007), the PUB approved the deferral and amortization of external costs associated with Hydro's 2006 General Rate Application in the amount of \$0.6 million. These costs are recognized as a regulatory asset. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include these costs in operating costs in the year in which they were incurred. In 2008, \$0.2 million (2007 - \$0.2 million) of amortization was recognized in operations and administration expenses.

**Deferred Major Extraordinary Repairs**

In its report dated April 13, 1992, the PUB recommended that Hydro adopt a policy of deferring and amortizing the costs of major extraordinary repairs in excess of \$500,000, subject to PUB approval on a case-by-case basis. In 2005, Hydro started an asbestos abatement program at the Holyrood Thermal Generating Station ("HTGS"). This program was carried out over a three-year period. Pursuant to Order No. P.U. 2 (2005) the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, the costs incurred in each year of the program were recognized as a regulatory asset which will be amortized over the subsequent five-year period. In 2006, Hydro incurred \$2.3 million in expenses to repair a boiler tube failure at the HTGS. Pursuant to Order No. P.U. 44 (2006) the

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**5. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)**

**Deferred Major Extraordinary Repairs (cont'd.)**

PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, these costs are being amortized over a five-year period. In 2007 \$2.0 million of expenses related to a turbine failure were deferred as a major extraordinary repair. This amount, net of insurance proceeds, has been expensed in 2008 (Note 19). In the absence of rate regulation, generally accepted accounting principles would require that Hydro expense the cost of the asbestos abatement program and the boiler tube repairs in the year in which they were incurred. In 2008, \$2.7 million (2007 - \$2.1 million) of amortization was recognized in operating costs.

**Deferred Wind Power Costs**

Pursuant to Order No. P.U. 20 (2008) the PUB has agreed to allow Hydro to defer \$0.5 million in costs associated with connecting the wind farms at St. Lawrence and Fermeuse to the Island Interconnected Grid through Newfoundland Power's transmission system and accordingly, these costs have been recognized as a regulatory asset. These costs will be expensed in 2009. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include these costs in operating costs in the year in which they were incurred.

**Deferred Study Costs**

Pursuant to Order No. P.U. 14 (2004) the PUB directed Hydro to conduct an independent study of the treatment of Newfoundland Power's generation in Hydro's COS, and an independent marginal cost study, and to accumulate these costs in a deferral account to be dealt with at the next general rate application. Pursuant to Order No. P.U. 8 (2007), Hydro received approval for recovery of these costs over a three year period commencing in 2007. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include the cost of these studies in operating costs in the year in which they were incurred. In 2008, there were no additions (2007 - \$0.2 million) and \$0.2 million (2007 - \$0.1 million) of amortization was recognized in operating and administration expenses.

**Deferred Purchased Power Savings**

In 1997, Hydro interconnected communities in the area of L'Anse au Clair to Red Bay to the Hydro-Québec system. In its report dated July 12, 1996, the PUB recommended that Hydro defer the benefits of a reduced initial purchased power rate, to be amortized over a 30-year period. These savings in the amount of \$0.6 million (2007 - \$0.7 million) are recognized as a regulatory liability. In the absence of rate regulation, generally accepted accounting principles would require that Hydro include the actual cost of purchased power in operating costs in the year in which they were incurred.

**Property, Plant and Equipment**

The PUB permits an allowance for funds used during construction ("AFUDC"), based on Hydro's weighted average cost of capital, to be included in the cost of capital assets and amortized over future periods as part of the total cost of the related asset. In 2008, Hydro's AFUDC of 7.6% is higher than its cost of debt of 7.3% the amount capitalized is higher and interest expense is lower by \$0.4 million than that which would be permitted in the absence of rate regulation. In 2007, Hydro's AFUDC of 7.6% is lower than its cost of debt of 8.0%, the amount capitalized is lower and interest expense is higher by \$0.3 million than that which would be permitted in the absence of rate regulation (Note 15).

Hydro amortizes its hydroelectric generating assets and transmission assets using the sinking fund method, as approved by the PUB. In the absence of rate regulation, these assets would likely be amortized using the straight-line method.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**5. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

During 2005 Hydro engaged an independent consultant to conduct an amortization study. The scope of this study included a review of Hydro's amortization methods as well as a statistical analysis of service life estimates and calculation of appropriate amortization rates and annual and accrued amortization balances as at December 31, 2004. Based on the results of this study, management currently estimates that accumulated amortization is approximately \$170.0 million - \$180.0 million lower than it would otherwise be, and annual amortization expense is \$10.0 million - \$11.0 million lower, primarily due to the use of sinking fund rather than straight line amortization for hydroelectric and transmission assets. An update to this study began in 2008 and is presently ongoing.

**6. LONG-TERM RECEIVABLES**

Included in long-term receivables are two refundable deposits in the amount of \$25.4 million (2007 - \$23.3 million) associated with an application for transmission service into Québec, bearing interest at prime until April, 2007 and at one year Guaranteed Income Certificate ("GIC") rates thereafter.

**7. INVESTMENTS**

<i>(millions of dollars)</i>	Ownership Interest	2008	2007
Churchill Falls (Labrador) Corporation	65.80%		
Shares, at cost	167.2	167.2	
Equity in retained earnings at beginning of year	183.3	171.0	
Equity in net income for the year	11.8	15.6	
Dividends for the year	(2.5)	(3.3)	
	<u>359.8</u>	350.5	(a)
Lower Churchill Development Corporation Limited	51.00%	-	2.7 (b)
Gull Island Power Company Limited	100.00%	-	- (c)
	<u>359.8</u>	<u>353.2</u>	

(a) A portion of Hydro's shareholding in Churchill Falls (Labrador) Corporation ("Churchill Falls") was deposited in a voting trust pursuant to an agreement with Hydro-Québec in relation to Churchill Falls' General Mortgage Bonds. Effective February 25, 2008, the bonds were retired removing the requirement for the shares to be held in trust.

Effective June 18, 1999, the two shareholders of Churchill Falls, Hydro and Hydro-Québec, entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of Churchill Falls be subject to approval jointly by representatives of Hydro and Hydro-Québec.

(b) The Lower Churchill Development Corporation Limited ("LCDC") was established with the objective of developing all or part of the hydroelectric potential of the Lower Churchill River ("Lower Churchill Development") in Labrador.

Hydro, the designate for the Province's shareholding in LCDC, holds 1,540 Class A common shares of LCDC. Five hundred and twenty shares were acquired in 1979 pursuant to the signing of an Option Agreement between LCDC and the Province, dated November 24, 1978. Five hundred and ten shares were acquired in each of the years 1980 and 1981, by way of capital contributions from the Province. On November 20, 2008, LCDC was advised by the Province that it would not be extending the Option Agreement. As a consequence LCDC's option expired on November 24, 2008, which had the effect of terminating the Option Agreement and Hydro's share of this agreement in the amount of \$2.7 million was expensed as a write-down of assets in the current year.

**NEWFOUNDLAND AND LABRADOR HYDRO**

**7. INVESTMENTS (cont'd.)**

(c) Gull Island Power Company Limited ("GIPCo.") is incorporated under the laws of Canada. Its objective was to develop the hydroelectric potential at Gull Island on the Lower Churchill River in Labrador, and construct a direct current transmission system from Labrador to the island of Newfoundland ("Gull Island Project"). All project costs were funded by way of capital contributions from the Province. Hydro suspended all work on the Gull Island Project in 1976, in the absence of satisfactory arrangements for the financing of the project and the marketing of available power.

**8. LONG-TERM DEBT**

Series (millions of dollars)	Face Value	Coupon Rate %	Year of Issue	Year of Maturity	
				2008	2007
AA	200.0	5.50	1998	2008	- 199.9
V	125.0	10.50	1989	2014	<b>124.5</b> 124.4 (a)

AB	300.0	6.65	2001	2031	<b>306.9</b> 307.1 (a)
AD	125.0	5.70	2003	2033	<b>123.5</b> 123.5 (a)
AE	225.0	4.30	2006	2016	<b>223.5</b> 223.3
Total debentures	1,425.0			<b>1,220.4</b>	1,419.9
Less sinking fund investments in own debentures				<b>65.9</b>	60.8
				<b>1,154.5</b>	1,359.1
Other				<b>0.2</b>	0.3
				<b>1,154.7</b>	1,359.4
Less payments due within one year				<b>8.3</b>	208.3
				<b>1,146.4</b>	1,151.1

(a) Sinking funds have been established for these issues.

Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada or any province of Canada, and have maturity dates ranging from 2013 to 2033. Hydro debentures which Management intends to hold to maturity are deducted from long-term debt while all other sinking fund investments are shown separately on the balance sheet as assets. Annual contributions to the various sinking funds are as per bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 4.50% to 9.86% (2007 - 4.50% to 9.86%).

Promissory notes, debentures and long-term loans are unsecured and unconditionally guaranteed as to principal and interest and where applicable, sinking fund payments, by the Province. The Province charges Hydro a guarantee fee of one percent annually on the total debt (net of sinking funds) guaranteed by the Province, outstanding as of the preceding December 31. The guarantee fee for 2008 was waived by the Province.

Hydro uses promissory notes to fulfill its short-term funding requirements. At year-end the promissory notes outstanding were at interest rates ranging from 1.40% to 2.90% (2007 - 4.30% to 4.45%).

Hydro maintains a \$50.0 million Canadian or US equivalent unsecured operating credit facility with its banker and at year-end there were no amounts drawn on the facility (2007 - nil). Advances may take the form of a prime rate advance or the issuance of a Bankers' Acceptance ("BA") with interest calculated at the prime rate or prevailing Government BA fee. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the prime rate. At year-end, Hydro had two letters of credit outstanding (Note 17(d)) reducing the availability of the credit facility by \$7.5 million.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**8. LONG-TERM DEBT (cont'd)**

Required repayments of long-term debt and sinking fund requirements over the next five years will be as follows:

<i>(millions of dollars)</i>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>	<b>2013</b>
Sinking fund requirements	8.2	8.2	8.2	8.2	8.2
Long-term debt repayments	0.1	-	-	-	-
	<b>8.3</b>	<b>8.2</b>	<b>8.2</b>	<b>8.2</b>	<b>8.2</b>

**9. EMPLOYEE FUTURE BENEFITS**

**Pension Plan**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions of \$3.8 million (2007 - \$3.8 million) are expensed as incurred.

**Other Benefits**

Additionally, Hydro provides group life insurance and healthcare benefits on a cost-shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2008, cash payments to beneficiaries for its unfunded other employee future benefits was \$2.2 million (2007 - \$1.9 million). The most recent actuarial valuation was performed as at December 31, 2006 with an extrapolation of the December 31, 2006 valuation to December 31, 2008. The next actuarial valuation will be performed as at December 31, 2009.

<i>(millions of dollars)</i>	<b>2008</b>	<b>2007</b>
Accrued benefit obligation		
Balance at beginning of year	<b>57.8</b>	57.1
Transfer to Nalcor Energy	(1.4)	-

**9. EMPLOYEE FUTURE BENEFITS (cont'd.)**

The significant actuarial assumptions used in measuring the company's accrued benefit obligations and benefit expense are as follows:

	<b>2008</b>	2007
Discount rate	7.5%	5.5%
Rate of compensation increase	3.5%	3.5%

Assumed health care trend rates:

	<b>2008</b>	2007
Initial health care expense trend rate	7.0%	8.0%
Cost trend decline to	5.0%	5.0%
Year that rate reaches the rate it is assumed to remain at	2011	2011

A 1% increase in assumed health care trend rates would have had the following effect:

<i>(millions of dollars)</i>	<b>2008</b>	2007
Current service and interest cost	1.0	1.0
Accrued benefits obligation	5.8	10.0

A 1% decrease in assumed health care trend rates would have had the following effect:

<i>(millions of dollars)</i>	<b>2008</b>	2007
Current service and interest cost	(0.6)	(0.7)
Accrued benefits obligation	(4.6)	(7.7)

**10. SHAREHOLDER'S EQUITY**

**Share Capital**

<i>(millions of dollars)</i>	<b>2008</b>	2007
Common shares of par value \$1 each Authorized 25,000,000 shares; issued 22,503,942 shares	<u>22.5</u>	<u>22.5</u>

**Contributed Capital**

<i>(millions of dollars)</i>	<b>2008</b>	2007
Total contributed capital	<u>15.4</u>	<u>17.6</u>

The contributed capital related to the Muskrat Falls project was transferred to Nalcor as at December 31, 2008 pursuant to the Transfer Agreement (Note 18(d)).

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**11. CAPITAL MANAGEMENT**

Hydro's primary objectives when managing capital are to minimize Hydro's cost of capital within the confines of established risk parameters, and to safeguard Hydro's ability to continue as a going concern. Hydro requires access to capital due to the capital intensive nature of the business which is required to ensure the continued delivery of safe and reliable service to its customers.

The capital managed by Hydro is composed of debt (long-term debentures, promissory notes, bank credit facilities and bank indebtedness) and equity (share capital, contributed capital, accumulated other comprehensive income and retained earnings).

Hydro's approach to capital management encompasses various factors including monitoring the percentage of floating rate debt in the total debt portfolio, the weighted average term to maturity of its overall debt portfolio, its percentage of debt to debt plus equity and its earnings before interest and taxes ("EBIT") coverage of interest. Adjustments to the capital structure are accomplished through adjustments to the amount of dividends paid to the shareholder, cash infusion via contributed equity, new debt issuance or debt issuance with differing characteristics.

Hydro's goal is to achieve a capital structure and cash flows to support debt. A summary of the capital structure is outlined below:

<i>(millions of dollars)</i>	<b>2008</b>	<b>2007</b>
<b>Debt</b>		
Long-term debt	<b>1,146.4</b>	1,151.1
Current portion of long-term debt	8.3	208.3
Promissory notes	163.0	7.0
Sinking funds	<b>(163.9)</b>	<b>(151.8)</b>
	<b>1,153.8</b>	65.9%
	<b>1,214.6</b>	64.2%
<b>Equity</b>		
Share capital	22.5	22.5
Contributed capital	15.4	17.6
Accumulated other comprehensive income	15.9	19.5
Retained earnings	<b>544.3</b>	<b>618.1</b>
	<b>598.1</b>	34.1%
	<b>677.7</b>	35.8%
<b>Total debt and equity</b>	<b>1,751.9</b>	<b>1,892.3</b>
	<b>100.0%</b>	<b>100.0%</b>

**12. ACCUMULATED OTHER COMPREHENSIVE INCOME**

Changes in the fair market value of sinking fund investments designated as available for sale constitute the sole item in Accumulated Other Comprehensive Income.

<i>(millions of dollars)</i>	<b>2008</b>	<b>2007</b>
Balance, beginning of year	<b>19.5</b>	-
Adjustment due to the adoption of new accounting policies	-	19.3
Change in fair value of sinking fund investments	<b>(3.6)</b>	0.2
Balance, end of year	<b>15.9</b>	19.5

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**Financial Instruments**

Hydro has classified its financial instruments as follows:

Cash and cash equivalents	Held-for-trading
Short-term investments	Held-to-maturity
Accounts receivable	Loans and receivables
Sinking funds - investments in same Hydro issue	Held-to-maturity
Sinking funds - other investments	Available for sale
Long-term receivable	Loans and receivables
Bank indebtedness	Other liabilities
Accounts payable and accrued liabilities	Other liabilities
Promissory notes	Other liabilities
Long-term debt	Other liabilities
Due to related parties	Other liabilities

Each of these financial instruments is measured at amortized cost, except sinking funds - other investments and cash and cash equivalents which are measured at fair value.

In 2007, Hydro recognized an increase to opening retained earnings of \$2.3 million resulting from the measurement of outstanding long-term debt at amortized cost, using the effective interest method. As well, Hydro recognized an opening balance of accumulated other comprehensive income arising from unrealized gains on sinking fund investments of \$19.3 million.

**Fair Value**

The estimated fair values of financial instruments as at December 31 are based on relevant market prices and information available at the time. The fair value of long-term debt is estimated based on the quoted market price for the same or similar debt instruments. The fair value estimates below are not necessarily indicative of the amounts that Hydro might receive or incur in actual market transactions. As a significant number of Hydro's assets and liabilities, including fuels and supplies and property, plant and equipment, do not meet the definition of financial instruments, the fair value estimates below do not reflect the fair value of Hydro as a whole.

	Carrying Value	Fair Value	Carrying Value	Fair Value
(millions of dollars)		2008		2007
Financial Liabilities				
Long-term debt including amount due within one year	1,154.7	1,454.5	1,359.4	1,691.4

Transaction costs related to financial assets and financial liabilities are included as part of the cost of the instrument, with the exception of cash and cash equivalents which are expensed as incurred, based upon the pricing obtained during the quotation process. Discounts and premiums on financial instruments are amortized to income over the life of the instrument.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management**

Exposure to credit risk, liquidity risk and market risk arises in the normal course of Hydro's business.

**(a) Credit Risk**

Hydro is exposed to credit risk in the event of non performance by counterparties to its financial instruments. The majority of Hydro's receivables are from regulated utilities which minimizes credit risk. There is risk that Hydro will not be able to collect all of its remaining accounts receivable and amounts owing under its customer finance plans. These financial instruments which arise in the normal course of business do not represent a significant concentration of credit risk as amounts are owed by a large number of customers on normal credit terms. Hydro manages this credit risk primarily by executing its credit and collection policy including the requirement for security deposits from certain customers.

Hydro manages its investment credit risk exposure by restricting its investments to high quality securities such as Canada Treasury Bills, Bankers' Acceptances drawn on Schedule 1 Canadian Chartered Banks and Term Deposits issued by Schedule 1 Canadian Chartered Banks.

**(b) Liquidity Risk**

Hydro is exposed to liquidity risk with respect to its contractual obligations and financial liabilities. Hydro manages this risk by maintaining borrowing facilities sufficient to cover both anticipated and unexpected fluctuations within the operations and by continuously monitoring cashflows. Short-term liquidity is provided through cash and cash equivalents on hand, funds from operations, a \$300 million promissory note program and a \$50 million operating credit facility. Long-term liquidity risk is managed by the issuance of a portfolio of debentures with maturity dates ranging from 2014 to 2033. Sinking funds have been established for these issues.

**(c) Market Risk**

Market risk refers primarily to the risk of loss resulting from changes in interest rates, commodity prices and foreign exchange rates.

**Interest Rates**

Interest rate risk is managed within the corporate financing strategy where floating rate debt exposures and interest rate scenarios are forecast and evaluated. A diversified portfolio of fixed and floating rate debt is maintained and managed with a view to an acceptable risk profile. Key quantitative parameters for interest rate risk management include the percentage of floating rate debt in the total debt portfolio, coupled with an examination of the weighted average term to maturity of the entire debt portfolio. By setting clear guidelines in respect to these quantitative parameters, Hydro attempts to minimize the likelihood of a material impact on net income resulting from an unexpected change in interest rates.

Exposure to changes in interest rates exists on interest expense related to the short-term debt portfolio and interest income related to the sinking fund investment portfolios. Hydro estimates that an increase of 100 basis points from the actual average yield on the short-term debt portfolio in 2008 would have resulted in a change in interest expense of \$1.3 million (2007 – \$0.2 million). Similarly, an increase of 100 basis points from the actual average yield on the sinking fund investment portfolio in 2008 would have resulted in a change in interest income of \$2.0 million (2007 – \$1.8 million) and a decrease in other comprehensive income of \$16.1 million (2007 - \$16.1 million). Interest rate risk on the long-term debt portfolio is mitigated through the use of fixed rate debentures.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

(c) Market Risk (cont'd.)

Foreign Currency and Commodity Exposure

Fair value of future cash flows of a financial instrument will fluctuate due to changes in the exchange rate between the foreign currency and the Canadian dollar. Hydro's primary exposure to both foreign exchange and commodity price risk arise from its purchases of No. 6 fuel for consumption at the HTGS.

During 2008, Hydro had total purchases of No. 6 fuel of \$103.9 million (2007 - \$122.0 million). These purchases are denominated in U.S. dollars.

Hydro's exposure to both the foreign exchange and commodity price risk associated with these purchases is mitigated through the operation of the RSP. The purpose of the RSP is to both reduce volatility in customer rates as well as mitigate potential net income volatility from fuel price and volume variations. All variances in actual fuel prices and exchange rates as compared to that approved in Hydro's most recent COS used to set rates, are captured in the RSP and are either refunded to or collected from customers via automatic rate adjustments. Hydro also employs the periodic use of forward currency contracts as a means by which exposure to exchange rates on a particular day can be avoided. As at December 31, 2008 there were no forward contracts outstanding.

**14. INTEREST EXPENSE**

<i>(millions of dollars)</i>	<b>2008</b>	<b>2007</b>

**16. SEGMENT INFORMATION**

Hydro operates in two business segments. Regulated operations encompass sales of power and energy to most customers within the province of Newfoundland and Labrador while other energy activities are primarily engaged in energy project development and sales to markets outside the province. The designation of segments has been based on regulatory status. The segment's accounting policies are the same as those described in Note 2.

<i>(millions of dollars)</i>	<b>Regulated</b>	<b>Other Energy Activities 2008</b>	<b>Total</b>

Total assets	<b>1,733.3</b>	<b>493.7</b>	<b>2,227.0</b>

In 2008, sales to Hydro's two largest customers amounted to 66.5% and 10.9% (2007 - 66.8% and 11.1%) of total energy sales revenue. At December 31, 2008 approximately 68.3% (2007 - 69.7%) of the total accounts receivable balance outstanding is due from one customer.

**Geographic Information**

Revenues by geographic area:

	2008	2007
Newfoundland and Labrador	447.9	445.1
Québec	52.6	54.1
	<b>500.5</b>	<b>499.2</b>

All of Hydro's assets are located in the Province.

**17. COMMITMENTS AND CONTINGENCIES**

(a) Hydro has received claims instituted by various companies and individuals with respect to outages and other miscellaneous matters. Although such matters cannot be predicted with certainty, management currently considers Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, to be \$0.1 million (2007 - \$1.2 million).

One of Hydro's industrial customers commenced legal proceedings in 1997, claiming approximately \$22.2 million (2007 - \$21.8 million) related to outages and plant shutdowns. Hydro is defending this claim and Management believes that this claim will not be successful.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**17. COMMITMENTS AND CONTINGENCIES (cont'd.)**

(b) Outstanding commitments for capital projects total approximately \$6.2 million (2007 - \$16.5 million).

(c) Hydro has entered into a number of long-term power purchase agreements as follows:

Type	Rating	In-Service Date	Term
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	4 MW	1998	25 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2009	20 years

During 2008, the enactment of the Abitibi-Consolidated Rights and Assets Act resulted in the cancellation of two long-term power purchase agreements (Note 20).

Estimated payments due in each of the next five years are as follows:

<i>(millions of dollars)</i>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>	<b>2013</b>
Power purchases	25.6	26.4	29.6	30.0	30.6

(d) Hydro has issued two irrevocable letters of credit, one in the amount of \$7.2 million to New Brunswick System Operator as credit support related to application for point to point transmission service. The second letter of credit has been issued to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement.

**18. RELATED PARTY TRANSACTIONS**

The Province, Nalcor, Churchill Falls, LCDC, GIPCo and Nalcor Energy – Oil and Gas are related parties of Hydro. In addition, the PUB is related to Hydro by virtue of its status as an agency of the Province.

<i>(millions of dollars)</i>	<b>2008</b>	<b>2007</b>
Due to GIPCo.	<b>0.1</b>	0.1
Due to Churchill Falls	<b>0.5</b>	-
Due to Nalcor	<b>2.9</b>	0.1
	<b><u>3.5</u></b>	<b><u>0.2</u></b>

(a) Hydro has entered into a long-term power contract with Churchill Falls for the purchase of \$6.0 million (2007 -\$6.1 million) of the power produced by Churchill Falls.

(b) For the year ended December 31, 2008, approximately \$1.8 million (2007 - \$2.2 million) of operating costs representing charges for engineering, technical, management and administrative services were charged to Churchill Falls. These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

(c) Hydro is required to contribute to the cost of operations of the PUB as well as pay for the cost of hearings into applications it makes. During 2008, Hydro incurred \$0.6 million in costs related to the PUB (2007 - \$1.2 million) of which \$0.1 million (2007 - \$0.1 million) was included in accrued liabilities.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**18. RELATED PARTY TRANSACTIONS (cont'd.)**

(d) During 2008, certain assets and liabilities and their related debt and equity were transferred from Hydro to Nalcor Energy. Details of the transactions are noted below which resulted in a payable of \$6.1 million by Hydro to Nalcor. In June, 2008, an advance payment for these assets was made by Hydro to Nalcor resulting in a \$3.1 million liability as at December 31, 2008 which is recorded as part of Due to related parties.

<i>(millions of dollars)</i>	<b>2008</b>
Capital assets	157.2
Contributed capital	(2.2)
Employee future benefits	(0.5)
Retained earnings from non-regulated activity in Hydro	<u>(160.6)</u>
Sub total	(6.1)
Payment made in 2008	3.0
Total due to Nalcor	<u><u>(3.1)</u></u>

(e) During 2008, Nalcor advanced \$4.5 million as a contribution in aid of construction related to the Ramea Wind-Hydrogen-Diesel Project. As at December 31, 2008, \$1.7 million of this funding has not been utilized to cover the costs of the associated capital project and has been recorded as a deferred capital contribution. Hydro also received contribution in aid of construction from the Province related to wind feasibility studies. As at December 31, 2008, the full amount of \$0.5 million has been recorded as a deferred capital contribution.

(f) During 2008, Hydro received \$0.4 million (2007 - nil) as a rate subsidy for rural isolated customers from the Province and \$1.5 million (2007 - \$0.6 million) as an energy rebate to offset the cost of basic electricity consumption for Labrador rural isolated residential customers under the Northern Strategic Plan with \$0.1 million (2007 - \$0.6 million) recorded as accounts receivable at year-end.

**19. CHANGE IN ESTIMATE**

In 2007, Hydro incurred \$2.0 million in expenses to repair a turbine at HTGS and these costs were deferred as a major extraordinary repair. Pursuant to Order No. P.U. 31 (2008) the PUB denied Hydro's request to treat the repair of the turbine as a major extraordinary repair and therefore, the full cost of the repair, net of insurance proceeds of \$0.8 million, was recorded in operations and administration expense during 2008.

**20. SIGNIFICANT OCCURRENCE**

In late 2008, Abitibi-Consolidated announced the shut-down of the Grand Falls Pulp and Paper Mill resulting in the loss of a major industrial customer. Revenue from this customer for the year ended December 31, 2008 was \$5.1 million (2007 - \$4.9). The Abitibi-Consolidated Rights and Assets Act enacted on December 16, 2008 resulted in the cancellation of two power purchase agreements from two non-utility generators in which Abitibi was a partner.

**21. COMPARATIVE FIGURES**

Certain of the comparative figures have been reclassified to conform with the 2008 financial statement presentation.

## Auditors' Report

To the Lieutenant-Governor in Council  
Province of Newfoundland and Labrador

We have audited the consolidated balance sheet of Newfoundland and Labrador Hydro (the "Company") as at December 31, 2009 and the consolidated statements of income and retained earnings, comprehensive income and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles. As required by The Hydro Corporation Act, we report that, in our opinion, these principles have been applied on a basis consistent with that of the preceding year.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Presentation**

Newfoundland and Labrador Hydro (Hydro), a Nalcor Energy company, is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador (Province) as a Crown corporation and its principal activity is the development, generation and sale of electricity.

Hydro holds interests in the following subsidiaries and jointly controlled companies:

Churchill Falls (Labrador) Corporation Limited (Churchill Falls) is incorporated under the laws of Canada and owns and operates a hydroelectric generating plant and related transmission facilities situated in Labrador which has a rated capacity of 5,428 megawatts (MW) (Churchill Falls Project).

