

November 6, 2013

**Newfoundland and Labrador Board of  
Commissioners of Public Utilities  
120 Torbay Road  
P.O. Box 21040  
St. John's, NL  
A1A 5B2**

**Attention: Ms. Cheryl Blundon  
Director of Corporate Service and Board Secretary**

Dear Ms. Blundon:

**Re: NLH-2013 General Rate Application**

Please find enclosed the original and twelve (12) copies of the Requests for Information CA-NLH-152 to 220 of the Consumer Advocate.

For convenience, the copies are on three-hole punched paper. A copy of this letter and the enclosed Requests for Information have been sent today to the parties listed below.

Yours truly,

**THOMAS J. JOHNSON**

TJJ:amc

Enc.

cc. Newfoundland & Labrador Hydro  
(Mr. Colin Feltham and Mr. Geoff Young)

Newfoundland Power Inc.  
(Mr. Gerard Hayes & Mr. Liam O'Brien)

- 2 -

Corner Brook Pulp and Paper Limited, North Atlantic Refining Limited and Tech Resources  
(Mr. Paul Coxworthy & Mr. Dean Porter)

Vale Newfoundland and Labrador Limited  
(Mr. Tom O'Reilly, Q.C. & Mr. Denis Fleming)

Innu Nation  
(Ms. Nancy Kleer & Ms. Stephanie Kearns)

Town of Labrador  
(Mr. Edward Hearn, Q.C.)

Yvonne Jones, MP Labrador

IN **THE MATTER OF** the *Public Utilities Act*,  
R.S.N. 1990, Chapter P-47 (the "*Act*");

AND

IN **THE MATTER OF** a General Rate Application  
(the "*Application*") by Newfoundland and Labrador  
Hydro for approvals of, under Section 70 of the Act,  
changes in the rates to be charged for the supply of  
power and energy to Newfoundland Power, Rural  
Customers and Industrial Customers; and under  
Section 71 of the Act, changes in the Rules and  
Regulations applicable to the supply of electricity to  
Rural Customers.

---

**CONSUMER ADVOCATE  
REQUESTS FOR INFORMATION  
CA-NLH-152 to CA-NLH-220**

**Issued: November 6, 2013**

---

1

2 CA-NLH-152 (Re: Response to NP-NLH-27) Please provide the same  
3 comparison, but for both cases base revenues from sales on  
4 proposed rates.  
5

6 CA-NLH-153 (Re: Response to NP-NLH-27) Has Hydro prepared a new load  
7 forecast since the forecast filed with the GRA? If so, please  
8 provide a comparison of the current load forecast to the forecast  
9 used in the GRA broken down by customer class.  
10

11 CA-NLH-154 (Re: Response to NP-NLH-27) Note 7 indicates that the reduction  
12 in No. 6 fuel costs is due to price and volume changes. Please  
13 provide details of the calculation culminating in the \$25.9 million  
14 reduction in No. 6 fuel costs. Further, will Hydro be re-filing based  
15 on the updated forecasts in its response to NP-NLH-27?  
16

17 CA-NLH-155 (Re: Response to NP-NLH-48) What is the probability that  
18 purchases from Nalcor will vary from forecast by +/- 10%, and  
19 alternatively +/- 5%?  
20

21 CA-NLH-156 (Re: Response to NP-NLH-48) How would Hydro propose to deal  
22 with a situation where Nalcor purchases vary by +10%, and  
23 alternatively, -10% under the current RSP and regulatory regime?  
24

25 CA-NLH-157 (Re: Response to CA-NLH-32) Given that Hydro is not in position  
26 to “determine the appropriate price signals”, why is it proposing to  
27 more than double the price signal in the NP demand charge?  
28

29 CA-NLH-158 (Re: Response to CA-NLH-35) It has been over five years since  
30 the NP Rate Review was completed, and Hydro is just now  
31 identifying items to be investigated relating to treatment of NP’s

1 Curtailable Load. When does Hydro plan to undertake the  
2 investigation and in what format will it be undertaken?  
3

4 CA-NLH-159 (Re: Response to CA-NLH-64) How would Lummus change its  
5 recommendations if the RSP were abandoned?  
6

7 CA-NLH-160 (Re: Response to CA-NLH-65) Was there any correspondence  
8 relating to the general discussions held with NP staff? If so, please  
9 file.  
10

11 CA-NLH-161 (Re: Response to CA-NLH-58) It is understood that NP, Rural  
12 Customers and the ICs receive benefits of reduced energy costs  
13 owing to the change in production regime at the CBPP hydro plant.  
14 Please explain why it is appropriate for the IC class to also receive  
15 benefit of reduced load when there is a change in operation of a  
16 hydro plant owned by one of the ICs.  
17

18 CA-NLH-162 (Re: Response to CA-NLH-56 and CA-NLH-59) Please confirm  
19 that for the period 2014 through 2017 Hydro forecasts that the  
20 CBPP Agreement will save about \$600,000 annually in fuel costs  
21 (CA-NLH-56). Are there any other system savings during this  
22 period stemming from the CBPP Agreement? Please confirm that  
23 for the period 2014 through 2017 Hydro forecasts that the CBPP  
24 Agreement will save CBPP about \$640,000 annually on its  
25 electricity bills (CA-NLH-59). On the basis of these forecasts,  
26 please explain why the CBPP Agreement is a good deal for the  
27 electricity consumers on the Island Interconnected System.  
28

29 CA-NLH-163 (Re: Response to CA-NLH-52) Can we conclude from the  
30 Customer Survey results that 8% of customers indicated a  
31 willingness to pay for improved reliability? Why were these two

1 questions incorporated in the Customer Survey in 2006, and then  
2 dropped from the survey after 2009?  
3

4 CA-NLH-164 (Re: Response to CA-NLH-78) Please confirm that there are no  
5 obligations or conditions placed upon the ICs in return for the rate  
6 subsidy conveyed through the Government Orders-in-Council.  
7

8 CA-NLH-165 (Re: Response to CA-NLH-39) Is Hydro and its cost of service  
9 consultant aware of any jurisdictions that have an “inherent cross-  
10 subsidy” or any other type of subsidy, approaching 44%?  
11

12 CA-NLH-166 (Re: Response to PUB-NLH-113, Attachment 1) Please identify  
13 the current basis for allocating the rural deficit to customer classes  
14 and comment on the “fairness” of using this method today versus  
15 20 years ago when PUB-NLH-113, Attachment 1 was issued.  
16

17 CA-NLH-167 (Re: Response to PUB-NLH-113, Attachment 1) For the past 20  
18 years, please show average base rates, average rural deficit rate,  
19 total average rate and revenue to cost ratio for each customer class  
20 that has been responsible for contributing to the rural deficit.  
21 Please show average rates in cents/kWh