Twin Falls Power Corporation (Twin Falls) is incorporated under the laws of Canada and has developed a 225 MW hydroelectric generating plant on the Unknown River in Labrador. The plant has been inoperative since 1974.

Gull Island Power Corporation (GIPCo) is incorporated under the laws of Canada. Its objective was to develop the hydroelectric potential at Gull Island on the lower Churchill River in Labrador, and construct a direct current transmission system from Labrador to the island of Newfoundland. Lower Churchill Development Corporation (LCDC) is incorporated under the laws of Newfoundland and Labrador and was established with the objective of developing all or part of the hydroelectric potential of the lower Churchill River (lower Churchill Development). Both GIPCo and LCDC are inactive.

Hydro and its subsidiary and jointly controlled companies, other than Twin Falls, are exempt from paying income taxes under Section 149 (1) (d) of the Income Tax Act.

**Principles of Consolidation**

The Consolidated Financial Statements include the financial statements of Hydro and its subsidiary companies, GIPCo, (100% owned) and LCDC, (51% owned). Intercompany transactions and balances have been eliminated upon consolidation.

Effective June 18, 1999, Hydro, Churchill Falls and Hydro-Québec entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of Churchill Falls be subject to approval jointly by representatives of Hydro and Hydro-Québec on the Board of Directors of Churchill Falls. Although Hydro retains its 65.8% ownership interest, the agreement changed the nature of the relationship between Hydro and Hydro-Québec, with respect to Churchill Falls, from that of majority and minority shareholders, respectively, to that of joint venturers. Accordingly, Hydro has adopted the proportionate consolidation method of accounting for its interest in Churchill Falls subsequent to the effective date of the shareholders' agreement.

A portion of Hydro's shareholding in Churchill Falls was deposited in a voting trust pursuant to an agreement with Hydro-Québec, in relation to Churchill Falls' General Mortgage Bonds. Effective February 25, 2008, the bonds were retired, removing the requirement for the shares to be held in trust.

Churchill Falls holds 33.33% of the equity share capital of Twin Falls and is a party with other shareholders in a participation agreement which gives Churchill Falls joint control of Twin Falls. This investment is accounted for by the proportionate consolidation method.

**Use of Estimates**

The Consolidated Financial Statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP). Preparation of these Consolidated Financial Statements requires the use of estimates and assumptions that affect the amounts reported and disclosed in these statements and related notes. Key areas where management has made complex or subjective judgements include the fair value and recoverability of assets, the reported amounts of revenue and expenses, litigation, environmental and asset retirement obligations, amortization,

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Use of Estimates (cont'd.)**

property, plant, and equipment and other employee future benefits. Actual results may differ from these estimates, including changes as a result of future decisions made by the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB), and these differences could be material.

**Rates and Regulations (Excluding Sales by Subsidiaries)**

Hydro's revenues from its electrical sales to most customers within the Province are subject to rate regulation by the PUB. Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service (COS) methodology. The allowed rate of return on rate base is 7.4% (2008 - 7.4%). Hydro applies certain accounting policies that differ from enterprises that do not operate in a rate regulated environment. Generally these policies result in the deferral and amortization of costs or credits which will be recovered or refunded in future rates. In the absence of rate regulation these amounts would be included in the determination of net income in the year the amounts are incurred. The effects of rate regulation on the financial statements are more fully disclosed in Note 4.

**Cash and Cash Equivalents and Short-term Investments**

Cash and cash equivalents and short-term investments consist primarily of Canadian treasury bills and bankers' acceptances. Those with original maturities at date of purchase of three months or less are classified as cash equivalents whereas those with original maturities beyond three months and less than twelve months are classified as short-term investments. The short-term investments bear interest rates of 0.26% to 1.57% (2008 – 1.58% to 3.60%) per annum. Cash and cash equivalents are measured at fair value and short-term investments are measured at amortized cost.

**Fuel and Supplies**

Fuel and supplies inventories are recorded at the lower of average cost or net realizable value.

**Property, Plant and Equipment**

Property, plant and equipment is recorded at cost, which comprises materials, labour, contracted services, other costs directly related to construction and an allocation of certain overhead costs. Expenditures for additions and betterments are capitalized and normal expenditures for maintenance and repairs are charged to operations. The cost of property, plant and equipment under construction is transferred to property, plant and equipment in service when construction is completed and facilities are commissioned, at which point amortization commences.

The fair value of the future expenditures required to settle legal obligations associated with the retirement of property, plant and equipment, are recognized to the extent that they are reasonably estimable. Asset retirement obligations are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related asset retirement obligation cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is legally required to remove, an asset retirement obligation will be recognized at that time.

Contributions in aid of construction are funds received from customers and governments toward the incurred cost of property, plant and equipment, or the fair value of assets contributed. Contributions are treated as a reduction to property, plant and equipment and the net property, plant and equipment is amortized.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

Hydro

Construction in progress includes the costs incurred in preliminary feasibility studies, engineering and construction of new generation, transmission and distribution facilities. Interest is charged to construction in progress at rates equivalent to the weighted average cost of capital.

Gains or losses on the disposal of property, plant and equipment are recognized in income as incurred.

Amortization is calculated on hydroelectric generating plant and on transmission plant in service on the sinking fund method using interest factors ranging from 5.25% to 15.79%. Amortization on distribution system and other plant in service is calculated on the straight-line method. These methods are designed to fully amortize the cost of the facilities, after deducting contributions in aid of construction, over their estimated service lives.

Estimated service lives of the major assets are as follows:

Generation plant	
Hydroelectric	50, 75 and 100 years
Thermal	25 and 30 years
Diesel	20 years
Transmission	
Lines	40 and 50 years
Switching stations	40 years
Distribution system	30 years
Other	3 to 50 years

Hydroelectric generation plant includes the powerhouse, turbines, governors and generators, as well as water conveying and control structures, including dams, dykes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dykes and liners and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kilovolt (kV). Switching stations assets are used to step up voltages of electricity from generating to transmission and to step down voltages for distribution.

Distribution system assets include poles, transformers, insulators and conductors.

Other assets include telecontrol, computer software, buildings, vehicles, furniture, tools and equipment.

Churchill Falls

Churchill Falls uses the group amortization method for certain property, plant and equipment, other than the generation plant, transmission and terminals and service facilities.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

Churchill Falls (cont'd.)

Amortization is calculated on a straight-line basis over the following estimated useful lives:

Hydroelectric generation plant	67 years
Transmission and terminals	67 years
Service facilities	67 years
Other	5 to 100 years

Losses on other than normal retirements are charged to operations in the year incurred as adjustments to amortization expense.

**Impairment of Long-lived Assets**

Hydro reviews the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. An impairment loss corresponding to the amount by which the carrying value exceeds fair value is recognized, if applicable.

**Revenue Recognition**

Revenue is recognized on the accrual basis, as power deliveries are made, and includes an estimate of the value of electricity consumed by customers in the year, but billed subsequent to year-end. Sales within the Province are primarily at rates approved by the PUB. Sales to Hydro-Québec and certain major industrial customers are at rates under the terms of applicable contracts.

A power contract with Hydro-Québec (Power Contract), dated May 12, 1969, provides for the sale of substantially all the energy from the Churchill Falls Project until 2041. The Power Contract has a 40-year term to 2016 which then renews for a further term of 25 years. The rate is predetermined in the Power Contract and decreases from the existing rate of 2.5426 mills per kilowatt hour (kWh) to 2.0 mills per kWh upon renewal in 2016.

Churchill Falls receives revenues from Hydro-Québec, under a guaranteed winter availability contract (GWAC) through 2041. The GWAC provides for the sale of 682 MW of guaranteed seasonal availability to Hydro-Québec during the months of November through March in each of the remaining years until the end of the Power Contract.

The value of differences between energy delivered and the Annual Energy Base (AEB), as defined in the Power Contract, are tracked over a four-year period and then either recovered from or refunded to Hydro-Québec over the subsequent four-year period, unless the balance is less than \$1.0 million in which case it is recovered or refunded immediately. These long-term receivables or long-term payables are subject to interest at 7% per annum (2008 - 7%).

**Foreign Currency Translation**

Foreign currency transactions are translated into their Canadian dollar equivalent as follows:

- (a) At the transaction date, each asset, liability, revenue or expense is translated using exchange rates in effect at that date.
- (b) At the date of settlement and at each balance sheet date monetary assets and liabilities are adjusted to reflect exchange rates in effect at that date. Any resulting gain or loss is reflected in income.
- (c) Foreign exchange gains and losses are included in income except for unrealized gains and losses related to First Mortgage Bonds which were recoverable under the Power Contract.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Employee Future Benefits**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions are expensed as incurred.

Hydro provides group life insurance and health care benefits on a cost-shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee future benefits is accounted for on an accrual basis and has been actuarially determined using the projected benefit method prorated on service and management's best estimate of salary escalation, retirement ages of employees and expected health care costs. The excess of net cumulative actuarial gains and losses over 10% of the accrued benefit obligation is amortized over the expected average remaining service life of the employee group, which is approximately 13 years.

**Financial Instruments and Hedging Activities**

**Financial Instruments**

Financial assets and financial liabilities are recognized on the balance sheet when Hydro becomes a party to the contractual provisions of the instrument and are initially measured at fair value. Subsequent measurement is based on classification. Hydro has classified each of its financial instruments into the following categories: financial assets and liabilities held for trading; loans and receivables; financial assets held to maturity; financial assets available for sale; and other financial liabilities.

Hydro has classified its financial instruments as follows:

Cash and cash equivalents	Held-for-trading
Short-term investments	Available-for-sale
Accounts receivable	Loans and receivables
Sinking funds - investments in same Hydro issue	Held-to-maturity
Sinking funds - other investments	Available for sale
Reserve fund	Available for sale
Long-term receivable	Loans and receivables
Bank indebtedness	Other liabilities
Accounts payable and accrued liabilities	Other liabilities
Promissory notes	Other liabilities
Long-term debt	Other liabilities
Due to related parties	Other liabilities

Each of these financial instruments is measured at amortized cost, except for the reserve fund, sinking fund – other investments, cash and cash equivalents and short-term investments which are measured at fair value.

Transaction costs related to financial assets and financial liabilities are included as part of the cost of the instrument, with the exception of cash and cash equivalents and short-term investments which are expensed as incurred, based upon the pricing obtained during the quotation process. Discounts and premiums on financial instruments are amortized to income over the life of the instrument.

**Derivative Instruments and Hedging Activities**

Derivative instruments are utilized by Hydro to manage market risk. Hydro's policy is not to utilize derivative instruments for speculative purposes. Hydro may choose to designate derivative instruments as hedges and apply hedge accounting if there is a high degree of correlation between price movements in the derivative instruments and the hedged items. Hydro formally documents all hedges and the risk management objectives at the inception of the hedge. Derivative instruments that have been designated and qualify for hedge accounting are classified as either cash flow or fair value hedges.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Financial Instruments and Hedging Activities (cont'd.)**

**Derivative Instruments and Hedging Activities (cont'd.)**

Hydro has designated forward foreign exchange contracts as cash flow hedges (Note 14). In a cash flow hedge relationship, the portion of gains or losses on the hedging item that is determined to be an effective hedge is recognized in Other Comprehensive Income (OCI), while the ineffective portion is recorded in net income. The amounts recognized in OCI are reclassified in net income when the hedged item affects net income.

Hydro had no fair value hedges in place at December 31, 2009 or 2008.

**2. CHANGES IN ACCOUNTING POLICIES**

**New Accounting Policies**

Effective January 1, 2009, Hydro adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants (CICA):

**Goodwill and Intangible Assets**

Section 3064, Goodwill and Intangible Assets establishes standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets and provides more comprehensive guidance particularly with respect to internally developed intangible assets. This new standard did not have any impact on Hydro's financial results or disclosures.

**Financial Instruments**

EIC-173, Credit Risk and the Fair Value of Financial Assets and Financial Liabilities issued by the Emerging Issues Committee. This abstract requires that an entity's own credit risk (for financial liabilities) and the credit risk of the counterparty (for financial assets) should be taken into account in determining the fair value of financial assets and financial liabilities, including derivative instruments. The adoption of this abstract did not have a material impact on Hydro's Consolidated Financial Statements.

Hydro also adopted the changes made by the CICA to Section 3862, Financial instruments – Disclosures whereby an entity shall classify and disclose fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy shall have the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. The required disclosures are included in Note 14.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**2. CHANGES IN ACCOUNTING POLICIES (cont'd.)**

**Future Accounting Changes**

**International Financial Reporting Standards (IFRS)**

In October 2009, the Accounting Standards Board (AcSB) issued a third and final Omnibus Exposure Draft confirming that publically accountable enterprises in Canada will be required to apply IFRS in full and without modification, for interim and annual financial statements for fiscal years beginning on or after January 1, 2011. Accordingly, starting in 2011, Hydro will present its financial statements in accordance with IFRS, and will be required to present restated comparative information for its year-ended December 31, 2010 balances, and will also restate its opening balance sheet as at January 1, 2010.

Hydro is continuing to assess the financial reporting impacts of the adoption of IFRS, however, the impact of these differences on Hydro's future financial position and results of operations are not reasonably estimable or determinable at this time. Hydro does anticipate a significant increase in disclosure resulting from the adoption of IFRS and is continuing to assess the level of disclosure required as well as any system changes that may be necessary to compile and process the information.

The International Accounting Standards Board (IASB) project schedule had indicated that a final standard on rate-regulated activities would be released in the second quarter of 2010. Commentary received on the Exposure Draft, and the resulting activities now planned by the IASB, creates uncertainty as to if and when a final standard will be released. If a final standard is released, it may not be until late 2011. Accordingly, Hydro is unable to conclude on the impact, if any, of differences that will apply to accounting for rate-regulated activities under IFRS versus Canadian GAAP.

Deferred purchased power savings	<b>0.6</b>	0.6	17.5
Total regulatory liabilities	<b>122.6</b>	53.8	
Less: current portion	<b>89.8</b>	22.3	
	<b>32.8</b>	31.5	

Regulatory assets represent future revenues associated with certain costs, incurred in current or prior periods that are expected to be recovered from customers in future periods through the rate-setting process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are expected to be refunded to customers as a result of the rate-setting process. The risks and uncertainties related to regulatory assets and liabilities are subject to periodic assessment. When Hydro considers that the value of these regulatory assets or liabilities is no longer likely to be recovered or repaid through future rate adjustments, the carrying amount is reflected in operations. The following is a description of each of the circumstances in which rate regulation affects the accounting for a transaction or event.

**Rate Stabilization Plan and Related Long-term Receivable**

On January 1, 1986, Hydro, having received the approval of the PUB, implemented a rate stabilization plan (RSP) which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, levels of precipitation and load. Adjustments required in retail rates to cover the amortization of the balance in the plan are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

Pursuant to Order No. P.U. 7 (2002-2003) and Order No. P.U. 40 (2003), RSP balances which accumulated prior to December 31, 2003, were converted to a long-term receivable bearing interest at the weighted average cost of capital to be recovered over a four-year period, which commenced in 2004. The recovery period for industrial customers ended on December 31, 2007 and for the utility customers on June 30, 2008. Any remaining balances were transferred to the current plan. Any subsequent balances accumulating in the RSP, including financing charges, are to be recovered in the following year, with the exception of hydraulic variation, which will be recovered or refunded at a rate of twenty-five percent of the outstanding balance at year-end. Additionally, a fuel rider is calculated annually based on the forecast fuel price and is added to or subtracted from the rates that would otherwise be in effect.

Hydro recognizes the RSP balances as a regulatory asset or liability based on the expectation that rates will be adjusted annually to provide for the collection from, or refund to, customers in future periods. In the absence of rate regulation, Canadian GAAP would require that the cost of fuel be recognized as an operating expense in the period in which it was consumed. In 2009, \$42.3 million was recognized (2008 - \$9.1 million) in the RSP and \$18.3 million (2008 - \$14.9 million) was recovered through rates and included in energy sales, with the corresponding cost amortized in fuels expenses.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**4. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)**

**Foreign Exchange Losses**

Hydro incurred foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt in 1975 and 1985, respectively, which were recognized when the debt was repaid in 1997. The PUB has accepted the inclusion of realized foreign exchange losses related to long-term debt in rates charged to customers in future periods. Any such loss, net of any gain, is deferred to the time of the next rate hearing for inclusion in the new rates to be set at that time. Accordingly, these losses are recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include the losses in operating costs, in each year that the related debt was outstanding, to reflect the exchange rates in effect on each reporting date.

Commencing in 2002, the PUB ordered Hydro's deferred realized foreign exchange losses be amortized over a forty-year period. This amortization, of \$2.2 million annually, is included in interest expense (Note 15).

**Deferred Regulatory Costs**

Pursuant to Order No. P.U. 8 (2007), the PUB approved the deferral and amortization of external costs associated with Hydro's 2006 General Rate Application in the amount of \$0.6 million. These costs are recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include these costs in operating costs in the year incurred. In 2009, \$0.2 million (2008 - \$0.2 million) of amortization was recognized in operations and administration expense.

**Deferred Major Extraordinary Repairs**

In its report dated April 13, 1992, the PUB recommended that Hydro adopt a policy of deferring and amortizing the costs of major extraordinary repairs in excess of \$500,000, subject to PUB approval on a case-by-case basis. In 2005, Hydro started an asbestos abatement program at the Holyrood Thermal Generating Station (HTGS). This program was carried out over a three-year period. Pursuant to Order No. P.U. 2 (2005), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, the costs incurred in each year of the program were recognized as a regulatory asset to be amortized over the subsequent five-year period. In 2006, Hydro incurred \$2.3 million in expenses to repair a boiler tube failure at the HTGS. Pursuant to Order No. P.U. 44 (2006), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, these costs are being amortized over a five-year period. In 2007, \$2.0 million of expenses related to a turbine failure were deferred as a major extraordinary repair. This amount, net of insurance proceeds, was expensed in 2008. In the absence of rate regulation, Canadian GAAP would require that Hydro expense the cost of the asbestos abatement program and the boiler tube repairs in the year incurred. In 2009, \$2.7 million (2008 - \$2.7 million) of amortization was recognized in operations and administration expense.

**Deferred Study Costs**

Pursuant to Order No. P.U. 14 (2004), the PUB directed Hydro to conduct an independent study of the treatment of Newfoundland Power's generation in Hydro's COS, and an independent marginal cost study, and to accumulate these costs in a deferral account to be dealt with at the next general rate application. Pursuant to Order No. P.U. 8 (2007), Hydro received approval for recovery of these costs over a three year period commencing in 2007. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include the cost of these studies in operating costs in the year incurred. In 2009 there were no additions (2008 - nil) and \$0.1 million (2008 - \$0.2 million) of amortization was recognized in operating and administration expense.

**Deferred Wind Power Costs**

Pursuant to Order No. P.U. 20 (2008), the PUB agreed to allow Hydro to defer \$0.5 million in costs associated with connecting the wind farms at St. Lawrence and Fermeuse to the Island Interconnected Grid through Newfoundland Power's transmission system and, accordingly, these costs have been recognized as a regulatory asset. These costs were expensed in 2009. In the absence of rate regulation, Canadian GAAP would require that Hydro include these costs in operating costs in the year incurred.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**4. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION (cont'd.)**

**Deferred Energy Conservation Costs**

Pursuant to Order No. P.U. 8 (2007), Hydro received approval to defer costs associated with an electrical conservation program for residential, industrial, and commercial sectors and, accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include this program as operating costs in the year incurred. In 2009, \$0.2 million (2008 – nil) was deferred.

**Deferred Purchased Power Savings**

In 1997, Hydro interconnected communities in the area of L'Anse au Clair to Red Bay to the Hydro-Québec system. In its report dated July 12, 1996, the PUB recommended that Hydro defer the benefits of a reduced initial purchased power rate, to be amortized over a 30-year period. These savings in the amount of \$0.6 million (2008 - \$0.6 million) are recognized as a regulatory liability. In the absence of rate regulation, Canadian GAAP would require that Hydro include the actual cost of purchased power in operating costs in the year incurred.

**Property, Plant and Equipment**

The PUB permits an allowance for funds used during construction (AFUDC), based on Hydro's weighted average cost of capital, to be included in the cost of capital assets and amortized over future periods as part of the total cost of the related asset. In 2009, Hydro's AFUDC of 7.6% was higher than its cost of debt of 7.2%, the amount capitalized higher and interest expense lower by \$0.1 million than that which would have been permitted in the absence of rate regulation. In 2008, Hydro's AFUDC of 7.6% was higher than its cost of debt of 7.3%, the amount capitalized higher and interest expense lower by \$0.4 million than that which would have been permitted in the absence of rate regulation (Note 15).

Hydro amortizes its hydroelectric generating assets and transmission assets using the sinking fund method, as approved by the PUB. In the absence of rate regulation, these assets would likely be amortized using the straight-line method. During 2005, Hydro engaged an independent consultant to conduct an amortization study. The scope of this study included a review of Hydro's amortization methods as well as a statistical analysis of service life estimates and calculation of appropriate amortization rates and annual and accrued amortization balances as at December 31, 2004. Based on the results of this study, management currently estimates that accumulated amortization is approximately \$170.0-\$180.0 million lower than it would otherwise be and annual amortization expense is \$10.0-\$11.0 million lower, primarily due to the use of sinking fund rather than straight-line amortization for hydroelectric and transmission assets. A more recent study indicated that the amounts could be significantly higher. An update to this study is to be completed in 2010.

**5. LONG-TERM RECEIVABLES**

Long-term receivables consist of two refundable deposits in the amount of \$23.9 million (2008 - \$25.4 million) associated with an application for transmission service into Québec, bearing interest at one year Guaranteed Income Certificate (GIC) rates. The remaining portion of \$0.8 million (2008 – \$1.3 million) is a long-term receivable from Hydro-Québec, bearing interest at 7.0%.

**6. INVESTMENTS**

<i>(millions of dollars)</i>	<b>2009</b>	<b>2008</b>
Lower Churchill Development Corporation Limited	-	-

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**6. INVESTMENTS (cont'd.)**

LCDC was incorporated in 1978 pursuant to the provisions of an agreement (Principal Agreement), between the Province and the Government of Canada. The Province and the Government of Canada own equity interests of 51% and 49% of LCDC, respectively. The Principal Agreement provides that future issues of Class A common shares shall preserve, as closely as possible, this ratio of beneficial ownership. Hydro is the designate for the Province's shareholding in LCDC.

Pursuant to the provisions of the Principal Agreement, the Province agreed to enter into an Option Agreement, dated November 24, 1978, with LCDC in respect of the GIPCo assets and the hydroelectric development rights to the lower Churchill River, (the Water Rights). In consideration of the option granted from the Province, LCDC issued 520 Class A common shares to Hydro valued at \$5.2 million.

The option provided that, upon agreement to continue with the Project, LCDC would have acquired the GIPCo assets for \$94.8 million (\$100.0 million less the amount of \$5.2 million representing the shares issued pursuant to the signing of the Option Agreement). A 10% convertible demand debenture in the amount of \$94.8 million would have been issued as consideration for the GIPCo assets, and LCDC would have acquired the Water Rights from the Province with the consideration having been the issue of 3,000 Class B common shares without nominal or par value.

On November 20, 2008, LCDC was advised by the Province that it would not be extending the Option Agreement. As a consequence, LCDC's option expired on November 24, 2008, which had the effect of terminating the Option Agreement. Hydro's share of the option in the amount of \$2.7 million was expensed as an asset write-down in 2008 and the liability to the Government of Canada for non-controlling interest in the amount of \$2.5 million was eliminated.

Hydro holds 1,540 Class A common shares of LCDC which have a stated value of \$10,000 each. 520 shares were acquired in 1979 pursuant to signing of the Option Agreement and 510 shares were acquired in each of the years 1980 and 1981, by way of capital contributions from the Province.

**7. JOINT VENTURE**

The following amounts included in the Consolidated Financial Statements represent Hydro's proportionate share of Churchill Falls' assets and liabilities at December 31, 2009, and its proportionate interest in Churchill Falls' operations for the year then ended.

<i>(millions of dollars)</i>	<b>2009</b>	<b>2008</b>
Current assets	<b>45.7</b>	35.1
Long-term assets	<b>374.5</b>	372.8
Current liabilities	<b>38.8</b>	10.2
Long-term liabilities	<b>12.7</b>	38.0
Revenues	<b>57.4</b>	65.4
Expenses	<b>50.9</b>	51.6

Less: payments due within one year					<b>8.2</b>	8.3
					<b>1,141.6</b>	<b>1,146.4</b>

\* Sinking funds have been established for these issues.

Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada or any province of Canada, and have maturity dates ranging from 2014 to 2033. Hydro debentures, which management intends to hold to maturity, are deducted from long-term debt while all other sinking fund investments are shown separately on the balance sheet as assets. Annual contributions to the various sinking funds are as per bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 4.50% to 9.86% (2008 - 4.50% to 9.86%).

Promissory notes, debentures and long-term loans are unsecured and unconditionally guaranteed as to principal and interest and, where applicable, sinking fund payments, by the Province. The Province charges Hydro a guarantee fee of one percent annually on the total debt (net of sinking funds) guaranteed by the Province, outstanding as of the preceding December 31. During 2008 and 2009, the guarantee fee was waived by the Province.

Hydro uses promissory notes to fulfill its short-term funding requirements. As at December 31, 2009 there were no promissory notes outstanding (2008 - \$163.0 million).

Hydro maintains a \$50.0 million Canadian or US equivalent unsecured operating credit facility with its banker and at year-end there were no amounts drawn on the facility (2008 - nil). Advances may take the form of a Prime Rate advance or the issuance of a Bankers' Acceptance (BA) with interest calculated at the Prime Rate or prevailing Government BA fee. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the Prime Rate. At year-end, Hydro had two letters of credit outstanding (Note 18(g)) reducing the availability of the credit facility by \$7.5 million. In February 2010, Hydro issued 22 additional letters of credit, see Note 21.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**8. LONG-TERM DEBT (cont'd.)**

**Hydro (cont'd.)**

Required repayments of long-term debt and sinking fund requirements over the next five years will be as follows:

<i>(millions of dollars)</i>	2010	2011	2012	2013	2014
Sinking fund requirements	8.2	8.2	8.2	8.2	8.2
Long-term debt repayment	-	-	-	-	125.0
	<u>8.2</u>	<u>8.2</u>	<u>8.2</u>	<u>8.2</u>	<u>133.2</u>

**Churchill Falls**

<i>(millions of dollars)</i>	2009	2008
Bank of Nova Scotia Credit Agreement		
4.4% due December 15, 2010		
Outstanding	<u>29.3</u>	30.1
Due within one year	<u>29.3</u>	0.8
Total long-term debt	<u>-</u>	<u>29.3</u>

**Refinancing**

On February 25, 2008 Churchill Falls completed a refinancing of the General Mortgage Bonds. The General Mortgage Bonds, bearing an interest rate of 7.5% (6.0% net of subsidies) were retired and replaced with a 4.4% fixed rate credit agreement with The Bank of Nova Scotia. Principal repayment terms of the new credit agreement are the same as those required by the General Mortgage Bonds which provided for semi-annual payments in an amount equal to 1.0% of the aggregate principal amount outstanding on January 1 preceding each payment date with a final principal payment due in 2010.

**Repayment of Long-term Debt**

Long-term debt repayments over the next five years are as follows:

<i>(millions of dollars)</i>	2010	2011	2012	2013	2014
	29.3	-	-	-	-

**Dividend Restriction**

Under the terms of the long-term debt instruments, Churchill Falls may pay cash dividends only out of earnings, as defined, accumulated from September 1, 1976. A shareholders' agreement signed in June 1999 places additional restrictions on dividends based on cash flow.

**Operating Credit Facility**

Churchill Falls maintains a \$10.0 million Canadian unsecured operating credit facility with its banker. Advances may take the form of a Prime Rate advance or the issuance of a BA with interest calculated at the Prime Rate or prevailing Government BA Fee. The facility provides coverage for overdrafts on Churchill Falls' bank accounts, with interest calculated at the Prime Rate. At year-end, Churchill Falls had a letter of credit outstanding (Note 18(g)) reducing the availability of the credit facility by \$0.7 million.

**9. LONG-TERM PAYABLE**

The long-term payable to Hydro-Québec as at December 31, 2009 represents the accumulation of differences between energy delivered monthly and the AEB energy billed monthly, which will be tracked during the four-year period from September 1, 2008 to August 31, 2012. Currently, the full amount of \$4.3 million (2008 – \$0.7 million) is long-term. The final amount will be determined on August 31, 2012 and will be paid/collected monthly beginning September 2012 and ending August 2016.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**10. EMPLOYEE FUTURE BENEFITS**

**Pension Plan**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions of \$4.6 million (2008 - \$4.6 million) are expensed as incurred.

**Other Benefits**

Additionally, Hydro provides group life insurance and healthcare benefits on a cost-shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2009, cash payments to beneficiaries for its unfunded other employee future benefits was \$2.7 million (2008 - \$3.0 million). An actuarial valuation was performed December 31, 2009.

<i>(millions of dollars)</i>	<b>2009</b>	<b>2008</b>
Accrued benefit obligation		
Balance at beginning of year	<b>51.1</b>	68.6
Transfer to Nalcor Energy	<b>(0.5)</b>	(1.4)
Current service cost	<b>1.4</b>	2.1
Interest cost	<b>3.8</b>	3.7
Actuarial loss (gain)	<b>16.5</b>	(18.9)
Benefits paid	<b>(2.7)</b>	(3.0)
Balance at end of year	<b>69.6</b>	<b>51.1</b>
Plan deficit	<b>69.6</b>	51.1
Unamortized actuarial loss	<b>(17.0)</b>	(0.5)
Unamortized past service cost	<b>(0.2)</b>	(0.2)
Transfer to Nalcor Energy	<b>-</b>	(0.5)
Accrued benefit liability at end of year	<b>52.4</b>	<b>49.9</b>

<i>(millions of dollars)</i>	<b>2009</b>	<b>2008</b>
Components of benefit cost		
Current service cost	<b>1.4</b>	2.1
Interest cost	<b>3.8</b>	3.7
Actuarial loss (gain)	<b>16.5</b>	(18.9)
	<b>21.7</b>	(13.1)
Difference between actual actuarial (gain) loss and amount recognized	<b>(16.5)</b>	<b>20.0</b>
Benefit expense	<b>5.2</b>	<b>6.9</b>

The significant actuarial assumptions used in measuring the accrued benefit obligations and benefit expense are as follows:

	<b>2009</b>	<b>2008</b>
Discount rate – benefit cost	<b>7.5%</b>	5.5%
Discount rate – accrued benefit obligations	<b>6.5%</b>	7.5%
Rate of compensation increase	<b>3.5%</b>	3.5%

Assumed healthcare trend rates:

	<b>2009</b>	<b>2008</b>
Initial healthcare expense trend rate	<b>7.5%</b>	7.0%
Cost trend decline to	<b>5.0%</b>	5.0%
Year that rate reaches the rate it is assumed to remain at	<b>2014</b>	2011

During 2009, Nalcor contributed capital of \$100.0 million (2008 – nil).

**12. CAPITAL MANAGEMENT**

**Hydro**

Hydro's primary objectives when managing capital are to minimize Hydro's cost of capital within the confines of established risk parameters, and to safeguard Hydro's ability to continue as a going concern. Hydro requires access to capital due to the capital intensive nature of the business which is required to ensure the continued delivery of safe and reliable service to its customers.

The capital managed by Hydro is comprised of debt (long-term debentures, promissory notes, bank credit facilities and bank indebtedness) and equity (share capital, contributed capital, accumulated other comprehensive income and retained earnings).

Hydro's approach to capital management encompasses various factors including monitoring the percentage of floating rate debt in the total debt portfolio, the weighted average term to maturity of its overall debt portfolio, its percentage of debt to debt plus equity and its earnings before interest and taxes (EBIT) coverage of interest. Adjustments to the capital structure are accomplished through adjustments to the amount of dividends paid to the Shareholder, cash infusion via contributed equity and new debt issuance or debt issuance with differing characteristics. Hydro's goal is to achieve a capital structure and cash flow to support debt.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**12. CAPITAL MANAGEMENT (cont'd.)**

**Hydro (cont'd.)**

A summary of the capital structure is outlined below:

<i>(millions of dollars)</i>	<b>2009</b>	<b>2008</b>
<b>Debt</b>		
Bank Indebtedness	-	1.6
Long-term debt	<b>1,141.6</b>	1,175.7
Current portion of long-term debt	<b>37.5</b>	9.1
Promissory notes	-	163.0
Sinking funds	<b>(179.6)</b>	<b>(163.9)</b>
	<b>999.5</b>	<b>1,185.5</b>
	<b>57.9%</b>	<b>66.4%</b>
<b>Equity</b>

Accumulated other comprehensive income	<b>22.0</b>	16.5
Retained earnings	<b>469.9</b>	<b>448.0</b>
	<b>726.2</b>	<b>598.8</b>
	<b>42.1%</b>	<b>33.6%</b>
<b>Total debt and equity</b>	<b>1,725.7</b>	<b>1,784.3</b>
	<b>100.0%</b>	<b>100.0%</b>

**Churchill Falls**

Churchill Falls' objective when managing capital is to maintain its ability to continue as a going concern. Churchill Falls' requirements for capital in the future are expected to increase, coincident with the aging of the plant and related infrastructure. The focus of the capital management policy is to provide flexibility to ensure cash continues to be available to satisfy capital requirements. Managing the level of dividend payments is a key aspect of ensuring the availability of funding to maintain the plant and infrastructure.

At present, the capital position of Churchill Falls is weighted heavily toward equity capital (share capital and retained earnings). The only remaining long-term debt at the end of the year consisted of a loan from the Bank of Nova Scotia, the balance of which comprised less than 10% of Churchill Falls' capital structure. This loan carries the same terms of repayment as the former General Mortgage Bonds and will mature in December of 2010, with any remaining principal due at that time. Churchill Falls has the right to prepay under certain conditions and has already taken advantage of the opportunity to do so. On March 19, 2008, Churchill Falls exercised its prepayment rights under the Credit Agreement to prepay \$10.0 million in principal effective March 25, 2008. The corporate strategy is to ensure that funding is in place to extinguish the entire debt by the end of 2010 without re-financing. The capital structure is adjusted through the amount of dividends paid to shareholders.

**13. ACCUMULATED OTHER COMPREHENSIVE INCOME**

Changes in the fair value of sinking fund and reserve fund investments comprise the items in other comprehensive income.

<i>(millions of dollars)</i>	<b>2009</b>	<b>2008</b>
Balance, beginning of year	<b>16.5</b>	19.5
Change in fair value of sinking fund investments	<b>(1.1)</b>	(3.6)
Change in fair value of reserve fund investments	<b>0.4</b>	0.6
Unrealized gains on derivatives designated as cash flow hedges	<b>6.2</b>	-
Balance, end of year	<b>22.0</b>	<b>16.5</b>

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**Fair Value**

The estimated fair values of financial instruments as at December 31 are based on relevant market prices and information available at the time. The fair value of long-term debt is estimated based on the quoted market price for the same or similar debt instruments. The fair value estimates below are not necessarily indicative of the amounts that Hydro might receive or incur in actual market transactions. As a significant number of Hydro's assets and liabilities, including fuels and supplies and property, plant and equipment, do not meet the definition of financial instruments, the fair value estimates below do not reflect the fair value of Hydro as a whole.

	<b>Carrying Value</b>	<b>Fair Value</b>	<b>Carrying Value</b>	<b>Fair Value</b>
<i>(millions of dollars)</i>	<b>2009</b>		<b>2008</b>	
Financial liabilities				
Long-term debt including amount due within one year	<b>1,179.1</b>	<b>1,471.0</b>	1,184.8	1,484.8

*Establishing Fair Value*

The fair value of cash and cash equivalents, short-term investments, accounts receivable, accounts payable and accrued liabilities and due to related parties approximates their carrying values due to their short-term maturity.

The fair value of long-term debt, long-term receivables, and long-term payables are determined using the present value of future cash flows under current financing agreements, based on Hydro's current estimated borrowing rate for loans with similar terms and conditions.

*Fair Value Hierarchy*

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

Financial instruments included in Level 1 are cash and cash equivalents and short-term investments. Financial instruments included in Level 2 are the derivative instruments, the reserve fund and sinking funds – other investments. There are no financial instruments in Level 3.

**Risk Management**

Exposure to credit risk, liquidity risk and market risk arises in the normal course of Hydro's business.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management (cont'd.)**

Hydro

**(a) Credit Risk**

Hydro is exposed to credit risk in the event of non performance by counterparties to its financial instruments. The majority of Hydro's receivables are from regulated utilities which minimizes credit risk. There is risk that Hydro will not be able to collect all of its remaining accounts receivable and amounts owing under its customer finance plans. These financial instruments which arise in the normal course of business do not represent a significant concentration of credit risk as amounts are owed by a large number of customers on normal credit terms. Hydro manages this credit risk primarily by executing its credit and collection policy including the requirement for security deposits from certain customers.

Hydro manages its investment credit risk exposure by restricting its investments to high quality securities such as Canada Treasury Bills, Bankers' Acceptances drawn on Schedule 1 Canadian Chartered Banks and Term Deposits issued by Schedule 1 Canadian Chartered Banks.

**(b) Liquidity Risk**

Hydro is exposed to liquidity risk with respect to its contractual obligations and financial liabilities. Hydro manages this risk by maintaining borrowing facilities sufficient to cover both anticipated and unexpected fluctuations within the operations and by continuously monitoring cashflows. Short-term liquidity is provided through cash and cash equivalents on hand, funds from operations, a \$300.0 million promissory note program and a \$50.0 million operating credit facility. Long-term liquidity risk is managed by the issuance of a portfolio of debentures with maturity dates ranging from 2014 to 2033. Sinking funds have been established for these issues.

**(c) Market Risk**

Market risk refers primarily to the risk of loss resulting from changes in interest rates, commodity prices and foreign exchange rates. During 2009, the Board of Directors of Nalcor, approved a formal financial risk management policy that outlined the risks associated with the operations of Nalcor and its subsidiaries and approaches and guidelines to be followed in the management of those risks. This policy will be reviewed by the Board annually or more frequently if there is a material change to Nalcor's financial risks and outlines a formal approval process for various hedging instruments used. The Audit Committee will provide oversight on behalf of the Board with the exception of any items that specifically require Board approval.

*Interest Rates*

Interest rate risk is managed within the corporate financing strategy where floating rate debt exposures and interest rate scenarios are forecast and evaluated. A diversified portfolio of fixed and floating rate debt is maintained and managed with a view to an acceptable risk profile. Key quantitative parameters for interest rate risk management are the percentage of floating rate debt in the total debt portfolio, coupled with an examination of the weighted average term to maturity of the entire debt portfolio. By setting clear guidelines in respect to these quantitative parameters, Hydro attempts to minimize the likelihood of a material impact on net income resulting from an unexpected change in interest rates.

Exposure to changes in interest rates exists on interest expense related to the short-term debt portfolio and interest income related to the sinking fund investment portfolios. Hydro estimates that a change of 100 basis points from the actual average yield on the short-term debt portfolio in 2009 would have resulted in a change in interest expense of \$0.5 million (2008 – \$1.3 million). Similarly, a change of 100 basis points from the actual average yield on the sinking fund investment portfolio in 2009 would have resulted in a change in interest income of \$2.3 million (2008 – \$2.0 million) and a change in other comprehensive income of \$16.6 million (2008 - \$16.1 million). Interest rate risk on the long-term debt portfolio is mitigated through the use of fixed rate debentures.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management (cont'd.)**

Hydro (cont'd)

(c) Market Risk (cont'd.)

*Foreign Currency and Commodity Exposure*

Fair value of future cash flows of a financial instrument will fluctuate due to changes in the exchange rate between the foreign currency and the Canadian dollar. Hydro's primary exposure to both foreign exchange and commodity price risk arise from its purchases of No. 6 fuel for consumption at the HTGS and certain electricity sales both of which are denominated in US dollars.

During 2009, Hydro had total purchases of No. 6 fuel of \$87.5 million (2008 - \$103.9 million) denominated in US dollars. Hydro's exposure to both the foreign exchange and commodity price risk associated with these fuel purchases is mitigated through the operation of the RSP. The purpose of the RSP is to both reduce volatility in customer rates as well as mitigate potential net income volatility from fuel price and volume variations. All variances in actual fuel prices and exchange rates, as compared to that approved in Hydro's most recent cost of service study used to set rates, are captured in the RSP and are either refunded to or collected from customers through automatic rate adjustments. Hydro also employs the periodic use of forward currency contracts to avoid exposure to exchange rates on a particular day can be avoided.

During 2009, total electricity sales denominated in US dollars were \$42.5 million. Hydro mitigates this risk through the use of forward contracts. During 2009, Hydro entered into a series of 24 monthly foreign currency forward contracts, the last of which matures April 2011, in the amount of \$87.8 million US dollars at an average exchange rate of 1.17 to hedge 75% of Hydro's forecasted US dollars sales. The nominal contract value range from \$2.4 million to \$6.0 million. During the year, eight of the contracts were settled with the effective portion of the gain reported as energy sales and the ineffective portion as other income. The fair value of the 16 contracts outstanding as at December 31, 2009 is \$7.0 million. These contracts have been designated as part of a hedging relationship.

**Effect of Hedge Accounting on Financial Statements**

<i>(millions of dollars)</i>	<b>Net Gains Included in Net Income</b>	<b>Unrealized Gains Included in OCI</b>
Ineffective portion	0.5	-
Effective portion	2.4	6.2

Churchill Falls

(a) Liquidity Risk

Churchill Falls is exposed to liquidity risk with respect to its contractual obligations and financial liabilities. Churchill Falls manages this risk by maintaining borrowing facilities sufficient to cover both anticipated and unexpected fluctuations within its operations and by continuously monitoring cash flows. Short-term liquidity is provided through cash and cash equivalents on hand, funds from operations and the \$10.0 million unsecured credit facility. Long-term liquidity risk is managed by maintenance of the reserve fund in accordance with the June 1999 shareholders' agreement and dividend management policy to meet long-term liquidity requirements associated with debt retirement and the company's capital expenditure program.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management (cont'd.)**

Churchill Falls (cont'd)

(b) Market Risk

Market risk refers primarily to the risk of loss resulting from changes in interest rates, foreign exchange rates and commodity prices.

*Interest Rates*

Interest rate risk is mitigated on Churchill Falls' long-term debt by virtue of a fixed interest rate to maturity. Exposure to changes in interest rates exists on investment income related to the short-term and reserve fund investment portfolios. Churchill Falls estimates that a change of 100 basis points from the actual average yield earned on the short-term investment portfolio in 2009 would have resulted in a change in interest income of \$0.1 million (2008 – \$0.2 million). Similarly, a change of 100 basis points from the actual average yield earned on the reserve fund investment portfolio in 2009 would have resulted in a change in interest income of \$0.3 million (2008 – \$0.2 million) and a change in other comprehensive income of \$0.8 million (2008 - \$0.5 million). Interest rate risk is managed within the corporate financing strategy where floating rate debt exposures and interest rate scenarios are forecast and evaluated.

*Foreign Currency Exposure*

The fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rate between a foreign currency and the Canadian dollar. Churchill Falls is exposed to foreign exchange risk when it enters into transactions to procure goods and services denominated in a foreign currency however this exposure to foreign exchange rate fluctuations is immaterial.

*Commodity*

Churchill Falls does not hold any financial instrument whose value would vary due to changes in a commodity price.

**15. INTEREST EXPENSE**

<i>(millions of dollars)</i>	2009	2008

With the refinancing of the General Mortgage Bonds in February 2008, Churchill Falls is required to share with Hydro-Québec any benefits it receives resulting from the respective change in interest rates. Prior to the refinancing, Churchill Falls recovered the difference between interest calculated at the rates prescribed in the Power Contract and interest paid on its long-term debt.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**15. INTEREST EXPENSE (cont'd.)**

Also, Churchill Falls can request Hydro and Hydro-Québec to make advances, against the issue of Subordinated Debt Obligations, to service its debt and to cover expenses if funds are not otherwise available. If such requests fail to attract sufficient advances, Churchill Falls can require Hydro-Québec to make additional advances, against the issue of units of Subordinate Debentures and shares of common stock, to service its debt and to cover its expenses that remain unfunded.

**17. SEGMENT INFORMATION**

Hydro operates in four business segments. Hydro Regulated encompasses sales of electricity to customers within the Province. Churchill Falls operates a hydroelectric generating facility and sells electricity primarily to Hydro-Québec. Nalcor's energy marketing activities include the sale of electricity to markets outside the Province. Other encompasses other non-regulated activities. The designation of segments has been based on a combination of regulatory status and management accountability. The segments' accounting policies are the same as those previously described in Note 1.

During 2009, sales to Hydro's three largest customers amounted to over 80% of total energy sales.

**Geographic Information**

Revenues by geographic area:

<i>(millions of dollars)</i>	2009	2008
Newfoundland and Labrador	<u>453.1</u>	447.3
Québec	<u>69.8</u>	121.6
Nova Scotia	<u>39.7</u>	-
New Brunswick	<u>3.5</u>	-
	<u>566.1</u>	<u>568.9</u>

All of Hydro's assets are located in the Province.

**18. COMMITMENTS AND CONTINGENCIES**

(a) Under the terms of a sublease with Twin Falls, expiring on December 31, 2014, Churchill Falls is required to deliver to Twin Falls, at an agreed price, horsepower equivalent to the installed horsepower of the Twin Falls plant and to maintain Twin Falls' plant and equipment. The costs associated with making the plant operational, if required, are not estimable at this time. In 2015, the physical assets of Twin Falls will revert to Churchill Falls, and Churchill Falls is required to make this horsepower available to Hydro at rates that are commercially reasonable pursuant to the 1999 shareholders' agreement.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**18. COMMITMENTS AND CONTINGENCIES (cont'd.)**

(b) The results of an Environmental Site Assessment (ESA) conducted at the Twin Falls Generating Station indicated higher than acceptable concentrations of contaminants in the soil and waters adjacent to the powerhouse. Further testing was conducted to determine the extent of contamination. The recommendations arising from this testing indicate that remediation is not required, but further monitoring be carried out. Further monitoring is recommended for 2010 and every five years thereafter.

(c) Pursuant to the terms of the 1999 shareholders' agreement, in 2007, Churchill Falls commenced the creation of a \$75.0 million segregated reserve fund to contribute towards the funding of capital expenditures related to Churchill Falls' existing facilities and their replacement. Churchill Falls invested \$17.0 million in each of 2007, 2008 and 2009. The remaining investments will be acquired during a 30-day period commencing on each of the following dates:

January 1, 2010	\$8.0 million
January 1, 2011	\$8.0 million
January 1, 2012	\$8.0 million

This fund must remain in place until the end of the shareholders' agreement in 2041. Any amounts removed to fund capital expenditures must be replaced. Reserve fund holdings consist of securities issued by the Government of Canada, various provinces of Canada and Schedule 1 Canadian Chartered Banks.

A summary of Hydro's 65.8% share of the reserve fund is as follows:

<i>(millions of dollars)</i>	2009	2008
Opening balance	<u>23.4</u>	<u>11.2</u>
Contribution	<u>11.2</u>	<u>11.2</u>
Total contribution to reserve fund	<u>34.6</u>	<u>22.4</u>
Net interest earned	<u>(0.2)</u>	<u>0.4</u>
Mark-to-market adjustment	<u>0.4</u>	<u>0.6</u>
Fair value of reserve fund	<u><u>34.8</u></u>	<u><u>23.4</u></u>

(d) Hydro has received claims instituted by various companies and individuals with respect to outages and other miscellaneous matters. Although such matters cannot be predicted with certainty, management currently considers Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, to be \$0.1 million (2008 - \$0.2 million).

One of Hydro's industrial customers commenced legal proceedings in 1997, claiming approximately \$21.9 million (2008 - \$22.2 million) related to outages and plant shutdowns. Hydro is defending this claim. While the ultimate effect of such an action cannot be ascertained at this time, in the opinion of Hydro's management, following consultation with its legal counsel, no liability should be recognized.

(e) Outstanding commitments for capital projects total approximately \$13.3 million (2008 - \$7.1 million).

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**18. COMMITMENTS AND CONTINGENCIES (cont'd.)**

(f) Hydro has entered into a number of long-term power purchase agreements as follows:

Type	Rating	In-service Date	Term
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	4 MW	1998	25 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2009	20 years

Estimated payments due in each of the next five years are as follows:

(millions of dollars)	2010	2011	2012	2013	2014
Power purchases	27.0	27.6	28.5	29.5	30.2

On December 16, 2008, the Province introduced legislation cancelling two power purchase agreements related to hydro facilities.

(g) Hydro has issued two irrevocable letters of credit, one in the amount of \$7.2 million to the New Brunswick System Operator as credit support related to an application for point to point transmission service. The second letter of credit has been issued to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement. Churchill Falls has issued an irrevocable letter of credit, in the amount of \$0.7 million to ensure satisfactory management of its waste management and compliance with a certificate of approval for the transportation of special hazardous wastes, granted by the Department of Environment and Conservation.

(h) Effective March 31, 2009, Hydro's five-year power sales agreement to sell energy to Hydro-Québec expired. Effective April 1, 2009, Hydro has entered into a power sales agreement with a third party with respect to the energy previously sold to Hydro-Québec. To facilitate market access, Hydro has entered into a five-year transmission service agreement with Hydro-Québec TransÉnergie to acquire access to 265 MW of transmission capacity from Labrador through Québec. Hydro has the right to renew its transmission service contract at the end of the contract term. If at that time there is a competing request for the same path, in order to renew the service agreement, Hydro must agree to accept a contract term that is at least equal to that competing request.

Pursuant to Hydro's five-year transmission service agreement with Hydro-Québec TransÉnergie, the transmission rental payments for the next five years are as follows:

2010	\$ 19.2 million
2011	\$ 19.2 million
2012	\$ 19.2 million
2013	\$ 19.2 million
2014	\$ 4.8 million

(i) Hydro has received funding in the amount of \$2.5 million from the Atlantic Canada Opportunities Agency in relation to a wind-hydrogen-diesel research development project in the community of Ramea; this funding is repayable by annual installments of \$25,000 per commercial implementation of the resulting product. As at December 31, 2009, there have been no commercial implementations.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**19. RELATED PARTY TRANSACTIONS**

The Province, Nalcor, Churchill Falls, Nalcor Energy – Oil and Gas, Nalcor Energy – Bull Arm Fabrication, LCDC and GIPCo are related parties of Hydro. In addition, the PUB is related to Hydro by virtue of its status as an agency of the Province. These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

- (a) Hydro has entered into a long-term power contract with Churchill Falls for the purchase of \$5.9 million (2008 - \$6.0 million) of the power produced by Churchill Falls and Hydro's 65.8% share is eliminated upon consolidation.
- (b) For the year ended December 31, 2009, approximately \$1.9 million (2008 - \$1.8 million) of operating costs were recovered from Churchill Falls for engineering, technical, management and administrative services. Hydro's 65.8% share is eliminated upon consolidation.
- (c) Hydro is required to contribute to the cost of operations of the PUB as well as pay for the cost of hearings into applications it makes. During 2009, Hydro incurred \$0.6 million in costs related to the PUB (2008 - \$0.6 million) of which \$0.1 million (2008 - \$0.1 million) was included in accrued liabilities.
- (d) As at December 31, 2009 Hydro has a payable to Nalcor of \$20.8 million (2008- \$2.9 million) and a payable to Churchill Falls of \$0.1 million (2008 – nil). This payable consists of various intercompany operating costs.
- (e) Under the terms and conditions of the Churchill Falls (Labrador) Corporation (Lease) Act, 1961, Churchill Falls must pay rentals and royalties to the Province annually. As at December 31, 2009 \$2.4 million (2008 - \$3.3 million) was payable.
- (f) During 2008, certain assets and liabilities and their related debt and equity were transferred from Hydro to Nalcor Energy. Details of the transactions are noted below:

<i>(millions of dollars)</i>	2008
Property, plant and equipment	157.2
Contributed capital	(2.2)
Employee future benefits	(0.5)
Retained earnings from non-regulated activity in Hydro	<u>(160.6)</u>
Total	<u>(6.1)</u>

- (g) During 2009, Nalcor advanced \$1.1 million (2008 - \$4.5 million) as a contribution in aid of construction related to the Ramea Wind-Hydrogen-Diesel Project. Hydro also received contributions in aid of construction from the Province related to wind feasibility studies. As at December 31, 2009, the full amount of \$0.2 million has been recorded as a deferred capital contribution.
- (h) During 2009, Hydro received \$0.4 million (2008 - \$0.4 million) as a rate subsidy for rural isolated customers from the Province and \$1.6 million (2008 - \$1.5 million) as an energy rebate to offset the cost of basic electricity consumption for Labrador rural isolated residential customers under the Northern Strategic Plan with \$0.1 million (2008 - \$0.1 million) recorded as accounts receivable at year-end.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**20. SIGNIFICANT OCCURRENCES**

On November 3, 2008, a fire occurred in a cable shaft at Churchill Falls causing extensive damage to two sets of high-voltage cables in two units of the cable shaft. This resulted in lost GWAC revenue and power sales of approximately \$7.7 million and \$2.5 million in 2009 and \$8.4 million and \$2.1 million in 2008.

Hydro's share of total repair costs of \$5.3 million as of December 31, 2009 were covered by insurance with the exception of a \$1.3 million deductible. Repair work was completed on the first unit in February 2009 and the second unit in October 2009.

**21. WATER MANAGEMENT AGREEMENT**

In June 2007, the Province passed an amendment to the Electrical Power Control Act, 1994 ("EPCA"). The amendment requires parties, that utilize a common water resource in the province for power production, enter into a water management agreement. If the parties cannot reach an agreement, the Board of Commissioners of Public Utilities ("PUB") has the authority to impose an agreement on the parties. Churchill Falls shares the Churchill River with a Nalcor proposed hydroelectrical generation development, downstream from Churchill Falls. The amendment provides that any resulting water management agreement will not adversely affect existing power contracts.

A tentative agreement reached between management of Nalcor and Churchill Falls was not approved by the Churchill Falls Board of Directors. As a result, on November 10, 2009 Nalcor applied to the PUB to establish the terms of the agreement.

**22. SUBSEQUENT EVENTS**

- (a) In January 2010, Hydro entered into 28 swap contracts to hedge the commodity price risk on electricity sales in the amount of \$24.7 million.
- (b) On February 23, 2010, Churchill Falls filed a motion against Hydro-Quebec in the Quebec Superior Court. The motion is seeking a modification to the pricing terms of the 1969 Power Contract as of November 30, 2009. The outcome of this motion is not determinable at this time.

On February 3, 2010, the Province established a trust with Churchill Falls as the beneficiary. The purpose of this trust is to fund the external costs and expenses incurred in relation to this matter.

- (c) In February 2010, Hydro issued 22 letters of credit, for transmission bookings, reducing the availability of its credit facility by \$11.5 million.
- (d) On March 9, 2010, the PUB issued a board order establishing the water management agreement proposed by Nalcor in November 2009.

## Independent Auditor's Report

To the Directors of Newfoundland and Labrador Hydro

We have audited the accompanying non-consolidated financial statements of Newfoundland and Labrador Hydro, which comprise the non-consolidated balance sheet as at December 31, 2010, and the non-consolidated statements of income and retained earnings, comprehensive income and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information. The non-consolidated financial statements have been prepared by management based on the financial reporting provisions of Section 59 of The Hydro Corporation Act.

### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these non-consolidated financial statements in accordance with the financial reporting provisions of Section 59 of The Hydro Corporation Act, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditor's Responsibility*

Our responsibility is to express an opinion on these non-consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the non-consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the non-consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the non-consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the non-consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the non-consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the non-consolidated financial statements present fairly, in all material respects, the financial position of Newfoundland and Labrador Hydro as at December 31, 2010, and the results of its operations and its cash flows for the year then ended in accordance with the financial reporting provisions of Section 59 of The Hydro Corporation Act.

*Basis of Accounting and Restrictions on Distribution and Use*

Without modifying our opinion, we draw attention to Note 2 to the non-consolidated financial statements, which describes the basis of accounting. The non-consolidated financial statements are prepared to assist Newfoundland and Labrador Hydro meet the requirements of the Newfoundland and Labrador Board of Commissioners of Public Utilities. As a result, the non-consolidated financial statements may not be suitable for another purpose. Our report is intended solely for Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities and should not be distributed to or used by parties other than Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities.

*Other Matter*

Newfoundland and Labrador Hydro has prepared separate financial statements for the year ended December 31, 2010 in accordance with Canadian Generally Accepted Accounting Principles on which we issued a standard auditor's report to the shareholders of Newfoundland and Labrador Hydro dated April 1, 2011.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. DESCRIPTION OF BUSINESS**

Newfoundland and Labrador Hydro (Hydro) is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador (Province) as a Crown corporation and is exempt from paying income taxes under Section 149 (1)(d) of the Income Tax Act. The principal activity of Hydro is the development, generation and sale of electricity.

**2. SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Presentation**

These financial statements have been prepared in accordance with the significant accounting policies set out below. These financial statements differ materially from Canadian generally accepted accounting principles (GAAP) because they are non-consolidated. Hydro's investments in its subsidiary and jointly controlled companies have been accounted for using the equity method of accounting. Consolidated financial statements for the same period have been prepared for presentation to the Lieutenant-Governor in Council of the Province.

**Use of Estimates**

Preparation of these financial statements requires the use of estimates and assumptions that affect the amounts reported and disclosed in these statements and related notes. Key areas where management has made complex or subjective judgements include the fair value and recoverability of assets, the reported amounts of revenue and expenses, litigation, amortization and property, plant and equipment, environmental and asset retirement obligations, and other employee future benefits. Actual results may differ from these estimates, including changes as a result of future decisions made by the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB), and these differences could be material.

**Rates and Regulations**

Hydro's revenues from its electricity sales to most customers within the Province are subject to rate regulation by the PUB. Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service (COS) methodology. The allowed rate of return on rate base is 7.4% (2009 - 7.4%). Hydro applies certain accounting policies that differ from enterprises that do not operate in a rate regulated environment. Generally these policies result in the deferral and amortization of costs or credits which will be recovered or refunded in future rates. In the absence of rate regulation, these amounts would be included in the determination of net income in the year the amounts are incurred. The effects of rate regulation on the financial statements are more fully disclosed in Note 4.

**Cash and Cash Equivalents and Short-term Investments**

Cash and cash equivalents and short-term investments consist primarily of Canadian treasury bills and Banker's Acceptances (BA). Those with original maturities at date of purchase of three months or less are classified as cash equivalents whereas those with original maturities beyond three months and less than twelve months are classified as short-term investments. The short-term investments bear interest rates of 1.07% to 1.08% (2009 - 0.26% to 0.65%). Cash and cash equivalents and short-term investments are measured at fair value.

**Inventory**

Inventory is recorded at the lower of average cost and net realizable value.

**Property, Plant and Equipment**

Property, plant and equipment is recorded at cost, which comprises materials, labour, contracted services, other costs directly related to construction, and an allocation of certain overhead costs. Expenditures for additions and betterments are capitalized and normal expenditures for maintenance and repairs are charged to operations. The cost of property, plant and equipment under construction is transferred to property, plant and equipment in service when construction is completed and facilities are commissioned, at which point amortization commences.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

Construction in progress includes the costs incurred in engineering and construction of new generation, transmission and distribution facilities. Interest is charged to construction in progress at rates equivalent to Hydro's weighted average cost of capital.

Contributions in aid of construction are funds received from customers and governments toward the cost of property, plant and equipment. Contributions are recorded as a reduction to property, plant and equipment and the net property, plant and equipment is amortized.

Gains and losses on the disposal of property, plant and equipment are recognized in income as incurred.

Amortization is calculated on hydroelectric generating plant and on transmission plant in service on the sinking fund method using interest factors ranging from 5.25% to 15.79%. Amortization on distribution system and other plant in service is calculated on the straight-line method. These methods are designed to fully amortize the cost of the facilities, after deducting contributions in aid of construction, over their estimated service lives.

Estimated service lives of the major assets are as follows:

Generation Plant	
Hydroelectric	50, 75 and 100 years
Thermal	25 and 30 years
Diesel	20 years
Transmission	
Lines	40 and 50 years
Switching stations	40 years
Distribution system	30 years
Other	3 to 50 years

Hydroelectric generation plant includes the powerhouse, turbines, governors and generators, as well as water conveying and control structures, including dams, dykes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks, and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dykes and liners and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kilovolt (kV). Switching stations assets are used to step up voltages of electricity from generating to transmission and to step down voltages for distribution.

Distribution system assets include poles, transformers, insulators, and conductors.

Other assets include telecontrol, computer software, buildings, vehicles, furniture, tools and equipment.

**Impairment of Long-Lived Assets**

Hydro reviews the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. An impairment loss corresponding to the amount by which the carrying value exceeds fair value is recognized, if applicable.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Asset Retirement Obligations**

The fair value of the future expenditures required to settle legal obligations associated with the retirement of property, plant and equipment, is recognized to the extent that they are reasonably estimable. Asset retirement obligations are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. Accretion of asset retirement obligations is included in net income through Amortization. Differences between the recorded asset retirement obligation and the actual retirement costs incurred are recorded as a gain or loss in the settlement period.

**Employee Future Benefits**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions are expensed as incurred.

Hydro provides group life insurance and health care benefits on a cost-shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee future benefits is accounted for on an accrual basis and has been actuarially determined using the projected benefit method prorated on service and management's best estimate of salary escalation, retirement ages of employees and expected health care costs. The excess of cumulative net actuarial gains and losses over 10% of the accrued benefit obligation is amortized over the expected average remaining service life of the employee group.

**Revenue Recognition**

Revenue is recognized on the accrual basis, as power and energy deliveries are made, and includes an estimate of the value of electricity consumed by customers in the year, but billed subsequent to year-end. Sales within the Province are primarily at rates approved by the PUB, whereas sales to certain major industrial customers and export sales are either at rates under the terms of the applicable contracts, or at market rates.

**Foreign Currency Translation**

Foreign currency transactions are translated into their Canadian dollar equivalent as follows:

- (a) At the transaction date, each asset, liability, revenue or expense is translated using exchange rates in effect at that date.
- (b) At the date of settlement and at each balance sheet date, monetary assets and liabilities are adjusted to reflect exchange rates in effect at that date. Any resulting gain or loss is reflected in income, except gains or losses on purchases of fuel which are included in the cost of fuel inventory.

**Financial Instruments and Hedging Activities**

Financial Instruments

Financial assets and financial liabilities are recognized on the balance sheet when Hydro becomes a party to the contractual provisions of the instrument and are initially measured at fair value. Subsequent measurement is based on classification. Hydro has classified each of its financial instruments into the following categories: financial assets and liabilities held for trading; loans and receivables; financial assets held to maturity; financial assets available for sale; and other financial liabilities.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Financial Instruments and Hedging Activities (cont'd.)**

**Financial Instruments (cont'd.)**

Hydro has classified its financial instruments as follows:

Cash and cash equivalents	Held for trading
Short-term investments	Available for sale
Accounts receivable	Loans and receivables
Sinking funds - investments in same Hydro issue	Held to maturity
Sinking funds - other investments	Available for sale
Derivative assets	Held for trading
Long-term receivables	Loans and receivables
Accounts payable and accrued liabilities	Other liabilities
Accrued interest	Other liabilities
Long-term debt	Other liabilities
Derivative liabilities	Held for trading
Long-term related party note payable	Other liabilities

Each of these financial instruments is measured at amortized cost, except for cash and cash equivalents, short-term investments and sinking fund – other investments which are measured at fair value.

Transaction costs related to financial assets and financial liabilities are included as part of the cost of the instrument, with the exception of cash and cash equivalents and short-term investments which are expensed as incurred, based upon the pricing obtained during the quotation process. Discounts and premiums on financial instruments are amortized to income over the life of the instrument.

**Derivative Instruments and Hedging Activities**

Derivative instruments are utilized by Hydro to manage market risk. Hydro's policy is not to utilize derivative instruments for speculative purposes. Hydro may choose to designate derivative instruments as hedges and apply hedge accounting if there is a high degree of correlation between price movements in the derivative instruments and the hedged items. Hydro formally documents all hedges and the risk management objectives at the inception of the hedge. Derivative instruments that have been designated and qualify for hedge accounting are classified as either cash flow or fair value hedges.

Hydro has designated foreign exchange forward contracts as cash flow hedges (Note 13). In a cash flow hedge relationship, the portion of unrealized gains or losses on the hedging item that is determined to be an effective hedge is recognized in Other Comprehensive Income (OCI), while the ineffective portion is recorded in net income. The amounts recognized in OCI are reclassified in net income when the hedged item affects net income.

Hydro had no fair value hedges in place at December 31, 2010 or 2009.

**Future Accounting Changes**

In October 2009, the Accounting Standards Board (AcSB) issued a third and final Omnibus Exposure Draft confirming that publically accountable enterprises in Canada will be required to apply International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB), in full and without modification, for interim and annual financial statements beginning on or after January 1, 2011. As a result of recent changes to Part 1 of the Canadian Institute of Chartered Accountants (CICA) Handbook – Accounting, by the AcSB, certain rate-regulated entities can defer the adoption of IFRS by one year to January 1, 2012. Hydro meets the AcSB's criteria for the deferral and has chosen to adopt IFRS effective January 1, 2012.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Future Accounting Changes (cont'd.)**

The IASB has deferred its work on rate-regulated activities accounting project and has not provided interim guidance for the recognition and measurement of regulatory assets and liabilities. Accordingly, Hydro continues to assess existing IFRS guidance to determine the impact of differences that will apply to accounting for rate-regulated activities upon adoption of IFRS on January 1, 2012.

Hydro is continuing to assess the financial reporting impacts of the adoption of IFRS; however, the impact of IFRS will depend on the IFRS standards in effect at the time of conversion on January 1, 2012 and the accounting elections made.

	<b>40.9</b>	32.8	

Regulatory assets represent future revenues associated with certain costs, incurred in current or prior periods that are expected to be recovered from customers in future periods through the rate-setting process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are expected to be refunded to customers as a result of the rate-setting process. Amounts deferred as regulatory assets and liabilities are subject to PUB approval. The risks and uncertainties related to regulatory assets and liabilities are subject to periodic assessment. When Hydro considers that the value of these regulatory assets or liabilities is no longer likely to be recovered or repaid through future rate adjustments, the carrying amount is reflected in operations. The following is a description of each of the circumstances in which rate regulation affects the accounting for a transaction or event.

**Rate Stabilization Plan**

On January 1, 1986, Hydro, having received the approval of the PUB, implemented a rate stabilization plan (RSP) which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, levels of precipitation and load. Adjustments required in retail rates to cover the amortization of the balance in the plan are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

Balances accumulating in the RSP, including financing charges, are to be recovered or refunded in the following year, with the exception of hydraulic variation, which will be recovered or refunded at a rate of twenty-five percent of the outstanding balance at year-end. Additionally, a fuel rider is calculated annually based on the forecast fuel price and is added to or subtracted from the rates that would otherwise be in effect.

Hydro recognizes the RSP balances as a regulatory asset or liability based on the expectation that rates will be adjusted annually to provide for the collection from, or refund to, customers in future periods. In the absence of rate regulation, Canadian GAAP would require that the cost of fuel be recognized as an operating expense in the period in which it was consumed. In 2010, \$23.3 million was recognized (2009 - \$42.3 million) in the RSP and \$2.3 million (2009 - 18.3 million) was recovered through rates and included in energy sales, with the corresponding cost amortized in fuels expenses.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**4. REGULATORY ASSETS AND LIABILITIES (cont'd.)**

**Deferred Foreign Exchange Losses**

Hydro incurred foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt in 1975 and 1985, respectively, which were recognized when the debt was repaid in 1997. The PUB has accepted the inclusion of realized foreign exchange losses related to long-term debt in rates charged to customers in future periods. Any such loss, net of any gain, is deferred to the time of the next rate hearing for inclusion in the new rates to be set at that time. Accordingly, these losses are recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include the losses in operating costs, in each year that the related debt was outstanding, to reflect the exchange rates in effect on each reporting date.

Commencing in 2002, the PUB ordered Hydro's deferred realized foreign exchange losses be amortized over a forty-year period. This amortization, of \$2.1 million annually, is included in interest expense (Note 14).

**Deferred Major Extraordinary Repairs**

In its report dated April 13, 1992, the PUB recommended that Hydro adopt a policy of deferring and amortizing the costs of major extraordinary repairs in excess of \$0.5 million, subject to PUB approval on a case-by-case basis. In 2005, Hydro started an asbestos abatement program at the Holyrood Thermal Generating Station (HTGS). This program was carried out over a three-year period. Pursuant to Order No. P.U. 2 (2005), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, the costs incurred in each year of the program were recognized as a regulatory asset to be amortized over the subsequent five-year period. In 2006, Hydro incurred \$2.3 million in expenses to repair a boiler tube failure at the HTGS. Pursuant to Order No. P.U. 44 (2006), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, these costs are being amortized over a five-year period. In the absence of rate regulation, Canadian GAAP would require that Hydro expense the cost of the asbestos abatement program and the boiler tube repairs in the year incurred. In 2010, \$2.6 million (2009 - \$2.7 million) of amortization was recognized in Operations and administration expense.

**Deferred Study Costs**

Pursuant to Order No. P.U. 14 (2004), the PUB directed Hydro to conduct an independent study of the treatment of Newfoundland Power's generation in Hydro's COS, and an independent marginal cost study, and to accumulate these costs in a deferral account to be dealt with at the next general rate application. Pursuant to Order No. P.U. 8 (2007), Hydro received approval for recovery of these costs over a three-year period commencing in 2007. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include the cost of these studies in operating costs in the year incurred. In 2010, \$0.1 million in amortization (2009 - \$0.1 million) was recognized in Operations and administration expense.

**Deferred Energy Conservation Costs**

Pursuant to Order No. P.U. 14 (2009), Hydro received approval to defer costs associated with an electrical conservation program for residential, industrial, and commercial sectors. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include this program as operating costs in the year incurred. In 2010, \$0.4 million (2009 - \$0.2 million) was deferred.

**Deferred Purchased Power Savings**

In 1997, Hydro interconnected communities in the area of L'Anse au Clair to Red Bay to the Hydro-Québec system. In its report dated July 12, 1996, the PUB recommended that Hydro defer and amortize the benefits of a reduced initial purchased power rate over a 30-year period. These savings in the amount of \$0.6 million (2009 - \$0.6 million) are recognized as a regulatory liability. In the absence of rate regulation, Canadian GAAP would require that Hydro include the actual cost of purchased power in operating costs in the year incurred.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**4. REGULATORY ASSETS AND LIABILITIES (cont'd.)**

**Property, Plant and Equipment**

The PUB permits an allowance for funds used during construction (AFUDC), based on Hydro's weighted average cost of capital, to be included in the cost of capital assets and amortized over future periods as part of the total cost of the related asset. In 2010, Hydro's AFUDC of 7.6% (2009 - 7.6%) is higher than its cost of debt of 7.2% (2009 - 7.2%) and the amount capitalized is higher and interest expense is lower by \$0.1 million (2009 - \$0.1 million) than that which would be permitted under Canadian GAAP in the absence of rate regulation.

Hydro amortizes its hydroelectric generating assets and transmission assets using the sinking fund method, as approved by the PUB. In the absence of rate regulation, these assets would likely be amortized using the straight-line method. During 2010, Hydro engaged an independent consultant to conduct an amortization study. The scope of this study included a review of Hydro's amortization methods as well as a statistical analysis of service life estimates and calculation of appropriate amortization rates and annual and accrued amortization balances as at December 31, 2009. Based on the results of this study, management currently estimates that switching from the use of sinking fund rather than straight-line amortization for hydroelectric and transmission assets, as well as changing from unit based amortization to a group based method on a remaining life basis, will result in an immaterial change in the annual amortization expense.

**5. LONG-TERM RECEIVABLES**

Included in long-term receivables are two refundable deposits in the amount of \$24.1 million (2009 - \$23.9 million) associated with an application for transmission service into Québec, bearing interest at one-year Guaranteed Income Certificate (GIC) rates, a \$0.1 million (2009 - nil) deposit associated with an application for transmission service in New Brunswick, bearing interest at the Prime Rate, and two refundable deposits in the amount of \$1.2 million (2009 - nil) associated with an application for transmission service into Nova Scotia, bearing interest at the Prime Rate less 1%.

**6. INVESTMENTS**

<i>(millions of dollars)</i>	<b>Ownership Interest</b>	<b>2010</b>	<b>2009</b>
Churchill Falls (Labrador) Corporation	65.8%		
Shares, at cost		167.2	167.2
Equity in retained earnings at beginning of year		200.5	192.6
Equity in net income for the year		16.6	7.9
		<b>384.3</b>	<b>367.7</b>

Effective June 18, 1999, the two shareholders of Churchill Falls, Hydro and Hydro-Québec, entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of Churchill Falls be subject to joint approval by representatives of Hydro and Hydro-Québec.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**7. LONG-TERM DEBT**

Details of long-term debt are as follows:

Series	Face Value	Coupon Rate%	Year of Issue	Year of Maturity	2010	2009
(millions of dollars)						
V *	125.0	10.50	1989	2014	<b>124.6</b>	124.5
X *	150.0	10.25	1992	2017	<b>149.3</b>	149.2
Y *	300.0	8.40	1996	2026	<b>293.3</b>	293.1
AB *	300.0	6.65	2001	2031	<b>306.7</b>	306.8
AD *	125.0	5.70	2003	2033	<b>123.6</b>	123.6
AE	<u>225.0</u>	4.30	2006	2016	<b>223.8</b>	223.7
Total debentures	<u>1,225.0</u>				<b>1,221.3</b>	1,220.9
Less sinking fund investments in own debentures					<b>76.4</b>	71.1
					<b>1,144.9</b>	1,149.8
Less: payments due within one year					<b>8.2</b>	8.2
					<b>1,136.7</b>	1,141.6

\* Sinking funds have been established for these issues.

Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada or any province of Canada, and have maturity dates ranging from 2013 to 2033. Hydro debentures, which are intended to be held to maturity, are deducted from long-term debt while all other sinking fund investments are shown separately on the balance sheet as assets. Annual contributions to the various sinking funds are in accordance with bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 3.86% to 9.86% (2009 - 4.50% to 9.86%).

Promissory notes, debentures and long-term loans are unsecured and unconditionally guaranteed as to principal and interest and, where applicable, sinking fund payments by the Province. The Province charges Hydro a guarantee fee of one percent annually on the total debt (net of sinking funds) guaranteed by the Province, outstanding as of the preceding December 31. For the years ended 2010 and 2009, the guarantee fee was waived by the Province.

Hydro uses promissory notes to fulfill its short-term funding requirements. As at December 31, 2010 there were no promissory notes outstanding (2009 - nil).

Hydro maintains a \$50.0 million Canadian or US equivalent unsecured operating credit facility with its banker and at year-end there were no amounts drawn on the facility (2009 - nil). Advances may take the form of a Prime Rate advance or the issuance of a BA with interest calculated at the Prime Rate or prevailing Government BA fee. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the Prime Rate. At year-end, Hydro had 24 letters of credit outstanding (Note 17(e)) reducing the availability of the credit facility by \$18.9 million (2009 - \$7.5 million).

Required repayments of long-term debt and sinking fund requirements over the next five years will be as follows:

(millions of dollars)	2011	2012	2013	2014	2015
Sinking fund requirement	8.2	8.2	8.2	8.2	8.2
Long-term debt repayment	-	-	-	125.0	-
	<u>8.2</u>	<u>8.2</u>	<u>8.2</u>	<u>133.2</u>	<u>8.2</u>

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**8. ASSET RETIREMENT OBLIGATIONS**

During the year ended December 31, 2010, Hydro recognized a liability associated with the retirement of portions of the HTGS. The reconciliation of the beginning and ending carrying amount of asset retirement obligations is as follows:

<i>(millions of dollars)</i>	<b>2010</b>	<b>2009</b>
Asset retirement obligation, beginning of year	-	-
Liabilities incurred	<b>11.4</b>	-
Liabilities settled	-	-
Accretion	-	-
Asset retirement obligation, end of year	<b>11.4</b>	-

The total undiscounted estimated cash flows required to settle the obligations at December 31, 2010 is \$20.5 million (2009 – nil). Payments to settle the liability are expected to occur between 2021 and 2029. The fair value of the asset retirement obligations was determined using the present value of future cash flows discounted at the Company's credit-adjusted risk-free rate of 4.1% (2009 – nil).

A significant number of Hydro's assets include generation plants, transmission assets and distribution systems. These assets can continue to run indefinitely with ongoing maintenance activities. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related asset retirement obligation cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is legally required to remove, an asset retirement obligation for those assets will be recognized at that time.

**9. EMPLOYEE FUTURE BENEFITS**

**Pension Plan**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions of \$4.1 million (2009 - \$3.8 million) are expensed as incurred.

**Other Benefits**

Hydro provides group life insurance and healthcare benefits on a cost-shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2010, cash payments to beneficiaries for its unfunded other employee future benefits was \$1.8 million (2009 - \$2.2 million). An actuarial valuation was performed on December 31, 2009 and extrapolated to December 31, 2010. The next actuarial valuation will be performed as at December 31, 2012.

<i>(millions of dollars)</i>	<b>2010</b>	<b>2009</b>
Accrued benefit obligation		
Balance at beginning of year	<b>58.0</b>	43.1
Transfer to Nalcor Energy	-	(0.5)
Current service cost	<b>1.7</b>	1.1
Interest cost	<b>3.8</b>	3.2
Actuarial loss	<b>7.6</b>	13.3
Benefits paid	<b>(1.8)</b>	(2.2)
Balance at end of year	<b>69.3</b>	58.0

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**9. EMPLOYEE FUTURE BENEFITS (cont'd.)**

**Other Benefits (cont'd.)**

Plan deficit	69.3	58.0
Unamortized actuarial loss	(20.7)	(13.8)
Unamortized past-service cost	(0.2)	(0.2)
Accrued benefit liability at end of year	<u>48.4</u>	<u>44.0</u>

<i>(millions of dollars)</i>	<b>2010</b>	<b>2009</b>
Components of benefit cost		
Current service cost	1.7	1.1
Interest cost	3.8	3.2
Actuarial loss	<u>7.6</u>	<u>13.3</u>
	<u>13.1</u>	<u>17.6</u>
Difference between actuarial loss and amount recognized	<u>(6.9)</u>	<u>(13.3)</u>
Benefit expense	<u>6.2</u>	<u>4.3</u>

The significant actuarial assumptions used in measuring the accrued benefit obligations and benefit expense are as follows:

	<b>2010</b>	<b>2009</b>
Discount rate – benefit cost	6.50%	7.50%
Discount rate – accrued benefit obligation	5.75%	6.50%
Rate of compensation increase	3.50%	3.50%

Assumed healthcare trend rates:

	<b>2010</b>	<b>2009</b>
Initial health care expense trend rate	7.50%	7.50%
Cost trend decline to	5.00%	5.00%
Year that rate reaches the rate it is assumed to remain at	2016	2016

A 1% change in assumed health care trend rates would have had the following effects:

<i>Increase</i>	<b>2010</b>	<b>2009</b>
Current service and interest cost	0.9	0.7
Accrued benefit obligation	11.7	8.9
<i>Decrease</i>	<b>2010</b>	<b>2009</b>
Current service and interest cost	(0.7)	(0.5)
Accrued benefit obligation	(9.2)	(7.0)

Amount recognized in net income	<u>(15.9)</u>	<u>(13.1)</u>
Balance, end of year	<u>26.7</u>	<u>21.0</u>

**12. CAPITAL MANAGEMENT**

Hydro's principal business requires ongoing access to capital in order to maintain the continued delivery of safe and reliable service to its customers. Therefore, Hydro's primary objective when managing capital is to ensure ready access to capital at a reasonable cost.

The capital managed by Hydro is comprised of debt (long-term debentures, promissory notes, bank credit facilities and bank indebtedness) and equity (share capital, contributed capital, accumulated other comprehensive income and retained earnings).

A summary of the capital structure is outlined below:

<i>(millions of dollars)</i>	2010	2009
<b>Debt</b>		
Long-term debt	<u>1,136.7</u>	<u>1,141.6</u>
Current portion of long-term debt	<u>8.2</u>	<u>8.2</u>
Sinking funds	<u>(208.4)</u>	<u>(179.6)</u>
	<u>936.5</u>	<u>970.2</u>
	<u>56.5%</u>	<u>57.2%</u>
<b>Equity</b>

<b>Total debt and equity</b>	<u><b>1,658.6</b></u>	<u><b>1,695.3</b></u>
	<u><b>100.0%</b></u>	<u><b>100.0%</b></u>

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**12. CAPITAL MANAGEMENT (cont'd.)**

Hydro's approach to capital management encompasses various factors including monitoring the percentage of floating rate debt in the total debt portfolio, the weighted average term to maturity of its overall debt portfolio, its percentage of debt to debt plus equity and its earnings before interest and taxes (EBIT) coverage of interest.

For the regulated portion of Hydro's operations a capital structure comprised of 75% debt and 25% common equity is maintained, a ratio which management believes to be optimal with respect to its cost of capital. This capital structure is maintained by a combination of dividend policy, contributed equity and debt issuance. The issuance of any new debt with a term greater than one year requires prior approval of Hydro's regulator, the PUB.

Per legislation, the total of the short-term loans issued by Hydro and outstanding at any time, shall not exceed a limit as fixed by the Lieutenant-Governor in Council. Short-term loans are those loans issued with a term not exceeding two years. The current limit is set at \$300 million. The balance outstanding as at December 31, 2010 was nil (2009 -nil). Issuance of long-term and short-term debt by Hydro is further restricted by Bill C-24, an amendment to the Newfoundland and Labrador Hydro Act of 1975. The Bill effectively limits Hydro's total borrowings, which includes both long and short-term debt, to \$1.6 billion at any point in time.

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**Fair Value**

The estimated fair values of financial instruments as at December 31, 2010 and 2009 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates below are not necessarily indicative of the amounts that Hydro might receive or incur in actual market transactions.

As a significant number of Hydro's assets and liabilities do not meet the definition of a financial instrument, the fair value estimates below do not reflect the fair value of Hydro as a whole.

<i>(millions of dollars)</i>	Carrying Value	Fair Value	Carrying Value	Fair Value
	2010	2009	2010	2009
<b>Financial assets</b>				
Cash and cash equivalents	<b>37.7</b>	<b>37.7</b>	10.9	10.9

Long-term related party note payable <sup>(1)</sup>	<b>25.3</b>	<b>n/a</b>	23.9	n/a

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Fair Value (cont'd.)**

The fair value of cash and cash equivalents, short-term investments, accounts receivable, accounts payable and accrued liabilities, accrued interest and due to related parties approximates their carrying values due to their short-term maturity.

(1) The fair value of the long-term receivable and long-term related party note payable is subject to uncertainty regarding the timing of future cash flows and as such, the fair value of the long-term receivable cannot be determined at December 31, 2010 and 2009.

**Establishing Fair Value**

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

The following table presents Hydro's fair value hierarchy for financial assets and liabilities as at December 31. There were no transfers between Level 1 and Level 2 during the year:

	<b>Level 1</b>	<b>Level 2</b>	<b>Total</b>
<i>(millions of dollars)</i>	<b>2010</b>		
<b>Financial assets</b>			
Cash and cash equivalents	<b>37.7</b>	-	<b>37.7</b>

Sinking funds – other investments	-	179.6	179.6
Derivative assets	-	7.0	7.0
<b>Financial liabilities</b>			
Accounts payable and accrued liabilities	74.4	-	74.4
Accrued interest	28.7	-	28.7
Long-term debt including amount due within one year (before sinking funds)	-	1,440.6	1,440.6

There were no financial assets or liabilities valued using Level 3 of the fair value hierarchy as at December 31, 2010 and 2009.

**Risk Management**

In January and February of 2010, Hydro entered into 28 swap contracts, with terms ranging from 2 to 11 months, to hedge the commodity price risk on electricity sales in the amount of \$24.7 million.

Exposure to credit risk, liquidity risk and market risk arises in the normal course of Hydro's business.

**Credit Risk**

Hydro is exposed to credit risk in the event of non-performance by counterparties to its financial instruments. The majority of the receivables are from regulated utilities which minimizes credit risk. There is risk that Hydro will not be able to collect all of its remaining accounts receivable and amounts owing under its customer finance plans. These financial instruments which arise in the normal course of business do not represent a significant concentration of credit risk as amounts are owed by a large number of customers on normal credit terms. Hydro manages this credit risk primarily by executing its credit and collection policy including the requirement for security deposits from certain customers. As at December 31, 2010 security deposits of \$0.1 million (2009 - \$0.1 million) are included in accounts payable and accrued liabilities.

Hydro's three largest customers account for 80% (2009 – 76%) of total energy sales and 67% (2009 - 72%) of accounts receivable. These customers are comprised of rate regulated organizations or organizations with an investment grade rating.

Hydro does not have any significant amounts that are past due and uncollectable for which a provision has not been recognized at December 31, 2010.

Hydro manages its investment credit risk exposure by restricting its investments to high-quality securities such as Canada Treasury Bills, Bankers' Acceptances drawn on Schedule 1 Canadian Chartered Banks and Term Deposits issued by Schedule 1 Canadian Chartered Banks. Additionally, the investments held within the portfolios of Churchill Falls do not exceed 10% with any one institution with the exception of the Government of Canada.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management**

Liquidity Risk

Hydro is exposed to liquidity risk with respect to its contractual obligations and financial liabilities. This risk is managed by maintaining borrowing facilities sufficient to cover both anticipated and unexpected fluctuations within the operations and by continuously monitoring cash flows.

Short-term liquidity is provided through cash and cash equivalents on hand, funds from operations, a \$300.0 million promissory note program and credit facilities.

Long-term liquidity risk is managed by the issuance of a portfolio of debentures with maturity dates ranging from 2014 to 2033. Sinking funds have been established for these issues with the exception of Series AE.

The following are the contractual maturities of Hydro's financial liabilities, including principal and interest, as at December 31, 2010:

<i>(millions of dollars)</i>	<b>&lt;1 Year</b>	<b>1-3 Years</b>	<b>3-5 years</b>	<b>&gt; 5 Years</b>	<b>Total</b>
Accounts payable and accrued liabilities	<b>107.6</b>	-	-	-	<b>107.6</b>
Accrued interest	<b>28.7</b>	-	-	-	<b>28.7</b>
Derivative liabilities	<b>0.3</b>	-	-	-	<b>0.3</b>
Long-term debt including amount due within one year	-	-	<b>125.0</b>	<b>1,100.0</b>	<b>1,225.0</b>
Interest	<b>61.8</b>	<b>180.9</b>	<b>161.2</b>	<b>752.5</b>	<b>1,156.4</b>
	<b>198.4</b>	<b>180.9</b>	<b>286.2</b>	<b>1,852.5</b>	<b>2,518.0</b>

Market Risk

Market risk refers primarily to the risk of loss resulting from changes in interest rates, commodity prices and foreign exchange rates. Nalcor has a formal financial risk management policy that outlines the risks associated with the operations of Nalcor and its subsidiaries outlining approaches and guidelines to be followed in the management of those risks. This policy is reviewed by the Board annually or more frequently if there is a material change to Nalcor's financial risks. The Audit Committee provides oversight on behalf of the Board with the exception of any items that specifically require Board approval.

Interest Rates

Interest rate risk is managed within the corporate financing strategy whereby floating rate debt exposures and interest rate scenarios are forecast and evaluated. A diversified portfolio of fixed and floating rate debt is maintained and managed with a view to an acceptable risk profile. Key quantitative parameters for interest rate risk management includes the percentage of floating rate debt in the total debt portfolio, coupled with an examination of the weighted average term to maturity of the entire debt portfolio. By setting clear guidelines in respect to these quantitative parameters, Hydro attempts to minimize the likelihood of a material impact on net income resulting from an unexpected change in interest rates.

Hydro is exposed to interest rate risk related to the short-term debt portfolio, the sinking fund investment portfolios and reserve fund investment portfolios. Interest rate risk on the long-term debt portfolio is mitigated through the use of fixed rate debentures. The following table illustrates Hydro's exposure to a 100 basis point (1%) change in interest rates:

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management (cont'd.)**

Market Risk (cont'd.)

<i>(millions of dollars)</i>	Net Income		Other Comprehensive Income	
	1% decrease	1 % increase	1% decrease	1% increase
	(0.1)	0.1	-	-
Interest on short-term investments	-	-	29.3	(10.3)
Interest on sinking funds	(0.1)	0.1	29.3	(10.3)

*Foreign Currency and Commodity Exposure*

The fair value of future cash flows of a financial instrument will fluctuate due to changes in the exchange rate between the foreign currency and the Canadian dollar. Hydro's primary exposure to both foreign exchange and commodity price risk arises within Hydro from its purchases of No. 6 fuel for consumption at the HTGS and certain electricity sales both of which are denominated in USD.

During 2010, Hydro had total purchases of No. 6 fuel of \$104.1 million (2009 - \$87.5 million) denominated in USD. Exposure to both the foreign exchange and commodity price risk associated with these fuel purchases is mitigated through the operation of the RSP. The purpose of the RSP is to both reduce volatility in customer rates as well as mitigate potential net income volatility from fuel price and volume variations. All variances in fuel prices including exchange rates, as compared to that approved in Hydro's most recent cost of service study, are captured in the RSP and are either refunded to or collected from customers through rate adjustments. Hydro also employs the periodic use of forward currency contracts to manage exposure to exchange rates on a particular day.

During 2010, total electricity sales denominated in USD were \$72.8 million (2009 - \$41.8 million). Hydro mitigates this risk through the use of commodity swaps and foreign currency forward contracts.

During 2009, Hydro entered into a series of 24 monthly foreign exchange forward contracts, in the amount of \$87.8 million USD at an average exchange rate of 1.17 to hedge 75% of Hydro's forecasted USD electricity sales, the last of which expires in April 2011. These contracts have been designated as part of a hedging relationship.

During 2010, Hydro entered into 28 commodity swap contracts totalling \$24.7 million, the last of which expired in December 2010. These contracts swapped floating market rates for fixed rates which ranged from \$26 USD/MWh to \$50 USD/MWh. These contracts have not been designated as part of a hedging relationship. During 2010, 24 of these settled. The fair value of the four contracts outstanding as at December 31, 2010 is a liability of \$0.3 million and \$3.4 million in losses from these contracts is included in Other gains and losses.

**Effect of Hedge Accounting on Financial Statements**

<i>(millions of dollars)</i>	Net Gains Included in Net Income	Unrealized Gains Included in OCI	Net Gains Included in Net Income	Unrealized Gains Included in OCI
	2010	2009	2010	2009
Ineffective portion	0.2	-	0.5	-
Effective portion	5.9	1.3	2.4	6.2

The ineffective portion of hedging gains and losses is included in net income through Other gains and losses.

**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**16. SEGMENT INFORMATION (cont'd.)**

Hydro operates in three business segments. Regulated electricity encompass sales of power and energy to most customers within the Province, non-regulated activities are primarily engaged in energy project development and energy marketing encompasses sales to markets outside the Province. The designation of segments has been based on regulatory status and management accountability. The segments' accounting policies are the same as those previously described in Note 2.

**17. COMMITMENTS AND CONTINGENCIES**

- (a) Hydro has received claims instituted by various companies and individuals with respect to outages and other miscellaneous matters. Although such matters cannot be predicted with certainty, management currently considers Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, to be \$0.1 million (2009 - \$0.1 million).
- (b) One of Hydro's industrial customers commenced legal proceedings in 1997, claiming approximately \$21.8 million (2009 - \$21.9 million) related to outages and plant shutdowns. Hydro is defending this claim. While the ultimate outcome of this action cannot be ascertained at this time, in the opinion of Hydro's management, following consultation with its legal counsel, no liability should be recognized.
- (c) Outstanding commitments for capital projects total approximately \$11.0 million (2009 - \$9.2 million).

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**17. COMMITMENTS AND CONTINGENCIES (cont'd.)**

(d) Hydro has entered into a number of long-term power purchase agreements as follows:

Type	Rating	In-service Date	Term
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	4 MW	1998	25 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2009	20 years

Estimated payments due in each of the next five years are as follows:

(millions of dollars)	2011	2012	2013	2014	2015
Power purchases	23.9	24.5	25.1	25.6	26.1

(e) Hydro has issued 23 irrevocable letters of credit to the New Brunswick System Operator totalling \$18.6 million as credit support related to applications for point to point transmission service. In addition, Hydro has issued one letter of credit to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement.

(f) Hydro has entered into power sales agreements with third parties with respect to the energy previously sold to Hydro-Québec under a power sales agreement that expired March 31, 2009. To facilitate market access, Hydro has entered into a five-year transmission service agreement with Hydro-Québec TransÉnergie to acquire access to 265 MW of transmission capacity from Labrador through Québec. Hydro has the right to renew its transmission service contract at the end of the contract term. If at that time there is a competing request for the same path, in order to renew the service agreement, Hydro must agree to accept a contract term that is at least equal to that competing request.

Pursuant to Hydro's five-year transmission service agreement with Hydro-Québec TransÉnergie, the transmission rental payments to contract maturity are as follows:

2011	\$ 19.4 million
2012	\$ 19.4 million
2013	\$ 19.4 million
2014	\$ 4.8 million

(g) Hydro has received funding, in the amount of \$3.0 million, from the Atlantic Canada Opportunities Agency in relation to a wind-hydrogen-diesel research development project in the community of Ramea. This funding is repayable in annual installments of \$25,000 per commercial implementation of the resulting product. As at December 31, 2010 there have been no commercial implementations.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**18. RELATED PARTY TRANSACTIONS**

Hydro enters into various transactions with its parents, subsidiaries and other affiliates. These transactions occur within the normal course of operations and are measured at the exchange amount, which is the amount of consideration agreed to by the related parties. Related parties with which Hydro transacts are as follows:

Related Party	Relationship
Nalcor Energy (Nalcor)	Nalcor is a 100% shareholder of Hydro.
The Province	The Province is a 100% shareholder of Nalcor.
Churchill Falls (Labrador) Corporation	Churchill Falls is a jointly controlled subsidiary of Hydro.
Lower Churchill Development Corporation	Lower Churchill Development Corporation is a wholly owned subsidiary of Hydro.
Nalcor Energy – Oil and Gas Inc.	Nalcor Energy – Oil and Gas Inc. is a wholly owned subsidiary of Nalcor.
Nalcor Energy – Bull Arm Fabrication Inc.	Nalcor Energy – Bull Arm Fabrication Inc. is a wholly owned subsidiary of Nalcor.
Gull Island Power Corporation	Gull Island Power Corporation is a wholly owned subsidiary of Nalcor.
Board of Commissioners of Public Utilities	The PUB is an agency of the Province.

The amounts included in the financial statements for related party transactions are as follows:

		Nalcor	Other Affiliates	Total
<i>(millions of dollars)</i>				
Revenue	(e)	-	2.0	2.0
Expenses	(a)(b)(c)(f)	19.8	3.2	23.0
Accounts receivable		-	3.4	3.4
Accounts payable and accrued liabilities	(c)(f)	40.4	0.1	40.5
Deferred capital contribution	(d)	-	0.1	0.1
Long-term related party note payable	(g)	25.3	-	25.3
 <i>(millions of dollars)</i>				
2009				
Revenue	(e)	-	2.0	2.0
Expenses	(a)(b)(c)(f)	21.1	3.8	24.9
Accounts receivable	(f)	-	0.2	0.2
Accounts payable and accrued liabilities	(c)(f)	20.8	0.7	21.5
Deferred capital contribution	(d)	-	0.2	0.2
Long-term related party note payable	(g)	23.9	-	23.9

- (a) Hydro has entered into a long-term power contract with Churchill Falls for the purchase of \$6.0 million (2009 - \$5.9 million) of the power produced by Churchill Falls.
- (b) For the year ended December 31, 2010, approximately \$2.5 million (2009 - \$1.2 million) of operating costs were recovered from Nalcor and \$3.4 million (2009 - \$2.7 million) from other affiliates for engineering, technical, management and administrative services. During 2010 Hydro incurred \$2.1 million (2009 - \$1.2 million) of operating costs from Nalcor for engineering, technical, management and administrative services.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**18. RELATED PARTY TRANSACTIONS (cont'd.)**

- (c) Hydro is required to contribute to the cost of operations of the PUB as well as pay for the cost of hearings into applications it makes. During 2010, Hydro incurred \$0.6 million in costs related to the PUB (2009 - \$0.6 million) of which \$0.1 million (2009 - \$0.1 million) was included in Accounts payable and accrued liabilities.
- (d) During 2010, Nalcor advanced \$2.3 million (2009 - \$1.1 million) as a contribution in aid of construction related to the Ramea Wind-Hydrogen-Diesel Project. Hydro also received contributions in aid of construction from the Province related to wind feasibility studies. As at December 31, 2010, \$0.1 million (2009 - \$0.2 million) has been recorded as a Deferred capital contribution.
- (e) During 2010, Hydro received \$0.4 million (2009 - \$0.4 million) as a rate subsidy for rural isolated customers from the Province and \$1.6 million (2009 - \$1.6 million) as an energy rebate to offset the cost of basic electricity consumption for Labrador rural isolated residential customers under the Northern Strategic Plan with \$0.3 million (2009 - \$0.1 million) recorded as Accounts receivable at year-end.
- (f) As at December 31, 2010, Hydro has a payable to Nalcor of \$40.4 million (2009- \$20.8 million) and a receivable from other affiliates for \$3.1 million (2009 – \$0.6 million payable and \$0.1 receivable). This payable/receivable consists of various intercompany operating costs and power purchases.
- (g) Hydro has a long-term related party note payable to Nalcor for \$25.3 million (2009 – \$23.9 million). The note is non-interest bearing and has no set terms of repayment.

**19. WATER MANAGEMENT AGREEMENT**

In June 2007, the Province passed an amendment to the Electrical Power Control Act, 1994 (EPCA). The amendment requires parties that utilize a common water resource in the province for power production, enter into a water management agreement. The amendment provides that any resulting water management agreement will not adversely affect existing power contracts. Churchill Falls shares the Churchill River with a Nalcor Energy proposed hydro-electric generation development downstream from Churchill Falls. On March 9, 2010, the PUB issued a Board Order establishing a water management agreement between the parties.

**20. SUBSEQUENT EVENTS**

In January 2011, Hydro entered into nine forward contracts with a notional value of \$35.7 million to hedge the foreign exchange risk on USD electricity sales. In February 2011, Hydro also entered into 20 swap contracts with a notional value of \$27.8 million to hedge the commodity price risk on electricity sales.

**21. COMPARATIVE FIGURES**

The comparative figures have been reclassified to conform with the 2010 financial statement presentation including Interest and finance charges, Other gains and losses, Accounts receivable and Accounts payable and accrued liabilities.

## Independent Auditor's Report

To the Directors of Newfoundland and Labrador Hydro

We have audited the accompanying non-consolidated financial statements of Newfoundland and Labrador Hydro, which comprise the non-consolidated balance sheet as at December 31, 2011, and the non-consolidated statements of income and retained earnings, comprehensive income and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information. The non-consolidated financial statements have been prepared by management based on the financial reporting provisions of Section 59 of The Hydro Corporation Act.

### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these non-consolidated financial statements in accordance with the financial reporting provisions of Section 59 of The Hydro Corporation Act, and for such internal control as management determines is necessary to enable the preparation of non-consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditor's Responsibility*

Our responsibility is to express an opinion on these non-consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the non-consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the non-consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the non-consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the non-consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the non-consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the non-consolidated financial statements present fairly, in all material respects, the financial position of Newfoundland and Labrador Hydro as at December 31, 2011, and the results of its operations and its cash flows for the year then ended in accordance with the financial reporting provisions of Section 59 of The Hydro Corporation Act.

*Basis of Accounting and Restrictions on Distribution and Use*

Without modifying our opinion, we draw attention to Note 2 to the non-consolidated financial statements, which describes the basis of accounting. The non-consolidated financial statements are prepared to assist Newfoundland and Labrador Hydro meet the requirements of the Newfoundland and Labrador Board of Commissioners of Public Utilities. As a result, the non-consolidated financial statements may not be suitable for another purpose. Our report is intended solely for Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities and should not be distributed to or used by parties other than Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities.

*Other Matter*

Newfoundland and Labrador Hydro has prepared separate financial statements for the year ended December 31, 2011 in accordance with Canadian generally accepted accounting principles on which we issued a standard auditor's report to the Lieutenant-Governor in Council, Province of Newfoundland and Labrador dated March 23, 2012.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. DESCRIPTION OF BUSINESS**

Newfoundland and Labrador Hydro (Hydro) is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador (Province) as a Crown corporation and is exempt from paying income taxes under Section 149 (1)(d) of the Income Tax Act. The principal activity of Hydro is the development, generation and sale of electricity.

**2. SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Presentation**

These financial statements have been prepared in accordance with the Canadian generally accepted accounting principles (GAAP). These financial statements differ materially from Canadian GAAP because they are non-consolidated. Hydro's investments in its subsidiary and jointly controlled companies have been accounted for using the equity method of accounting. Consolidated financial statements for the same period have been prepared for presentation to the Lieutenant-Governor in Council of the Province.

**Use of Estimates**

Preparation of these financial statements requires the use of estimates and assumptions that affect the amounts reported and disclosed in these statements and related notes. Key areas where management has made complex or subjective judgements include the fair value and recoverability of assets, the reported amounts of revenue and expenses, litigation, amortization and property, plant and equipment, environmental and asset retirement obligations, and other employee future benefits. Actual results may differ from these estimates, including changes as a result of future decisions made by the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB), and these differences could be material.

**Rates and Regulations (Excluding Sales by Subsidiaries)**

Hydro's revenues from its electrical sales to most customers within the Province are subject to rate regulation by the PUB. Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service (COS) methodology. The allowed rate of return on rate base is 7.4% (2010 - 7.4%). Hydro applies certain accounting policies that differ from enterprises that do not operate in a rate regulated environment. Generally these policies result in the deferral and amortization of costs or credits which will be recovered or refunded in future rates. In the absence of rate regulation these amounts would be included in the determination of net income in the year the amounts are incurred. The effects of rate regulation on the Financial Statements are more fully disclosed in Note 4.

**Cash and Cash Equivalents and Short term Investments**

Cash and cash equivalents and short term investments consist primarily of Canadian treasury bills and Banker's Acceptances (BA). Those with original maturities at date of purchase of three months or less are classified as cash equivalents whereas those with original maturities beyond three months and less than twelve months are classified as short term investments. There were no short term investments outstanding at December 31, 2011 (2010 - \$9.0 million bearing interest rates ranging from 1.07% to 1.08%). Cash and cash equivalents and short term investments are measured at fair value.

**Inventory**

Inventory is recorded at the lower of average cost and net realizable value.

**Property, Plant and Equipment**

Property, plant and equipment is recorded at cost, which comprises materials, labour, contracted services, other costs directly related to construction, and an allocation of certain overhead costs. Expenditures for additions and betterments are capitalized and normal expenditures for maintenance and repairs are charged to operations. The cost of property, plant and equipment under construction is transferred to property, plant and equipment in service when construction is completed and facilities are commissioned, at which point amortization commences.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

Construction in progress includes the costs incurred in engineering and construction of new generation, transmission and distribution facilities. Interest is charged to construction in progress at rates equivalent to Hydro's weighted average cost of capital.

Contributions in aid of construction are funds received from customers and governments toward the cost of property, plant and equipment. Contributions are recorded as a reduction to property, plant and equipment and the net property, plant and equipment is amortized.

Gains and losses on the disposal of property, plant and equipment are recognized in Other income and expense as incurred.

Amortization is calculated on hydroelectric generating plant and on transmission plant in service on the sinking fund method using interest factors ranging from 5.25% to 15.79%. Amortization on distribution system and other plant in service is calculated on the straight-line method. These methods are designed to fully amortize the cost of the facilities, after deducting contributions in aid of construction, over their estimated service lives.

Estimated service lives of the major assets are as follows:

Generation Plant	
Hydroelectric	50, 75 and 100 years
Thermal	25 and 30 years
Diesel	20 years
Transmission	
Lines	40 and 50 years
Switching stations	40 years
Distribution system	30 years
Other	3 to 50 years

Hydroelectric generation plant includes the powerhouse, turbines, governors and generators, as well as water conveying and control structures, including dams, dykes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks, and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dykes and liners and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kilovolt (kV). Switching stations assets are used to step up voltages of electricity from generating to transmission and to step down voltages for distribution.

Distribution system assets include poles, transformers, insulators, and conductors.

Other assets include telecontrol, computer software, buildings, vehicles, furniture, tools and equipment.

**Capitalized Interest**

Interest is charged to construction in progress until the project is complete at rates equivalent to the last approved weighted average cost of capital for regulated assets. Capitalized interest cannot exceed actual interest incurred.

**Impairment of Long-Lived Assets**

Hydro reviews the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. An impairment loss corresponding to the amount by which the carrying value exceeds fair value is recognized, if applicable.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Asset Retirement Obligations**

The fair value of the future expenditures required to settle legal obligations associated with the retirement of property, plant and equipment, is recognized to the extent that they are reasonably estimable. Asset retirement obligations are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. Accretion of asset retirement obligations is included in net income through Amortization. Differences between the recorded asset retirement obligation and the actual retirement costs incurred are recorded as a gain or loss in the settlement period.

**Employee Future Benefits**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions are expensed as incurred.

Hydro provides group life insurance and health care benefits on a cost shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee future benefits is accounted for on an accrual basis and has been actuarially determined using the projected benefit method prorated on service and management's best estimate of salary escalation, retirement ages of employees and expected health care costs. The excess of cumulative net actuarial gains and losses over 10% of the accrued benefit obligation is amortized over the expected average remaining service life of the employee group.

**Revenue Recognition**

Revenue is recognized on the accrual basis, as power and energy deliveries are made, and includes an estimate of the value of electricity consumed by customers in the year, but billed subsequent to year end. Sales within the Province are primarily at rates approved by the PUB, whereas sales to certain major industrial customers and export sales are either at rates under the terms of the applicable contracts, or at market rates.

**Foreign Currency Translation**

Foreign currency transactions are translated into their Canadian dollar equivalent as follows:

- (a) At the transaction date, each asset, liability, revenue or expense is translated using exchange rates in effect at that date.
- (b) At the date of settlement and at each balance sheet date, monetary assets and liabilities are adjusted to reflect exchange rates in effect at that date. Any resulting gain or loss is reflected in income, except gains or losses on purchases of fuel which are included in the cost of fuel inventory.

**Financial Instruments and Hedging Activities**

**Financial Instruments**

Financial assets and financial liabilities are recognized on the balance sheet when Hydro becomes a party to the contractual provisions of the instrument and are initially measured at fair value. Subsequent measurement is based on classification. Hydro has classified each of its financial instruments into the following categories: financial assets and liabilities held for trading; loans and receivables; financial assets held to maturity; financial assets available for sale; and other financial liabilities.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Financial Instruments and Hedging Activities (cont'd.)**

**Financial Instruments (cont'd.)**

Hydro has classified its financial instruments as follows:

Cash and cash equivalents	Held for trading
Short term investments	Available for sale
Accounts receivable	Loans and receivables
Derivative assets	Held for trading
Sinking funds - investments in same Hydro issue	Held to maturity
Sinking funds - other investments	Available for sale
Long term receivables	Loans and receivables
Accounts payable and accrued liabilities	Other liabilities
Accrued interest	Other liabilities
Derivative liabilities	Held for trading
Long term debt	Other liabilities
Long term related party note payable	Other liabilities

Each of these financial instruments is measured at amortized cost, except for cash and cash equivalents, short term investments and sinking fund – other investments, derivative assets and derivative liabilities which are measured at fair value.

Transaction costs related to financial assets and financial liabilities are included as part of the cost of the instrument, with the exception of cash and cash equivalents and short term investments which are expensed as incurred through interest and finance charges, based upon the pricing obtained during the quotation process. Discounts and premiums on financial instruments are amortized to income over the life of the instrument.

**Derivative Instruments and Hedging Activities**

Derivative instruments are utilized by Hydro to manage market risk. Hydro's policy is not to utilize derivative instruments for speculative purposes. Hydro may choose to designate derivative instruments as hedges and apply hedge accounting if there is a high degree of correlation between price movements in the derivative instruments and the hedged items. Hydro formally documents all hedges and the risk management objectives at the inception of the hedge. Derivative instruments that have been designated and qualify for hedge accounting are classified as either cash flow or fair value hedges.

During the year, Hydro had foreign exchange forward contracts designated as cash flow hedges (Note 13). In a cash flow hedge relationship, the portion of unrealized gains or losses on the hedging item that is determined to be an effective hedge is recognized in Other Comprehensive Income (OCI), while the ineffective portion is recorded in net income. The amounts recognized in OCI are reclassified in net income when the hedged item affects net income. Hydro had no cash flow hedges in place on December 31, 2011.

Hydro had no fair value hedges in place at December 31, 2011 or 2010.

**Future Accounting Changes – International Financial Reporting Standards (IFRS)**

In October 2010, the Canadian Accounting Standards Board (AcSB) amended the introduction to Part 1 of the CICA Handbook – Accounting to allow qualifying entities with rate-regulated activities to defer the adoption of IFRS to January 1, 2012. Hydro is a qualifying entity and chose to use the deferral option.

Although IFRS and Canadian Generally Accepted Accounting Principles are based on a similar conceptual framework there are a number of differences in recognition, measurement and disclosure. They areas with the highest potential impact on Hydro are property, plant and equipment, regulatory assets and liabilities.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**Future Accounting Changes (cont'd.)**

The IASB has deferred its work on rate-regulated activities accounting project and has not provided interim guidance for the recognition and measurement of regulatory assets and liabilities. Accordingly, Hydro continues to assess existing IFRS guidance to determine the impact of differences that will apply to accounting for rate-regulated activities upon adoption of IFRS. In December 2011, Hydro applied to the PUB for approval to use IFRS as the basis for regulatory reporting.

Hydro continues to assess the financial reporting impacts of the adoption of IFRS; however, the impact of IFRS will depend on the IFRS standards in effect at the time of conversion on January 1, 2012 and the accounting elections made.

**3. PROPERTY, PLANT AND EQUIPMENT**

	Property Plant and Equipment In Service	Contributions				Net Book Value
		In Aid of Construction	Accumulated Amortization	Construction In Progress		
<i>(millions of dollars)</i>						<b>2011</b>

Total regulatory liabilities	<b>170.9</b>	159.8	
Less current portion	<b>137.6</b>	118.9	
	<b>33.3</b>	<b>40.9</b>	

Regulatory assets represent future revenues associated with certain costs, incurred in current or prior periods that are expected to be recovered from customers in future periods through the rate-setting process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are expected to be refunded to customers as a result of the rate-setting process. Amounts deferred as regulatory assets and liabilities are subject to PUB approval. The risks and uncertainties related to regulatory assets and liabilities are subject to periodic assessment. When Hydro considers that the value of these regulatory assets or liabilities is no longer likely to be recovered or repaid through future rate adjustments, the carrying amount is reflected in operations. The following is a description of each of the circumstances in which rate regulation affects the accounting for a transaction or event.

**Rate Stabilization Plan**

On January 1, 1986, Hydro, having received the approval of the PUB, implemented a rate stabilization plan (RSP) which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, levels of precipitation and load. Adjustments required in retail rates to cover the amortization of the balance in the plan are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

Balances accumulating in the RSP, including financing charges, are to be recovered or refunded in the following year, with the exception of hydraulic variation, which will be recovered or refunded at a rate of twenty five percent of the outstanding balance at year end. Additionally, a fuel rider is calculated annually based on the forecast fuel price and is added to or subtracted from the rates that would otherwise be in effect. A portion of the RSP balance totaling approximately \$100 million has been set aside by the PUB and will be subject to a future regulatory ruling on the allocation between the industrial customers and retail customers. This balance is mainly due to fuel savings at the Holyrood Thermal Generating Station (HTGS) as a result of the shut down of a portion of the pulp and paper industry in the province since 2007.

Hydro recognizes the RSP balances as a regulatory asset or liability based on the expectation that rates will be adjusted annually to provide for the collection from, or refund to, customers in future periods. In the absence of rate regulation, Canadian GAAP would require that the cost of fuel be recognized as an operating expense in the period in which it was consumed. In 2011, \$20.9 million was deferred (2010 - \$23.3 million recognized) in the RSP and \$25.4 million (2010 - \$2.3 million) was recovered through rates and included in energy sales, with the corresponding cost amortized in fuels expenses.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**4. REGULATORY ASSETS AND LIABILITIES (cont'd.)**

**Deferred Foreign Exchange Losses**

Hydro incurred foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt in 1975 and 1985, respectively, which were recognized when the debt was repaid in 1997. The PUB has accepted the inclusion of realized foreign exchange losses related to long term debt in rates charged to customers in future periods. Any such loss, net of any gain, is deferred to the time of the next rate hearing for inclusion in the new rates to be set at that time. Accordingly, these losses are recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include the losses in operating costs, in each year that the related debt was outstanding, to reflect the exchange rates in effect on each reporting date.

Commencing in 2002, the PUB ordered Hydro's deferred realized foreign exchange losses be amortized over a forty year period. This amortization, of \$2.1 million annually, is included in interest expense (Note 14).

**Deferred Major Extraordinary Repairs**

In its report dated April 13, 1992, the PUB recommended that Hydro adopt a policy of deferring and amortizing the costs of major extraordinary repairs in excess of \$0.5 million, subject to PUB approval on a case-by-case basis. In 2005, Hydro started an asbestos abatement program at the HTGS. This program was carried out over a three year period. Pursuant to Order No. P.U. 2 (2005), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, the costs incurred in each year of the program were recognized as a regulatory asset to be amortized over the subsequent five year period. In 2006, Hydro incurred \$2.3 million in expenses to repair a boiler tube failure at the HTGS. Pursuant to Order No. P.U. 44 (2006), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, these costs are being amortized over a five year period. In the absence of rate regulation, Canadian GAAP would require that Hydro expense the cost of the asbestos abatement program and the boiler tube repairs in the year incurred. In 2011, \$1.7 million (2010 - \$2.6 million) of amortization was recognized in Operations and administration expense.

**Deferred Energy Conservation Costs**

Pursuant to Order No. P.U. 14 (2009), Hydro received approval to defer costs associated with an electrical conservation program for residential, industrial, and commercial sectors. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include this program as operating costs in the year incurred. In 2011, \$0.5 million (2010 - \$0.4 million) was deferred.

**Deferred Purchased Power Savings**

In 1997, Hydro interconnected communities in the area of L'Anse au Clair to Red Bay to the Hydro-Québec system. In its report dated July 12, 1996, the PUB recommended that Hydro defer and amortize the benefits of a reduced initial purchased power rate over a 30 year period. These savings in the amount of \$0.6 million (2010 - \$0.6 million) are recognized as a regulatory liability. In the absence of rate regulation, Canadian GAAP would require that Hydro include the actual cost of purchased power in operating costs in the year incurred.

**Property, Plant and Equipment**

The PUB permits an allowance for funds used during construction (AFUDC), based on Hydro's weighted average cost of capital, to be included in the cost of capital assets and amortized over future periods as part of the total cost of the related asset. In 2011, Hydro's AFUDC of 7.6% is lower than its cost of debt of 8.4% and the amount capitalized is lower and interest expense is higher by \$0.2 million than that which would be permitted under Canadian GAAP in the absence of rate regulation. In 2010, Hydro's AFUDC of 7.6% is higher than its cost of debt of 7.2% and the amount capitalized is higher and interest expense is lower by \$0.1 million than that which would be permitted under Canadian GAAP in the absence of rate regulation.

Hydro amortizes its hydroelectric generating assets and transmission assets using the sinking fund method, as approved by the PUB. In the absence of rate regulation, these assets would likely be amortized using the straight-line method.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**4. REGULATORY ASSETS AND LIABILITIES (cont'd.)**

**Property, Plant and Equipment (cont'd.)**

During 2010, Hydro engaged an independent consultant to conduct an amortization study. The scope of this study included a review of Hydro's amortization methods as well as a statistical analysis of service life estimates and calculation of appropriate amortization rates and annual and accrued amortization balances as at December 31, 2009. Based on the results of this study, management currently estimates that switching from the use of sinking fund rather than straight-line amortization for hydroelectric and transmission assets, as well as changing from unit based amortization to a group based method on a remaining life basis and implementing the recommended service lives; would have resulted in an estimated decrease of \$1.0 million in the annual amortization expense. In December 2011, Hydro applied to the PUB requesting approval of these recommended changes. Approval has not yet been received.

**5. LONG TERM RECEIVABLES**

Included in long term receivables are two refundable deposits in the amount of \$1.3 million (2010 - \$1.2 million) associated with an application for transmission service into Nova Scotia, bearing interest at the Prime Rate less 1% and a \$0.1 million (2010 - \$0.1 million) deposit associated with an application for transmission service in New Brunswick, bearing interest at the Prime Rate. During 2011, Hydro-Québec refunded two deposits totalling \$24.1 million associated with applications for transmission service through Québec. The remaining balance of \$0.2 million (2010 - \$0.3 million) is the non-current portion of receivables associated with customer time payment plans and the long term portion of employee purchase programs.

**6. INVESTMENTS**

<i>(millions of dollars)</i>	<b>Ownership Interest</b>	<b>2011</b>	<b>2010</b>
Churchill Falls (Labrador) Corporation	65.8%		
Shares, at cost		<b>167.2</b>	167.2
Equity in retained earnings at beginning of year		<b>217.1</b>	200.5
Equity in net income for the year		<b>14.9</b>	16.6
		<b>399.2</b>	384.3

Effective June 18, 1999, the two shareholders of Churchill Falls, Hydro and Hydro-Québec, entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of Churchill Falls be subject to joint approval by representatives of Hydro and Hydro-Québec.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**7. LONG TERM DEBT**

Details of long term debt are as follows:

Series	Face Value	Coupon Rate %	Year of Issue	Year of Maturity	2011	2010
<i>(millions of dollars)</i>						
V *	125.0	10.50	1989	2014	<b>124.7</b>	124.6
X *	150.0	10.25	1992	2017	<b>149.4</b>	149.3
Y *	300.0	8.40	1996	2026	<b>293.5</b>	293.3
AB *	300.0	6.65	2001	2031	<b>306.5</b>	306.7
AD *	125.0	5.70	2003	2033	<b>123.6</b>	123.6
AE	<u>225.0</u>	4.30	2006	2016	<b>224.0</b>	223.8
Total debentures	<u>1,225.0</u>				<b>1,221.7</b>	1,221.3
Less sinking fund investments in own debentures					<b>82.0</b>	76.4
					<b>1,139.7</b>	1,144.9
Less: payments due within one year					<b>8.2</b>	8.2
					<b>1,131.5</b>	<u>1,136.7</u>

\* Sinking funds have been established for these issues.

Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada, provincial governments or Schedule 1 banks, and have maturity dates ranging from 2013 to 2033. Hydro debentures, which are intended to be held to maturity, are deducted from long term debt while all other sinking fund investments are shown separately on the balance sheet as assets. Annual contributions to the various sinking funds are in accordance with bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 3.12% to 9.86% (2010 - 3.86% to 9.86%).

Promissory notes, debentures and long term loans are unsecured and unconditionally guaranteed as to principal and interest and, where applicable, sinking fund payments by the Province. The Province charges Hydro a guarantee fee of 25 bps annually on total debt (net of sinking funds) with a remaining term to maturity less than ten years and 50 bps annually on total debt (net of sinking funds) with a remaining term to maturity greater than 10 years. This fee was waived for 2010. The fee for 2011 was \$3.9 million.

Hydro uses promissory notes to fulfill its short term funding requirements. As at December 31, 2011 there were no promissory notes outstanding (2010 - nil).

Hydro maintains a \$50.0 million Canadian or US equivalent unsecured demand operating credit facility with its banker and at year end there were no amounts drawn on the facility (2010 - nil). Advances may take the form of a Prime Rate advance or the issuance of a BA with interest calculated at the Prime Rate or prevailing Government BA fee. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the Prime Rate. At year end, Hydro had 24 letters of credit outstanding (Note 17(e)) reducing the availability of the credit facility by \$18.9 million (2010 - \$18.9 million).

Required repayments of long term debt and sinking fund requirements over the next five years will be as follows:

<i>(millions of dollars)</i>	2012	2013	2014	2015	2016
Sinking fund requirement	8.2	8.2	8.2	8.2	8.2
Long term debt repayment	-	-	125.0	-	225.0
	<u>8.2</u>	<u>8.2</u>	<u>133.2</u>	<u>8.2</u>	<u>233.2</u>

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**8. ASSET RETIREMENT OBLIGATIONS**

Hydro has recognized liabilities associated with the retirement of portions of the HTGS and disposal of Polychlorinated Biphenyls (PCB). The reconciliation of the beginning and ending carrying amount of asset retirement obligations is as follows:

<i>(millions of dollars)</i>	<b>2011</b>	<b>2010</b>
Asset retirement obligation, beginning of year	<b>11.4</b>	-
Liabilities incurred	<b>2.2</b>	11.4
Revisions	<b>5.5</b>	-
Accretion	<b>0.5</b>	-
Asset retirement obligation, end of year	<b>19.6</b>	<b>11.4</b>

The total undiscounted estimated cash flows required to settle the HTGS obligations at December 31, 2011 are \$27.0 million (2010 - \$20.5 million). Payments to settle the liability are expected to occur between 2021 and 2024. The fair value of the asset retirement obligations was determined using the present value of future cash flows discounted at the Company's credit adjusted risk free rate of 2.9% (2010 - 4.1%).

The total undiscounted estimated cash flows required to settle the PCB obligations at December 31, 2011 are \$2.7 million. Payments to settle the liability are expected to occur between 2012 and 2025. The fair value of the asset retirement obligations was determined using the present value of future cash flows discounted at the Company's credit adjusted risk free rate of 3.1%.

A significant number of Hydro's assets include generation plants, transmission assets and distribution systems. These assets can continue to run indefinitely with ongoing maintenance activities. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related asset retirement obligation cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is legally required to remove, an asset retirement obligation for those assets will be recognized at that time.

**9. EMPLOYEE FUTURE BENEFITS**

**Pension Plan**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions of \$4.3 million (2010 - \$4.1 million) are expensed as incurred.

**Other Benefits**

Hydro provides group life insurance and healthcare benefits on a cost shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2011, cash payments to beneficiaries for its unfunded other employee future benefits were \$2.2 million (2010 - \$1.8 million). An actuarial valuation was performed on December 31, 2009 and extrapolated to December 31, 2011. The next actuarial valuation will be performed as at December 31, 2012.

**12. CAPITAL MANAGEMENT**

Hydro's principal business requires ongoing access to capital in order to maintain the continued delivery of safe and reliable service to its customers. Therefore, Hydro's primary objective when managing capital is to ensure ready access to capital at a reasonable cost.

The capital managed by Hydro is comprised of debt (long term debentures, promissory notes, bank credit facilities and bank indebtedness) and equity (share capital, contributed capital, accumulated other comprehensive income and retained earnings).

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**12. CAPITAL MANAGEMENT (cont'd.)**

A summary of the capital structure is outlined below:

<i>(millions of dollars)</i>	<b>2011</b>	<b>2010</b>
<b>Debt</b>		
Long term debt	1,131.5	1,136.7
Current portion of long term debt	8.2	8.2
Sinking funds	<u>(247.0)</u>	<u>(208.4)</u>
	892.7	936.5
	54.3%	56.5%
<b>Equity</b>		
Share capital	22.5	22.5
Contributed capital	115.4	115.4
Accumulated other comprehensive income	45.1	26.7
Retained earnings	<u>568.8</u>	<u>557.5</u>
	751.8	722.1
	45.7%	43.5%
<b>Total debt and equity</b>	<b><u>1,644.5</u></b>	<b><u>1,658.6</u></b>
	<b>100.0%</b>	<b>100.0%</b>

Hydro's principal business requires ongoing access to capital in order to maintain the continued delivery of safe and reliable service to its customers. Therefore, Hydro's primary objective when managing capital is to ensure ready access to capital at a reasonable cost.

Hydro's approach to capital management encompasses various factors including monitoring the percentage of floating rate debt in the total debt portfolio, the weighted average term to maturity of its overall debt portfolio, its percentage of debt to debt plus equity and its earnings before interest and taxes (EBIT) coverage of interest.

For the regulated portion of Hydro's operations a capital structure comprised of 75% debt and 25% common equity is maintained, a ratio which management believes to be optimal with respect to its cost of capital. This capital structure is maintained by a combination of dividend policy, contributed equity and debt issuance. The issuance of any new debt with a term greater than one year requires prior approval of Hydro's regulator, the PUB.

Per legislation, the total of the short term loans issued by Hydro and outstanding at any time, shall not exceed a limit as fixed by the Lieutenant-Governor in Council. Short term loans are those loans issued with a term not exceeding two years. The current limit is set at \$300 million. There was no balance outstanding as at December 31, 2011 and 2010. Issuance of long term and short term debt by Hydro is further restricted by Bill C-24, an amendment to the Newfoundland and Labrador Hydro Act of 1975. The Bill effectively limits Hydro's total borrowings, which includes both long and short term debt, to \$1.6 billion at any point in time.

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**Fair Value**

The estimated fair values of financial instruments as at December 31, 2011 and 2010 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates below are not necessarily indicative of the amounts that Hydro might receive or incur in actual market transactions.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Fair Value (cont'd.)**

As a significant number of Hydro's assets and liabilities do not meet the definition of a financial instrument, the fair value estimates below do not reflect the fair value of Hydro as a whole.

(millions of dollars)	Carrying Value	Fair Value	Carrying Value	Fair Value
			2011	2010
<b>Financial assets</b>				
Cash and cash equivalents	<b>6.7</b>	<b>6.7</b>	37.7	37.7
Short term investments	-	-	9.0	9.0
Accounts receivable	<b>83.1</b>	<b>83.1</b>	70.0	70.0
Derivative assets	<b>0.2</b>	<b>0.2</b>	2.0	2.0
Sinking funds - investments in same Hydro issue	<b>82.0</b>	<b>103.7</b>	76.4	93.6
Sinking funds - other investments	<b>247.0</b>	<b>247.0</b>	208.4	208.4
Long term receivable <sup>(1)</sup>	<b>1.6</b>	n/a	25.7	n/a
<b>Financial liabilities</b>				
Accounts payable and accrued liabilities	<b>102.1</b>	<b>102.1</b>	107.6	107.6
Accrued interest	<b>28.7</b>	<b>28.7</b>	28.7	28.7
Derivative liabilities	-	-	0.3	0.3
Long term debt including amount due within one year (before sinking funds)	<b>1,221.7</b>	<b>1,695.3</b>	1,221.3	1,589.7
Long term related party note payable <sup>(1)</sup>	<b>1.3</b>	n/a	25.3	n/a

The fair value of cash and cash equivalents, short term investments, accounts receivable, accounts payable and accrued liabilities, accrued interest approximates their carrying values due to their short term maturity.

<sup>(1)</sup> The fair value of the long term receivable and long term related party note payable is subject to uncertainty regarding the timing of future cash flows and as such, the fair value of the long term receivable cannot be determined at December 31, 2011 and 2010.

**Establishing Fair Value**

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Fair Value (cont'd.)**

Establishing Fair Value (cont'd.)

The following table presents Hydro's fair value hierarchy for financial assets and liabilities as at December 31. There were no transfers between Level 1 and Level 2 during the year:

	Level 1	Level 2	Total
<i>(millions of dollars)</i>		2011	
<b>Financial assets</b>			
Cash and cash equivalents	6.7	-	6.7
Accounts receivable	83.1	-	83.1
Derivative assets	-	0.2	0.2
Sinking funds - investments in same Hydro issue	-	103.7	103.7
Sinking funds - other investments	-	247.0	247.0
<b>Financial liabilities</b>			
Accounts payable and accrued liabilities	102.1	-	102.1
Accrued interest	28.7	-	28.7
Derivative liabilities	-	-	-
Long term debt including amount due within one year (before sinking funds)	-	1,695.3	1,695.3
		Level 1	Level 2
		2010	Total
<b>Financial assets</b>			
Cash and cash equivalents	37.7	-	37.7
Short term investments	9.0	-	9.0
Accounts receivable	70.0	-	70.0
Derivative assets	-	2.0	2.0
Sinking funds - investments in same Hydro issue	-	93.6	93.6
Sinking funds - other investments	-	208.4	208.4
<b>Financial liabilities</b>			
Accounts payable and accrued liabilities	107.6	-	107.6
Accrued interest	28.7	-	28.7
Derivative liabilities	-	0.3	0.3
Long term debt including amount due within one year (before sinking funds)	-	1,589.7	1,589.7

There were no financial assets or liabilities valued using Level 3 of the fair value hierarchy as at December 31, 2011 and 2010.

**Risk Management**

Exposure to credit risk, liquidity risk and market risk arises in the normal course of Hydro's business.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management (cont'd.)**

**Credit Risk**

Hydro is exposed to credit risk in the event of non-performance by counterparties to its financial instruments. The majority of the receivables are from regulated utilities which minimizes credit risk. There is risk that Hydro will not be able to collect all of its remaining accounts receivable and amounts owing under its customer finance plans. These financial instruments which arise in the normal course of business do not represent a significant concentration of credit risk as amounts are owed by a large number of customers on normal credit terms. Hydro manages this credit risk primarily by executing its credit and collection policy including the requirement for security deposits from certain customers. As at December 31, 2011 security deposits of \$0.3 million (2010 - \$0.1 million) are included in accounts payable and accrued liabilities.

Hydro's three largest customers account for 78% (2010 - 80%) of total energy sales and 71% (2010 - 67%) of accounts receivable. These customers are comprised of rate regulated organizations or organizations with an investment grade credit rating.

Hydro does not have any significant amounts that are past due and uncollectable for which a provision has not been recognized at December 31, 2011.

Hydro manages its investment credit risk exposure by restricting its investments to high-quality securities such as Canada Treasury Bills, Provincial Treasury Bills, Bankers' Acceptances drawn on Schedule 1 Canadian Chartered Banks and Term Deposits issued by Schedule 1 Canadian Chartered Banks.

**Liquidity Risk**

Hydro is exposed to liquidity risk with respect to its contractual obligations and financial liabilities. This risk is managed by maintaining borrowing facilities sufficient to cover both anticipated and unexpected fluctuations within the operations and by continuously monitoring cash flows.

Short term liquidity is provided through cash and cash equivalents on hand, funds from operations, a \$300.0 million promissory note program and credit facilities.

Long term liquidity risk is managed by the issuance of a portfolio of debentures with maturity dates ranging from 2014 to 2033. Sinking funds have been established for these issues with the exception of Series AE.

The following are the contractual maturities of Hydro's financial liabilities, including principal and interest, as at December 31, 2011:

<i>(millions of dollars)</i>	<b>&lt; 1 Year</b>	<b>1-3 Years</b>	<b>3-5 Years</b>	<b>&gt; 5 Years</b>	<b>Total</b>
Accounts payable and accrued liabilities	<b>102.1</b>	-	-	-	<b>102.1</b>
Accrued interest	<b>28.7</b>	-	-	-	<b>28.7</b>
Long term debt including amount due within one year	-	<b>125.0</b>	<b>225.0</b>	<b>875.0</b>	<b>1,225.0</b>
Interest	<b>61.8</b>	<b>173.7</b>	<b>152.6</b>	<b>649.2</b>	<b>1,037.3</b>
	<b>192.6</b>	<b>298.7</b>	<b>377.6</b>	<b>1,524.2</b>	<b>2,393.1</b>

**Market Risk**

Market risk refers primarily to the risk of loss resulting from changes in interest rates, commodity prices and foreign exchange rates. Hydro has a formal financial risk management policy that outlines the risks associated with the operations of Hydro and its subsidiaries outlining approaches and guidelines to be followed in the management of those risks. This policy is reviewed by the Board annually or more frequently if there is a material change to Hydro's financial risks. The Audit Committee provides oversight on behalf of the Board with the exception of any items that specifically require Board approval.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**Risk Management (cont'd.)**

**Market Risk (cont'd.)**

*Interest Rates*

Interest rate risk is managed within the corporate financing strategy whereby floating rate debt exposures and interest rate scenarios are forecast and evaluated. A diversified portfolio of fixed and floating rate debt is maintained and managed with a view to an acceptable risk profile. Key quantitative parameters for interest rate risk management includes the percentage of floating rate debt in the total debt portfolio, coupled with an examination of the weighted average term to maturity of the entire debt portfolio. By setting clear guidelines in respect to these quantitative parameters, Hydro attempts to minimize the likelihood of a material impact on net income resulting from an unexpected change in interest rates.

Hydro is exposed to interest rate risk related to the short term debt portfolio and the sinking fund investment portfolio. Interest rate risk on the long term debt portfolio is mitigated through the use of fixed rate debentures. The following table illustrates Hydro's exposure to a 50 basis point (0.5%) change in interest rates:

(millions of dollars)	Net Income				Other Comprehensive Income			
	0.5% Decrease		0.5 % Increase		0.5% Decrease		0.5% Increase	
	-	-	-	-	20.0	(2.7)	20.0	(2.7)
Interest on sinking funds	-	-	-	-	20.0	(2.7)	20.0	(2.7)

*Foreign Currency and Commodity Exposure*

The fair value of future cash flows of a financial instrument will fluctuate due to changes in the exchange rate between the foreign currency and the Canadian dollar impact of change in market prices. Hydro's primary exposure to both foreign exchange and commodity price risk arises within Hydro from its purchases of No. 6 fuel for consumption at the HTGS and certain electricity sales both of which are denominated in USD.

During 2011, Hydro had total purchases of No. 6 fuel of \$135.1 million (2010 - \$104.1 million) denominated in USD. Exposure to both the foreign exchange and commodity price risk associated with these fuel purchases is mitigated through the operation of the RSP. The purpose of the RSP is to both reduce volatility in customer rates as well as mitigate potential net income volatility from fuel price and volume variations. All variances in fuel prices including exchange rates, as compared to that approved in Hydro's most recent cost of service study, are captured in the RSP and are either refunded to or collected from customers through rate adjustments. Hydro also employs the periodic use of forward currency contracts to manage exposure to exchange rates on a particular day.

During 2011, total electricity sales denominated in USD were \$67.9 million (2010 - \$72.8 million). Hydro mitigates the foreign exchange and commodity price risk through the use of commodity swaps and foreign currency forward contracts.

During 2009, Hydro entered into a series of 24 monthly foreign exchange forward contracts with a notional value of \$87.9 million USD to hedge foreign exchange risk on approximately 75% of Hydro's USD electricity sales. These contracts had an average exchange rate of \$1.17 CAD per USD. These contracts were designated as part of a hedging relationship. The last of these contracts expired in April 2011.

During 2011, Hydro entered into a series of 9 monthly foreign exchange forward contracts with a notional value of \$35.7 million USD to hedge foreign exchange risk on approximately 75% of Hydro's USD electricity sale. These contracts had an average exchange rate of \$1.00 CAD per USD.

**Market Risk (cont'd.)**

*Foreign Currency and Commodity Exposure (cont'd.)*

In 2011, Hydro also entered into 20 commodity swap contracts with a notional value of \$27.8 million USD to hedge commodity price risk on electricity sales. These contracts swapped floating market rates for fixed rates, with Hydro receiving an average fixed rate of \$35.37 USD/MWh (2010 - \$36.01 USD/MWh). During 2011, \$1.9 million in losses from these commodity contracts were included in Other income and expense (2010 - \$3.4 million).

**Effect of Hedge Accounting on Financial Statements**

	Net Gains Included in Net Income	Unrealized Gains Included in OCI	Net Gains Included in Net Income	Unrealized Gains Included in OCI
(millions of dollars)		2011		2010
Ineffective portion	(0.1)	-	0.2	-
Effective portion	1.5	-	5.9	1.3

The ineffective portion of hedging gains and losses is included in net income through Other income and expense.

Interest paid	90.6	90.5

**16. SEGMENT INFORMATION**

Hydro operates in three business segments. Hydro Regulated encompasses sales of power and energy to customers within the Province, non-regulated activities are primarily engaged in energy marketing sales outside of the Province. The designation of segments has been based on regulatory status and management accountability. The segments' accounting policies are the same as those previously described in Note 2.

<i>(millions of dollars)</i>	Hydro Regulated	Non- Regulated Activities	Energy Marketing	Total

---

**17. COMMITMENTS AND CONTINGENCIES**

- (a) Hydro has received claims instituted by various companies and individuals with respect to outages and other miscellaneous matters. Although such matters cannot be predicted with certainty, management currently considers Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, to be \$0.1 million (2010 - \$0.1 million).
- (b) One of Hydro's industrial customers commenced legal proceedings in 1997, claiming approximately \$21.9 million (2010 - \$21.8 million) related to outages and plant shutdowns. Hydro is defending this claim. While the ultimate outcome of this action cannot be ascertained at this time, in the opinion of Hydro's management, following consultation with its legal counsel, no liability should be recognized.
- (c) Outstanding commitments for capital projects total approximately \$18.0 million (2010 - \$11.0 million).
- (d) Hydro has entered into a number of long term power purchase agreements as follows:

Type	Rating	In-service Date	Term
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	4 MW	1998	25 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2009	20 years

Estimated payments due in each of the next five years are as follows:

<i>(millions of dollars)</i>	2012	2013	2014	2015	2016
Power purchases	24.8	25.5	26.1	26.8	27.3

- (e) Hydro has issued 23 irrevocable letters of credit to the New Brunswick System Operator totalling \$18.6 million as credit support related to applications for point to point transmission service. In addition, Hydro has issued one letter of credit to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement.
- (f) Hydro has entered into power sales agreements with third parties. To facilitate market access, Hydro has entered into a five year transmission service agreement with Hydro-Québec TransÉnergie to acquire access to 265 MW of transmission capacity from Labrador through Québec. Hydro has the right to renew its transmission service contract at the end of the contract term. If at that time there is a competing request for the same path, in order to renew the service agreement, Hydro must agree to accept a contract term that is at least equal to that competing request.

Pursuant to Hydro's five year transmission service agreement with Hydro-Québec TransÉnergie, the transmission rental payments to contract maturity are as follows:

2012	\$ 19.0 million
2013	\$ 19.0 million
2014	\$ 4.8 million

- (g) Hydro has received funding, in the amount of \$3.0 million, from the Atlantic Canada Opportunities Agency in relation to a wind-hydrogen-diesel research development project in the community of Ramea. This funding is repayable in annual installments of \$25,000 per commercial implementation of the resulting product. As at December 31, 2011 there have been no commercial implementations.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

**18. RELATED PARTY TRANSACTIONS**

Hydro enters into various transactions with its parents, subsidiaries and other affiliates. These transactions occur within the normal course of operations and are measured at the exchange amount, which is the amount of consideration agreed to by the related parties. Related parties with which Hydro transacts are as follows:

Related Party	Relationship
Nalcor Energy (Nalcor)	100% shareholder of Hydro.
The Province	100% shareholder of Nalcor.
Churchill Falls (Labrador) Corporation	Jointly controlled subsidiary of Hydro.
Lower Churchill Development Corporation	Wholly owned subsidiary of Hydro.
Nalcor Energy – Oil and Gas Inc.	Wholly owned subsidiary of Nalcor.
Nalcor Energy – Bull Arm Fabrication Inc.	Wholly owned subsidiary of Nalcor.
Gull Island Power Corporation	Wholly owned subsidiary of Nalcor.
Board of Commissioners of Public Utilities	Agency of the Province.

The amounts included in the financial statements for related party transactions are as follows:

		Nalcor	Other Affiliates	Total	
<i>(millions of dollars)</i>		<b>2011</b>			
Revenue	(e)	-	2.1	2.1	
Expenses	(a)(b)(c)(f)(i)	25.6	7.7	33.3	
Accounts receivable		<b>2010</b>			
Accounts payable and accrued liabilities	(c)(f)(i)	49.4	4.5	53.9	
Deferred capital contribution	(d)	-	3.5	3.5	
Long term related party note payable	(g)	1.3	-	1.3	
<i>(millions of dollars)</i>		<b>2010</b>			
Revenue	(e)	-	2.0	2.0	
Expenses	(a)(b)(c)(f)	19.8	3.2	23.0	
Accounts receivable	(e)(f)	-	3.4	3.4	
Accounts payable and accrued liabilities	(c)(f)	40.4	0.1	40.5	
Deferred capital contribution	(d)	-	0.1	0.1	
Long term related party note payable	(g)	25.3	-	25.3	

- (a) Hydro has entered into a long term power contract with Churchill Falls for the purchase of \$6.0 million (2010 - \$6.0 million) of the power produced by Churchill Falls.
- (b) For the year ended December 31, 2011, approximately \$2.8 million (2010 - \$2.5 million) of operating costs were recovered from Nalcor and \$3.4 million (2010 - \$3.4 million) from other affiliates for engineering, technical, management and administrative services. During 2011 Hydro incurred \$2.8 million (2010 - \$2.1 million) of operating costs from Nalcor for engineering, technical, management and administrative services.
- (c) Hydro is required to contribute to the cost of operations of the PUB as well as pay for the cost of hearings into applications it makes. During 2011, Hydro incurred \$1.2 million (2010 - \$0.6 million) in costs related to the PUB of which \$0.6 million (2010 - \$0.1 million) was included in Accounts payable and accrued liabilities.

**NEWFOUNDLAND AND LABRADOR HYDRO**  
**NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS**

---

**18. RELATED PARTY TRANSACTIONS (cont'd.)**

- (d) During 2011, Nalcor advanced \$0.7 million (2010 - \$2.3 million) as a contribution in aid of construction related to the Ramea Wind-Hydrogen-Diesel Project. Hydro also received contributions in aid of construction from the Province related to wind feasibility studies and as at December 31, 2011, \$3.5 million (2010 - \$0.1 million) has been recorded as a Deferred capital contribution.
- (e) During 2011, Hydro received \$0.4 million (2010 - \$0.4 million) as a rate subsidy for rural isolated customers from the Province and \$1.7 million (2010 - \$1.6 million) as an energy rebate to offset the cost of basic electricity consumption for Labrador rural isolated residential customers under the Northern Strategic Plan with \$0.3 million (2010 - \$0.3 million) recorded as Accounts receivable at year end.
- (f) As at December 31, 2011, Hydro has a payable to Nalcor of \$49.4 million (2010 - \$40.4 million) and a net receivable from other affiliates for \$0.1 million (2010 - \$3.1 million). This payable/receivable consists of various intercompany operating costs and power purchases.
- (g) Hydro has a long term related party note payable to Nalcor for \$1.3 million (2010 - \$25.3 million). The note is non-interest bearing and has no set terms of repayment.
- (h) On January 19, 2011, the PUB issued Board Order No. P.U. 1(2011) approving a modification to the RSP rules to reduce the balance owing to industrial customers by \$10.0 million. The order also approved Hydro's reimbursement of the amount to the Province. The payment was made to the Province on January 27, 2011.
- (i) During 2011, Hydro incurred a debt guarantee fee from the Province of \$3.9 million (2010 - nil). This amount remains payable at December 31, 2011.
- (j) Hydro has an amount receivable from the Department of Natural Resources of \$0.3 million (2010 - nil) related to Coastal Labrador Efficiency Project.

**19. COMPARATIVE FIGURES**

The comparative figures have been reclassified to conform with the 2011 financial statement presentation including Operations and administration, Other income and expense, Accounts receivable and Long term receivables.

## Independent Auditor's Report

To the Directors of Newfoundland and Labrador Hydro

We have audited the accompanying non-consolidated financial statements of Newfoundland and Labrador Hydro, which comprise the non-consolidated balance sheet as at December 31, 2012, and the non-consolidated statements of income and retained earnings, comprehensive income and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information. The non-consolidated financial statements have been prepared by management based on the financial reporting provisions of Section 59 of The Hydro Corporation Act.

### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these non-consolidated financial statements in accordance with the financial reporting provisions of Section 59 of The Hydro Corporation Act, and for such internal control as management determines is necessary to enable the preparation of non-consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditor's Responsibility*

Our responsibility is to express an opinion on these non-consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the non-consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the non-consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the non-consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the non-consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the non-consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the non-consolidated financial statements present fairly, in all material respects, the financial position of Newfoundland and Labrador Hydro as at December 31, 2012, and the results of its operations and its cash flows for the year then ended in accordance with the financial reporting provisions of Section 59 of The Hydro Corporation Act.

*Basis of Accounting and Restrictions on Distribution and Use*

Without modifying our opinion, we draw attention to Note 2 to the non-consolidated financial statements, which describes the basis of accounting. The non-consolidated financial statements are prepared to assist Newfoundland and Labrador Hydro meet the requirements of the Newfoundland and Labrador Board of Commissioners of Public Utilities. As a result, the non-consolidated financial statements may not be suitable for another purpose. Our report is intended solely for Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities and should not be distributed to or used by parties other than Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities.

*Other Matter*

Newfoundland and Labrador Hydro has prepared separate consolidated financial statements for the year ended December 31, 2012 in accordance with Canadian generally accepted accounting principles on which we issued an unmodified auditor's report to the Lieutenant-Governor in Council, Province of Newfoundland and Labrador dated March 28, 2013.

**1. DESCRIPTION OF BUSINESS**

Newfoundland and Labrador Hydro (Hydro) is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador (Province) as a Crown corporation and is exempt from paying income taxes under Section 149 (1)(d) of the Income Tax Act. The principal activity of Hydro is the development, generation and sale of electricity. Hydro's operations include both regulated and non-regulated activities. Hydro's head office is located in St. John's, Newfoundland and Labrador.

**2. SIGNIFICANT ACCOUNTING POLICIES**

**2.1 Basis of Presentation**

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP). These financial statements differ materially from Canadian GAAP because they are non-consolidated. Hydro's investments in its subsidiary and jointly controlled companies have been accounted for using the equity method of accounting. Consolidated financial statements for the same period have been prepared for presentation to the Lieutenant-Governor in Council of the Province.

**2.2 Use of Estimates**

Preparation of these financial statements requires the use of estimates and assumptions that affect the amounts reported and disclosed in these statements and related notes. Key areas where management has made complex or subjective judgements include the fair value and recoverability of assets, the reported amounts of revenue and expenses, litigation, amortization and property, plant and equipment, environmental and asset retirement obligations, and other employee future benefits. Actual results may differ from these estimates, including changes as a result of future decisions made by the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB), and these differences could be material.

**2.3 Rates and Regulations (Excluding Sales by Subsidiaries)**

Hydro's revenues from its electrical sales to most customers within the Province are subject to rate regulation by the PUB. Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service (COS) methodology. The allowed rate of return on rate base is 7.4% (2011 - 7.4%). Hydro applies certain accounting policies that differ from enterprises that do not operate in a rate regulated environment. Generally these policies result in the deferral and amortization of costs or credits which will be recovered or refunded in future rates. In the absence of rate regulation these amounts would be included in the determination of net income in the year the amounts are incurred. The effects of rate regulation on the Financial Statements are more fully disclosed in Note 5.

**2.4 Cash and Cash Equivalents and Short-Term Investments**

Cash and cash equivalents and short-term investments consist primarily of Canadian treasury bills and Banker's Acceptances (BAs). Those with original maturities at date of purchase of three months or less are classified as cash equivalents whereas those with original maturities beyond three months and less than twelve months are classified as short-term investments. There were no short-term investments outstanding at December 31, 2012 (2011 - nil). Cash and cash equivalents and short-term investments are measured at fair value.

**2.5 Inventory**

Inventory is recorded at the lower of average cost and net realizable value.

**2.6 Property, Plant and Equipment**

Property, plant and equipment is recorded at cost, which comprises materials, labour, contracted services, other costs directly related to construction and an allocation of certain overhead costs. Expenditures for additions and betterments are capitalized and normal expenditures for maintenance and repairs are charged to operations. The cost of property, plant and equipment under construction is transferred to property, plant and equipment in service when construction is completed and facilities are commissioned, at which point amortization commences.

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**2.6 Property, Plant and Equipment (cont'd.)**

Contributions in aid of construction are funds received from customers and governments toward the incurred cost of property, plant and equipment or the fair value of assets contributed. Contributions are recorded as a reduction to property, plant and equipment and the net property, plant and equipment is amortized.

Gains and losses on the disposal of property, plant and equipment are recognized in Other income and expense as incurred.

**Electricity Generation, Transmission and Distribution**

Construction in progress includes the costs incurred in engineering and construction of new generation, transmission and distribution facilities. Interest is charged to construction in progress at rates equivalent to Hydro's weighted average cost of debt.

Amortization is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

**Generation Plant**

Hydroelectric	45 to 100 years
Thermal	35 and 65 years
Diesel	25 to 55 years

**Transmission**

Lines	30 and 65 years
Terminal stations	40 to 55 years
Distribution system	30 to 55 years

Hydroelectric generation plant includes the powerhouse, turbines, governors and generators, as well as water conveying and control structures, including dams, dikes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dikes and liners and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kilovolt (kV). Switching station assets are used to step up voltages of electricity from generating to transmission and to step down voltages for distribution.

Distribution system assets include poles, transformers, insulators, and conductors.

**Other Assets**

Other assets include telecontrol, computer software, buildings, vehicles, furniture, tools and equipment which are carried at cost less accumulated amortization. Amortization is calculated on a straight-line basis over estimated useful lives ranging from 5 to 55 years. Amortization methods, useful lives and residual values are reviewed at each reporting date.

**2.7 Capitalized Interest**

Interest is charged to construction in progress at rates equivalent to the last approved weighted average cost of debt until the project is complete. Capitalized interest cannot exceed actual interest incurred.

**2.8 Impairment of Long-Lived Assets**

Hydro reviews the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. An impairment loss corresponding to the amount by which the carrying value exceeds fair value is recognized, if applicable.

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**2.9 Asset Retirement Obligations**

The fair value of the future expenditures required to settle legal obligations associated with the retirement of property, plant and equipment, is recognized to the extent that they are reasonably estimable. Asset retirement obligations are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. Accretion of asset retirement obligations is included in net income through Amortization. Differences between the recorded asset retirement obligation and the actual retirement costs incurred are recorded as a gain or loss in the settlement period.

**2.10 Employee Future Benefits**

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions are expensed as incurred.

Hydro provides group life insurance and health care benefits on a cost shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee future benefits is accounted for on an accrual basis and has been actuarially determined using the projected benefit method prorated on service and management's best estimate of salary escalation, retirement ages of employees and expected health care costs. The excess of cumulative net actuarial gains and losses over 10% of the accrued benefit obligation is amortized over the expected average remaining service life of the employee group.

**2.11 Revenue Recognition**

Revenue is recognized on the accrual basis, as power and energy deliveries are made, and includes an estimate of the value of electricity consumed by customers in the year, but billed subsequent to year end. Sales within the Province are primarily at rates approved by the PUB, whereas sales to certain major industrial customers and export sales are either at rates under the terms of the applicable contracts, or at market rates.

**2.12 Foreign Currency Translation**

Foreign currency transactions are translated into their Canadian dollar equivalent as follows:

- (a) At the transaction date, each asset, liability, revenue or expense is translated using exchange rates in effect at that date.
- (b) At the date of settlement and at each balance sheet date, monetary assets and liabilities are adjusted to reflect exchange rates in effect at that date. Any resulting gain or loss is reflected in income, except gains or losses on purchases of fuel which are included in the cost of fuel inventory.

**2.13 Financial Instruments and Hedging Activities**

**Financial Instruments**

Financial assets and financial liabilities are recognized on the balance sheet when Hydro becomes a party to the contractual provisions of the instrument and are initially measured at fair value. Subsequent measurement is based on classification. Hydro has classified each of its financial instruments into the following categories: financial assets and liabilities held for trading; loans and receivables; financial assets held to maturity; financial assets available for sale; and other financial liabilities.

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd.)**

**2.13 Financial Instruments and Hedging Activities (cont'd.)**

Financial Instruments (cont'd.)

Hydro has classified its financial instruments as follows:

Cash and cash equivalents	Held for trading
Accounts receivable	Loans and receivables
Derivative assets	Held for trading
Sinking funds - investments in same Hydro issue	Held to maturity
Sinking funds - other investments	Available for sale
Long-term receivables	Loans and receivables
Accounts payable and accrued liabilities	Other liabilities
Long-term debt	Other liabilities
Long-term payable	Other liabilities

Each of these financial instruments is measured at amortized cost, except for cash and cash equivalents, sinking fund – other investments and derivative assets which are measured at fair value.

Transaction costs related to financial assets and financial liabilities are included as part of the cost of the instrument, with the exception of cash and cash equivalents and short-term investments which are expensed as incurred through interest and finance charges, based upon the pricing obtained during the quotation process. Discounts and premiums on financial instruments are amortized to income over the life of the instrument.

Derivative Instruments and Hedging Activities

Derivative instruments are utilized by Hydro to manage market risk. Hydro's policy is not to utilize derivative instruments for speculative purposes. Hydro may choose to designate derivative instruments as hedges and apply hedge accounting if there is a high degree of correlation between price movements in the derivative instruments and the hedged items. Hydro formally documents all hedges and the risk management objectives at the inception of the hedge. Derivative instruments that have been designated and qualify for hedge accounting are classified as either cash flow or fair value hedges. Hydro had no fair value hedges in place at December 31, 2012 or 2011.

**2.14 Future Accounting Changes – International Financial Reporting Standards (IFRS)**

The Canadian Accounting Standards Board (AcSB) amended the introduction to Part 1 of the Canadian Institute of Chartered Accountants (CICA) Handbook – Accounting to allow qualifying entities with rate-regulated activities to defer the adoption of IFRS to January 1, 2015. Hydro is a qualifying entity and chose to use the deferral option for the year ended December 31, 2012.

Although IFRS and Canadian GAAP are based on a similar conceptual framework, there are a number of differences in recognition, measurement and disclosure. The areas with the highest potential impact on Hydro are property, plant and equipment and regulatory assets and liabilities.

Hydro continues to assess the financial reporting impacts of the adoption of IFRS; however, the impact of IFRS will depend on the IFRS standards in effect at the time of conversion and the accounting elections made.

### 3. CHANGE IN ACCOUNTING POLICY

During 2012, Hydro adopted new accounting policies as approved by the PUB in Order No P.U. 13( 2012). These policy changes were applied retroactive to January 1, 2011. The policy changes are as follows:

#### Capitalization of Property, Plant and Equipment

Previously, Hydro capitalized certain general overhead costs and training costs and included the costs of asset overhauls and major inspections as an operating expense. Hydro's revised policy is to expense general overheads and training costs as incurred and to capitalize costs associated with asset overhauls and major inspections. These changes resulted in a decrease in net income of \$1.3 million for the year ended December 31, 2011.

#### Employee Future Benefits

Previously, Hydro accounted for employee future benefits under the corridor method whereby the excess of gains and losses over 10% of the accrued benefit obligation was amortized to income over the expected average remaining service life of the employee group. Hydro's revised policy is to defer the amortization of actuarial gains and losses recognized in employee future benefits expense through regulatory adjustments. This change resulted in an increase in net income of \$1.2 million for the year ended December 31, 2011.

#### Amortization of Property, Plant and Equipment

Previously, Hydro amortized hydroelectric generating assets and transmission assets using the sinking fund method. Hydro's new policy is to calculate amortization using straight-line methodology. As part of the methodology change, Hydro also changed its estimate of service lives effective January 1, 2011. In the absence of regulatory approval, this change would have been applied retroactively resulting in a decrease in retained earnings as at January 1, 2011 of \$210.7 million. Pursuant to Order No. P.U. 13 (2012), the PUB approved the use of the carrying value of property, plant and equipment under Canadian GAAP as deemed cost at January 1, 2011. As the deemed cost of Hydro's regulated property, plant and equipment is recoverable through future rates, no adjustment to opening retained earnings is necessary. These changes resulted in an increase in net income of \$2.2 million for the year ended December 31, 2011.

### 4. PROPERTY, PLANT AND EQUIPMENT

	Property Plant and Equipment in Service	Contributions in Aid of Construction	Accumulated Amortization	Construction in Progress	Net Book Value
(millions of dollars)	<b>2012</b>

	<b>30.0</b>	<b>24.1</b>

Hydro has operations that are regulated by the PUB.

Regulatory assets represent future revenues associated with certain costs, incurred in current or prior periods that are expected to be recovered from customers in future periods through the rate-setting process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are expected to be refunded to customers as a result of the rate-setting process. Amounts deferred as regulatory assets and liabilities are subject to PUB approval. The risks and uncertainties related to regulatory assets and liabilities are subject to periodic assessment. When Hydro considers that the value of these regulatory assets or liabilities is no longer likely to be recovered or repaid through future rate adjustments, the carrying amount is reflected in operations. The following is a description of each of the circumstances in which rate regulation affects the accounting for a transaction or event.

**5.2 Rate Stabilization Plan**

On January 1, 1986, Hydro, having received the approval of the PUB, implemented a rate stabilization plan (RSP) which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, levels of precipitation and load. Adjustments required in retail rates to cover the amortization of the balance in the plan are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

**5. REGULATORY ASSETS AND LIABILITIES (cont'd.)**

**5.2 Rate Stabilization Plan (cont'd.)**

Balances accumulating in the RSP, including financing charges, are to be recovered or refunded in the following year, with the exception of hydraulic variation, which will be recovered or refunded at a rate of 25% of the outstanding balance at year end. Additionally, a fuel rider is calculated annually based on the forecast fuel price and is added to or subtracted from the rates that would otherwise be in effect. A portion of the RSP balance totaling approximately \$135.0 million (2011 - \$102.0 million) has been set aside by the PUB and will be subject to a future regulatory ruling on the allocation between the industrial customers and retail customers. This balance is mainly due to fuel savings at the Holyrood Thermal Generating Station (HTGS) as a result of the shutdown of a portion of the pulp and paper industry in the Province since 2007.

Hydro recognizes the RSP balances as a regulatory asset or liability based on the expectation that rates will be adjusted annually to provide for the collection from, or refund to, customers in future periods. In the absence of rate regulation, Canadian GAAP would require that the cost of fuel be recognized as an operating expense in the period in which it was consumed. In 2012, \$49.3 million was deferred (2011 - \$20.9 million) in the RSP and \$60.4 million (2011 - \$25.4 million) was recovered through rates and included in energy sales.

Hydro's rural rates on the Island Interconnected and Isolated systems are primarily based upon retail electricity rates. Therefore, when a rate adjustment for retail rates has been approved by the PUB, Hydro's rural customers receive the same rate change. In 2012, the rural rate adjustment reduced income and increased the RSP liability by \$7.0 million (2011 - \$4.4 million). In the absence of rate regulation, the rate adjustment would have been recorded in income.

Hydro is required to charge or pay interest on balances accumulating in the RSP at a rate equal to Hydro's weighted average cost of capital. As a result, Hydro recognized interest expense of \$13.2 million in 2012 (2011 - \$12.2 million).

**5.3 Deferred Foreign Exchange Losses**

Hydro incurred foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt in 1975 and 1985, respectively, which were recognized when the debt was repaid in 1997. The PUB has accepted the inclusion of realized foreign exchange losses related to long term debt in rates charged to customers in future periods. Any such loss, net of any gain, is deferred to the time of the next rate hearing for inclusion in the new rates to be set at that time. Accordingly, these losses are recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include the losses in operating costs, in each year that the related debt was outstanding, to reflect the exchange rates in effect on each reporting date.

Commencing in 2002, the PUB ordered Hydro's deferred realized foreign exchange losses be amortized over a forty year period. This amortization, of \$2.1 million annually, is included in regulatory adjustments.

**5.4 Deferred Major Extraordinary Repairs**

In its report dated April 13, 1992, the PUB recommended that Hydro adopt a policy of deferring and amortizing the costs of major extraordinary repairs in excess of \$0.5 million, subject to PUB approval on a case-by-case basis. In 2005, Hydro started an asbestos abatement program at the HTGS. This program was carried out over a three year period. Pursuant to Order No. P.U. 2 (2005), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, the costs incurred in each year of the program were recognized as a regulatory asset to be amortized over the subsequent five year period. In 2006, Hydro incurred \$2.3 million in expenses to repair a boiler tube failure at the HTGS. Pursuant to Order No. P.U. 44 (2006), the PUB approved the deferral and amortization of these costs as a major extraordinary repair. Accordingly, these costs are being amortized over a five year period. In the absence of rate regulation, Canadian GAAP would require that Hydro expense the cost of the asbestos abatement program and the boiler tube repairs in the year incurred. In 2012, \$0.6 million (2011 - \$1.7 million) of amortization was recognized in Operating costs.

**5. REGULATORY ASSETS AND LIABILITIES (cont'd.)**

**5.5 Deferred Energy Conservation Costs**

Pursuant to Order No. P.U. 14 (2009), Hydro received approval to defer costs associated with an electrical conservation program for residential, industrial, and commercial sectors. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, Canadian GAAP would require that Hydro include this program as operating costs in the year incurred. In 2012, \$1.4 million (2011 - \$0.5 million) was deferred.

**5.6 Deferred Purchased Power Savings**

In 1997, Hydro interconnected communities in the area of L'Anse au Clair to Red Bay to the Hydro-Québec system. In its report dated July 12, 1996, the PUB recommended that Hydro defer and amortize the benefits of a reduced initial purchased power rate over a 30 year period. The remaining unamortized savings in the amount of \$0.5 million (2011 - \$0.6 million) are recognized as a regulatory liability. In the absence of rate regulation, Canadian GAAP would require that Hydro include the actual cost of purchased power in operating costs in the year incurred.

**5.7 Property, Plant and Equipment**

Pursuant to Order No. P.U. 13 (2012), the PUB approved the use of the carrying amount of property, plant and equipment under Canadian GAAP as the deemed cost at January 1, 2011.

During 2010, Hydro engaged an independent consultant to conduct an amortization study. The scope of this study included a review of Hydro's amortization methods as well as a statistical analysis of service life estimates and calculation of appropriate amortization rates and annual and accrued amortization balances as at December 31, 2009. Based on the results of this study and PUB approval, amortization previously calculated using the 'sinking fund' method under Canadian GAAP is now calculated on a straight-line basis. In addition, the service lives for certain assets have also been revised.

The PUB permits major inspections to be included in the cost of capital and amortized over the average expected period of the next major inspection. In 2012, \$6.8 million (2011 - \$0.9 million) was recognized as property, plant and equipment. In the absence of rate regulation, Canadian GAAP would require that Hydro include the major inspections as operating costs in the year incurred.

**5.8 Foreign Exchange Gains and Losses**

Hydro purchases a significant amount of fuel in US dollars. The RSP allows Hydro to defer variances in fuel prices (including foreign exchange fluctuations). During 2012, Hydro deferred foreign exchange losses on fuel purchases of \$0.4 million (2011 - gain of \$0.2 million). In the absence of rate regulation, Canadian GAAP would require that Hydro include gains and losses on foreign currencies in Net finance expense in the period incurred.

**5.9 Insurance Proceeds**

Pursuant to Order No. P.U. 13 (2012), Hydro records net insurance proceeds in excess of \$50,000 against the capital costs of the related assets. During 2012, Hydro recorded net insurance proceeds of \$0.2 million (2011 - \$0.8 million) against costs of the related assets.

**5.10 Employee Future Benefits**

Pursuant to Order No. P.U. 13 (2012), Hydro defers the amortization of actuarial gains and losses. During 2012, Hydro deferred actuarial gains and losses of \$2.3 million (2011 - \$1.2 million).

**6. SINKING FUNDS**

As at December 31, 2012, sinking funds include \$263.3 million (2011 - \$247.0 million) related to repayment of Hydro's long-term debt. Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada, provincial governments or Schedule 1 banks, and have maturity dates ranging from 2013 to 2041.

**6. SINKING FUNDS (cont'd.)**

Hydro debentures, which are intended to be held to maturity, are deducted from long-term debt while all other sinking fund investments are shown separately on the balance sheet as assets. Annual contributions to the various sinking funds are in accordance with bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 2.57% to 9.86% (2011 - 3.12% to 9.86%).

<i>(millions of dollars)</i>	2012	2011
Sinking funds at beginning of year	<b>247.0</b>	208.2
Contributions	<b>8.2</b>	8.2
Earnings	<b>11.7</b>	11.0
Valuation adjustment	<b>(3.6)</b>	19.6
Sinking funds at end of year	<b>263.3</b>	247.0

Sinking fund instalments due for the next five years are as follows:

<i>(millions of dollars)</i>	2013	2014	2015	2016	2017
Sinking fund instalments	8.2	8.2	8.2	8.2	6.7

**7. LONG-TERM RECEIVABLES**

The balance of \$0.2 million (2011 - \$0.2 million) is the non-current portion of receivables associated with customer time payment plans and the long-term portion of employee purchase programs. During 2012, refundable deposits associated with applications for transmission service into Nova Scotia and New Brunswick were settled (2011 - \$1.4 million). During 2011, Hydro-Quebec refunded two deposits totaling \$24.1 million associated with applications for transmission service through Quebec.

**8. INVESTMENTS**

<i>(millions of dollars)</i>	Ownership Interest	2012	2011
Churchill Falls (Labrador) Corporation	65.8%		
Shares, at cost		<b>167.2</b>	167.2
Equity in retained earnings at beginning of year		<b>232.0</b>	217.1
Equity in net income for the year		<b>18.2</b>	14.9
		<b>417.4</b>	399.2

Effective June 18, 1999, the two shareholders of Churchill Falls, Hydro and Hydro-Quebec, entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of Churchill Falls be subject to joint approval by representatives of Hydro and Hydro-Quebec.

9. LONG-TERM DEBT

Details of long-term debt are as follows:

Series	Face Value	Coupon Rate %	Year of Issue	Year of Maturity	2012	2011
<i>(millions of dollars)</i>						
V *	125.0	10.50	1989	2014	<b>124.8</b>	124.7
X *	150.0	10.25	1992	2017	<b>149.4</b>	149.4
Y *	300.0	8.40	1996	2026	<b>293.8</b>	293.5
AB *	300.0	6.65	2001	2031	<b>306.3</b>	306.5
AD *	125.0	5.70	2003	2033	<b>123.7</b>	123.6
AE	<u>225.0</u>	4.30	2006	2016	<u><b>224.2</b></u>	<u>224.0</u>
Total debentures	<u>1,225.0</u>				<u><b>1,222.2</b></u>	<u>1,221.7</u>
Less sinking fund investments in own debentures					<u><b>88.1</b></u>	<u>82.0</u>
Less: payments due within one year					<u><b>1,134.1</b></u>	<u>1,139.7</u>
					<u><b>8.2</b></u>	<u>8.2</u>
					<u><b>1,125.9</b></u>	<u>1,131.5</u>

\* Sinking funds have been established for these issues.

Promissory notes, debentures and long-term loans are unsecured and unconditionally guaranteed as to principal and interest and, where applicable, sinking fund payments, by the Province. The Province charges Hydro a guarantee fee of 25 basis points annually on the total debt (net of sinking funds) with a remaining term to maturity less than 10 years and 50 basis points annually on total debt (net of sinking funds) with a remaining term to maturity greater than 10 years. The fee for 2012 was \$3.7 million (2011 - \$3.9 million).

Hydro uses promissory notes to fulfill its short-term funding requirements. As at December 31, 2012, there was \$52.0 million in short-term borrowings outstanding (2011 - nil).

Hydro maintains a \$50.0 million Canadian or US equivalent unsecured demand operating credit facility with its banker and at year end there were no amounts drawn on the facility (2011 - nil). Advances may take the form of a Prime Rate Advance or the issuance of a BA with interest calculated at the Prime Rate or prevailing Government BA fee. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the Prime Rate. At year end, Hydro had 24 letters of credit outstanding, reducing the availability of the credit facility by \$18.9 million (2011 - \$18.9 million).

Required repayments of long-term debt over the next five years will be as follows:

<i>(millions of dollars)</i>	2013	2014	2015	2016	2017
Long-term debt repayment	-	125.0	-	225.0	150.0

## 10. ASSET RETIREMENT OBLIGATIONS

Hydro has recognized liabilities associated with the retirement of portions of the HTGS and disposal of Polychlorinated Biphenyls (PCB). The reconciliation of the beginning and ending carrying amounts of asset retirement obligations is as follows:

<i>(millions of dollars)</i>	2012	2011
Asset retirement obligation at beginning of year	<b>19.6</b>	11.4
Liabilities incurred	-	2.2
Revisions	<b>3.7</b>	5.5
Accretion	<b>0.7</b>	0.5
Settlements	<b>(0.1)</b>	-
Asset retirement obligation at end of year	<b>23.9</b>	19.6

The total estimated undiscounted cash flows required to settle the HTGS obligations at December 31, 2012 are \$32.1 million (2011 - \$27.0 million). Payments to settle the liability are expected to occur between 2020 and 2024. The fair value of the asset retirement obligations was determined using the present value of future cash flows discounted at the Company's credit adjusted risk free rate of 2.8% (2011 - 2.9%).

The total estimated undiscounted cash flows required to settle the PCB obligations at December 31, 2012 are \$2.7 million (2011 - \$2.7 million). Payments to settle the liability are expected to occur between 2013 and 2025. The fair value of the asset retirement obligations was determined using the present value of future cash flows discounted at the Company's credit adjusted risk free rate of 3.1% (2011 - 3.1%).

A significant number of Hydro's assets include generation plants, transmission assets and distribution systems. These assets can continue to run indefinitely with ongoing maintenance activities. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related asset retirement obligation cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is legally required to remove, an asset retirement obligation for those assets will be recognized at that time.

## 11. EMPLOYEE FUTURE BENEFITS

### 11.1 Pension Plan

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions of \$4.4 million (2011 - \$4.3 million) are expensed as incurred.

### 11.2 Other Benefits

Hydro provides group life insurance and health care benefits on a cost shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2012, cash payments to beneficiaries for its unfunded other employee future benefits were \$2.3 million (2011 - \$2.2 million). An actuarial valuation was performed as at December 31, 2012.

**11. EMPLOYEE FUTURE BENEFITS (cont'd.)**

**11.2 Other Benefits (cont'd.)**

<i>(millions of dollars)</i>	<b>2012</b>	<b>2011</b>
Accrued benefit obligation		
Balance at beginning of year	<b>88.1</b>	69.3
Current service cost	<b>2.9</b>	2.1
Interest cost	<b>4.1</b>	4.0
Actuarial (gain) loss	<b>(3.4)</b>	16.1
Regulatory adjustments	<b>(2.3)</b>	(1.2)
Benefits paid	<b>(2.3)</b>	(2.2)
Balance at end of year	<b>87.1</b>	<b>88.1</b>
Plan deficit	<b>87.1</b>	88.1
Unamortized actuarial loss	<b>(30.0)</b>	(35.6)
Unamortized past-service cost	<b>(0.2)</b>	(0.2)
Accrued benefit liability at end of year	<b>56.9</b>	<b>52.3</b>
<i>(millions of dollars)</i>	<b>2012</b>	<b>2011</b>
Components of benefit cost		
Current service cost	<b>2.9</b>	2.1
Interest cost	<b>4.1</b>	4.0
Actuarial (gain) loss	<b>(3.4)</b>	16.1
	<b>3.6</b>	22.2
Difference between actuarial gain or loss and amount recognized	<b>5.6</b>	(14.9)
Benefit expense	<b>9.2</b>	<b>7.3</b>

The significant actuarial assumptions used in measuring the accrued benefit obligations and benefit expense are as follows:

	<b>2012</b>	<b>2011</b>
Discount rate – benefit cost	<b>4.55%</b>	5.75%
Discount rate – accrued benefit obligation	<b>4.00%</b>	4.55%
Rate of compensation increase	<b>3.50%</b>	3.50%
Assumed health care trend rates:		
	<b>2012</b>	<b>2011</b>
Initial health care expense trend rate	<b>6.00%</b>	7.50%
Cost trend decline to	<b>4.50%</b>	5.00%
Year that rate reaches the rate it is assumed to remain at	<b>2020</b>	2016

A 1% change in assumed health care trend rates would have had the following effects:

<i>Increase</i>	<b>2012</b>	<b>2011</b>
Current service and interest cost	<b>1.6</b>	1.2
Accrued benefit obligation	<b>17.0</b>	17.7
<i>Decrease</i>		
Current service and interest cost	<b>(1.2)</b>	(0.9)
Accrued benefit obligation	<b>(13.0)</b>	(13.5)

**12. SHAREHOLDER'S EQUITY**

**12.1 Share Capital**

<i>(millions of dollars)</i>	2012	2011
Common shares of par value \$1 each		
Authorized: 25,000,000		
Issued and outstanding 22,503,942	<u>22.5</u>	<u>22.5</u>

**12.2 Contributed Capital**

<i>(millions of dollars)</i>	2012	2011
Total contributed capital	<u>115.4</u>	<u>115.4</u>

**12.3 Accumulated Other Comprehensive Income**

<i>(millions of dollars)</i>	2012	2011
Balance at beginning of year	<u>45.1</u>	<u>26.7</u>
Other comprehensive (loss) income	<u>(3.5)</u>	<u>18.4</u>
Balance at end of year	<u>41.6</u>	<u>45.1</u>

**13. OPERATING COSTS**

<i>(millions of dollars)</i>	2012	2011
Salaries and benefits	<u>76.0</u>	<u>72.4</u>
Maintenance and materials	<u>19.9</u>	<u>19.6</u>
Transmission rental	<u>19.7</u>	<u>18.7</u>
Professional services	<u>10.1</u>	<u>7.6</u>
Other operating costs	<u>9.5</u>	<u>10.7</u>
Total	<u>135.2</u>	<u>129.0</u>

**14. CAPITAL MANAGEMENT**

Hydro's principal business requires ongoing access to capital in order to maintain assets to ensure the continued delivery of safe and reliable service to its customers. Therefore, Hydro's primary objective when managing capital is to ensure ready access to capital at a reasonable cost, to minimize its cost of capital within the confines of established risk parameters, and to safeguard Hydro's ability to continue as a going concern.

The capital managed by Hydro is comprised of debt (long-term debentures, promissory notes, bank credit facilities and bank indebtedness) and equity (share capital, contributed capital, accumulated other comprehensive income and retained earnings).

**14. CAPITAL MANAGEMENT (cont'd.)**

A summary of the capital structure is outlined below:

<i>(millions of dollars)</i>	<b>2012</b>	<b>2011</b>
<b>Debt</b>		
Long-term debt	1,125.9	1,131.5
Short-term borrowings	52.0	-
Current portion of long-term debt	8.2	8.2
Sinking funds	<u>(263.3)</u>	<u>(247.0)</u>
	<b>922.8</b>	<b>892.7</b>
	<b>54.1%</b>	<b>54.2%</b>
<b>Equity</b>		
Share capital	22.5	22.5
Contributed capital	115.4	115.4
Accumulated other comprehensive income	41.6	45.1
Retained earnings	<u>604.8</u>	<u>570.9</u>
	<b>784.3</b>	<b>753.9</b>
	<b>45.9%</b>	<b>45.8%</b>
<b>Total Debt and Equity</b>	<b><u>1,707.1</u></b>	<b><u>1,646.6</u></b>
	<b><u>100.0%</u></b>	<b><u>100.0%</u></b>

Hydro's unsecured demand operating facility has covenants restricting the issuance of debt such that the debt to total capitalization ratio cannot exceed 70%. The covenants further stipulate that the Debt Service Coverage Ratio should at all times be greater than 1.5 to 1.0. As at December 31, 2012, Hydro was in compliance with these covenants.

Hydro's approach to capital management encompasses various factors including monitoring the percentage of floating rate debt in the total debt portfolio, the weighted average term to maturity of its overall debt portfolio, its percentage of debt to debt plus equity and its interest coverage.

For the regulated portion of Hydro's operations a capital structure comprised of 75% debt and 25% equity is maintained, a ratio which management believes to be optimal with respect to its cost of capital. This capital structure is maintained by a combination of dividend policy, contributed equity and debt issuance. The issuance of any new debt with a term greater than one year requires prior approval of the PUB.

Legislation stipulates that the total of the short-term loans issued by Hydro and outstanding at any time shall not exceed a limit as fixed by the Lieutenant-Governor in Council. Short-term loans are those loans issued with a term not exceeding two years. The current limit is set at \$300.0 million. There was \$52.0 million outstanding as at December 31, 2012 (2011 - nil). Issuance of long-term and short-term debt by Hydro is further restricted by Bill C-24, an amendment to the Newfoundland and Labrador Hydro Act of 1975. The Bill effectively limits Hydro's total borrowings, which includes both long and short-term debt, to \$1.6 billion at any point in time.

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**15.1 Fair Value**

The estimated fair values of financial instruments as at December 31, 2012 and 2011 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates below are not necessarily indicative of the amounts that Hydro might receive or incur in actual market transactions.

As a significant number of Hydro's assets and liabilities do not meet the definition of a financial instrument, the fair value estimates below do not reflect the fair value of Hydro as a whole.

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**15.1 Fair Value (cont'd.)**

Establishing Fair Value

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. The following table presents Hydro's fair value hierarchy for financial assets and liabilities.

(millions of dollars)	Level	Carrying	Fair	Carrying	Fair
		Value	Value	Value	Value
Financial assets					
Cash and cash equivalents	1	<b>2.5</b>	<b>2.5</b>	6.7	6.7
Accounts receivable	1	<b>83.7</b>	<b>83.7</b>	83.1	83.1
Derivative assets	2	-	-	0.2	0.2
Sinking funds - investments in same Hydro issue	2	<b>88.1</b>	<b>107.3</b>	82.0	103.7
Sinking funds - other investments	2	<b>263.3</b>	<b>263.3</b>	247.0	247.0
Long-term receivable	2	<b>0.2</b>	<b>0.2</b>	1.6	1.6
Financial liabilities					
Accounts payable and accrued liabilities	1	<b>72.1</b>	<b>72.1</b>	130.8	130.8
Short-term borrowings	1	<b>52.0</b>	<b>52.0</b>	-	-
Long-term debt including amount due within one year (before sinking funds)	2	<b>1,222.2</b>	<b>1,668.6</b>	1,221.7	1,695.3
Long-term payable	2	-	-	1.3	1.3

The fair value of cash and cash equivalents, accounts receivable and accounts payable and accrued liabilities approximates their carrying values due to their short-term maturity.

There were no financial assets or liabilities valued using Level 3 of the fair value hierarchy as at December 31, 2012 and 2011.

**15.2 Risk Management**

Hydro is exposed to certain credit, liquidity and market price risks through its operating and financing activities. Financial risk is managed in accordance with a board approved policy, which outlines the objectives and strategies for the management of financial risk, including the use of derivative contracts. Permitted financial risk management strategies are aimed at minimizing the volatility of Hydro's expected future cash flows.

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**15.2 Risk Management (cont'd.)**

Credit Risk

Hydro's expected future cash flow is exposed to credit risk through its operating activities, primarily due to the potential for non-performance by its customers, and through its financing and investing activities, based on the risk of non-performance by counterparties to its financial instruments. The degree of exposure to credit risk on cash and cash equivalents, long-term investments and derivative assets as well as from the sale of electricity to customers, including the associated accounts receivable, is determined by the financial capacity and stability of those customers and counterparties. The maximum exposure to credit risk on these financial instruments is represented by their carrying values on the balance sheet at the reporting date.

Credit risk on cash and cash equivalents is minimal, as Hydro's cash deposits are held by a Canadian Schedule 1 Chartered Bank with a rating of A+ (Standard and Poor's).

Credit risk on short-term investments is minimized by limiting holdings to high-quality, investment grade securities issued by Federal and Provincial governments, as well as Bankers' Acceptances and term deposits issued by Canadian Schedule 1 Chartered Banks.

Credit exposure on Hydro's sinking funds is limited by restricting the holdings to long-term debt instruments issued by the Government of Canada or any province of Canada, crown corporations and Canadian Schedule 1 Chartered Banks. The following credit risk table provides information on credit exposures according to issuer type and credit rating for the remainder of the long-term investment portfolio:

	Issuer Credit Rating	Fair Value of Portfolio	Issuer Credit Rating	Fair Value of Portfolio
		(%)		(%)
		2012		2011
Provincial Governments	AA- to AAA	4.07%	AA- to AAA	4.19%
Provincial Governments	A- to A+	55.95%	A- to A+	57.75%
Provincially owned utilities	A- to A+	33.96%	A- to A+	32.43%
Schedule 1 Canadian banks	A- to A+	1.89%	A- to A+	1.31%
Provincially owned utilities	BBB+	4.13%	BBB+	4.32%
		100.00%		100.00%

Credit exposure on derivative assets is limited by the Financial Risk Management Policy, which restricts available counterparties for hedge transactions to Canadian Schedule 1 Chartered Banks, and Federally Chartered US Banks.

Hydro's exposure to credit risk on its energy sales and associated accounts receivable is determined by the credit quality of its customers. Hydro's three largest customers account for 83.1% (2011 - 80.0%) of total energy sales and 78.4% (2011 - 68.8%) of accounts receivable. These customers are comprised of rate regulated entities or organizations with investment grade credit ratings.

Hydro does not have any significant amounts that are past due and uncollectable for which a provision has not been recognized at December 31, 2012.

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**15.2 Risk Management (cont'd.)**

Liquidity Risk

Hydro is exposed to liquidity risk with respect to its contractual obligations and financial liabilities, including any derivative liabilities related to hedging activities. Liquidity risk management is aimed at ensuring cash is available to meet those obligations as they become due.

Short-term liquidity is mainly provided through cash and cash equivalents on hand, funds from operations, and a \$300.0 million promissory note program. In addition, Hydro maintains a \$50.0 million (2011 – \$50.0 million) unsecured demand operating facility with its primary banker in order to meet any requirements beyond those forecasted for a given period.

Long-term liquidity risk is managed by the issuance of a portfolio of debentures with maturity dates ranging from 2013 to 2033. Sinking funds have been established for these issues, with the exception of the issue maturing in 2016.

The following are the contractual maturities of Hydro's financial liabilities, including principal and interest, as at December 31, 2012:

<i>(millions of dollars)</i>	<b>&lt; 1 Year</b>	<b>1-3 Years</b>	<b>3-5 Years</b>	<b>&gt; 5 Years</b>	<b>Total</b>
Accounts payable and accrued liabilities	72.1	-	-	-	72.1
Short-term borrowings	52.0	-	-	-	52.0
Long-term debt	-	125.0	375.0	725.0	1,225.0
Interest	61.8	160.6	135.7	588.7	946.8
	185.9	285.6	510.7	1,313.7	2,295.9

Market Risk

In the course of carrying out its operating, financing and investing activities, Hydro is exposed to possible market price movements that could impact expected future cash flow and the carrying value of certain financial assets and liabilities. Market price movements to which Hydro has significant exposure include those relating to prevailing interest rates, foreign exchange rates, most notably the USD/CAD dollar, and current commodity prices, most notably the spot prices for diesel fuel, electricity, and No. 6 fuel. These exposures were addressed as part of the Financial Risk Management Strategy.

*Interest Rates*

Changes in prevailing interest rates will impact the fair value of financial assets and liabilities classified as held for trading or available for sale, which includes Hydro's cash and cash equivalents, short-term investments and sinking funds. Expected future cash flows associated with those financial instruments can also be impacted. The impact of a 0.5% change in interest rates on net income and other comprehensive income associated with cash and cash equivalents, debt and short-term debt was negligible throughout 2012 due to the short time period to maturity.

The table below shows the impact of a 50 basis point change in interest rates on net income and other comprehensive income associated with the sinking funds at the balance sheet date:

<i>(millions of dollars)</i>	<b>Net Income</b>		<b>Other Comprehensive Income</b>	
	<b>0.5% Decrease</b>	<b>0.5% Increase</b>	<b>0.5% Decrease</b>	<b>0.5% Increase</b>
Interest on sinking fund	-	-	10.9	(10.2)

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd.)**

**15.2 Risk Management (cont'd.)**

Market Risk (cont'd.)

*Foreign Currency and Commodity Exposure*

Hydro's primary exposure to both foreign exchange and commodity price risk arises from its purchases of No. 6 fuel for consumption at the HTGS and USD denominated electricity sales. These exposures are addressed in accordance with the board-approved Financial Risk Management Policy. Tactics to address these exposures include the use of forward rate agreements and fixed price commodity swaps.

During 2012, total electricity sales denominated in USD were \$33.8 million (2011 - \$67.9 million). In 2012 Hydro mitigated foreign exchange risk on these sales through the use of foreign currency forward contracts. In March of 2012, Hydro entered into a series of ten monthly foreign exchange forward contracts with a notional value of \$39.1 million USD to hedge foreign exchange risk on 75% of Hydro's planned USD electricity sales for the year. These contracts had an average exchange rate of \$1.00 CAD per USD. In 2012, management elected not to implement commodity price hedges aimed at addressing electricity price risk due to depressed market pricing conditions. During 2012, \$0.1 million in gains from these derivative contracts were included in other income and expense (2011 - \$1.9 million loss).

**16. NET FINANCE EXPENSE**

<i>(millions of dollars)</i>	<b>2012</b>	<b>2011</b>
Finance income		
Interest on sinking fund	<b>18.0</b>	16.6
Other interest income	<b>0.8</b>	4.4
	<b>18.8</b>	<b>21.0</b>
Finance expense		
Long-term debt	<b>90.5</b>	90.5
Accretion	<b>0.5</b>	0.5
Debt guarantee fee	<b>3.7</b>	3.9
Other	<b>0.9</b>	0.6
	<b>95.6</b>	<b>95.5</b>
Interest capitalized during construction	<b>(2.7)</b>	(1.6)
	<b>92.9</b>	<b>93.9</b>
Net finance expense	<b>74.1</b>	<b>72.9</b>

**17. SUPPLEMENTARY CASH FLOW INFORMATION**

<i>(millions of dollars)</i>	<b>2012</b>	<b>2011</b>
Accounts receivable	<b>(0.6)</b>	(13.1)
Inventory	<b>2.5</b>	(0.8)
Prepaid expenses	<b>(0.8)</b>	0.1

Regulatory liabilities	<b>31.3</b>	11.1
Accounts payable and accrued liabilities	<b>(58.7)</b>	(5.5)
Changes to non-cash working capital balances	<b>(24.9)</b>	(4.9)
Interest received	<b>0.3</b>	0.5
Interest paid	<b>91.4</b>	90.6

**18. SEGMENT INFORMATION**

Hydro operates in three business segments. Hydro Regulated encompasses sales of electricity to customers within the Province, non-regulated activities encompasses other non-regulated activities and Energy Marketing activities include the sale of electricity to markets outside the Province. The designation of segments has been based on regulatory status and management accountability. The segments' accounting policies are the same as those previously described in Note 2.

	Hydro Regulated	Non- Regulated Activities	Energy Marketing	Total
<i>(millions of dollars)</i>	<b>2012</b>

## 19. COMMITMENTS AND CONTINGENCIES

- (a) Hydro has received claims instituted by various companies and individuals with respect to outages and other miscellaneous matters. Although such matters cannot be predicted with certainty, management currently considers Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, to be \$0.2 million (2011 - \$0.1 million).
- (b) One of Hydro's industrial customers commenced legal proceedings in 1997, claiming approximately \$21.9 million (2011 - \$21.9 million) related to outages and plant shutdowns. Hydro is defending this claim. While the ultimate outcome of this action cannot be ascertained at this time, in the opinion of Hydro's management, following consultation with its legal counsel, no liability should be recognized.
- (c) Outstanding commitments for capital projects total approximately \$18.5 million as at December 31, 2012 (2011 - \$29.2 million).
- (d) Hydro has entered into a number of long-term power purchase agreements as follows:

Type	Rating	In-service Date	Term
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	4 MW	1998	25 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2009	20 years

Estimated payments due in each of the next five years are as follows:

(millions of dollars)	2013	2014	2015	2016	2017
Power purchases	24.9	24.5	24.7	24.9	25.2

- (e) Hydro has issued 23 irrevocable letters of credit to the New Brunswick System Operator totaling \$18.6 million as credit support related to applications for point to point transmission services. In addition Hydro has issued one letter of credit to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement.
- (f) Hydro has entered into power sales agreements with third parties. To facilitate market access, Hydro has entered into a transmission service agreement with Hydro-Quebec TransEnergie, which concludes in 2014, to acquire access to 265 MW of transmission capacity from Labrador through Quebec. Hydro has the right to renew its transmission service contract at the end of the contract term. If at that time there is a competing request for the same path, in order to renew the service agreement, Hydro must agree to accept a contract term that is at least equal to that competing request.

Pursuant to Hydro's five-year transmission service agreement with Hydro-Quebec TransEnergie, the transmission rental payments to contract maturity are as follows:

2013	\$18.9 million
2014	\$ 4.7 million

**19. COMMITMENTS AND CONTINGENCIES (cont'd.)**

(g) Hydro has received funding, in the amount of \$3.0 million, from the Atlantic Canada Opportunities Agency in relation to a wind-hydrogen-diesel research development project in the community of Ramea. This funding is repayable in annual installments of \$25,000 per commercial implementation of the resulting product. As at December 31, 2012 there have been no commercial implementations.

**20. RELATED PARTY TRANSACTIONS**

Hydro enters into various transactions with its parent and other affiliates. These transactions occur within the normal course of operations and are measured at the exchange amount, which is the amount of consideration agreed to by the related parties. Related parties with which Hydro transacts are as follows:

Related Party	Relationship
Nalcor Energy (Nalcor)	100% shareholder of Hydro.
The Province	100% shareholder of Nalcor.
Churchill Falls (Labrador) Corporation	Jointly controlled subsidiary of Hydro.
Nalcor Energy – Oil and Gas	Wholly owned subsidiary of Nalcor.
Nalcor Energy – Bull Arm Fabrication	Wholly owned subsidiary of Nalcor.
Board of Commissioners of Public Utilities	Agency of the Province.

(a) Hydro has entered into a long-term power contract with Churchill Falls for the purchase of \$6.1 million (2011 - \$6.0 million) of the power produced by Churchill Falls.

(b) Hydro is required to contribute to the cost of operations of the PUB as well as the cost of hearings and applications costs. During 2012, Hydro incurred \$1.5 million (2011 - \$1.2 million) in costs related to the PUB of which \$0.6 million (2011 - \$0.6 million) was included in Accounts payable and accrued liabilities.

(c) As at December 31, 2012, Hydro has a payable to Nalcor of \$1.7 million (2011 - \$49.4 million) and a receivable from other affiliates for \$0.1 million (2011 - \$0.1 million). This payable/receivable consists of various intercompany operating costs and power purchases.

(d) The 2012 debt guarantee fee payable to the Province was \$3.7 million (2011 - \$3.9 million). Both the 2012 and 2011 debt guarantee fees were paid in full in March 2012.

(e) Hydro received contributions in aid of construction from the Province related to wind feasibility studies. As at December 31, 2012, \$1.9 million (2011 - \$3.5 million) has been recorded in Deferred credits.

(f) During 2012, Hydro repaid the \$1.3 million long-term related party note payable to Nalcor in full. The note was non-interest bearing and had no set terms of repayment.

**21. SUBSEQUENT EVENTS**

*Forward Contracts*

On January 29, 2013, Hydro entered into a total of 12 forward contracts with a notional value of US \$23.0 million to mitigate a portion of the USD exposure on recall sales through to the end of 2013. The average rate on these forward contracts was \$1.01 CAD per USD.

*Cancellation of letters of credit*

On February 15, 2013, Hydro cancelled 23 letters of credit related to the New Brunswick System Operator totaling \$18.6 million.

**22. COMPARATIVE FIGURES**

The comparative figures have been reclassified to conform to the 2012 financial statement presentation of regulatory accounting adjustments.
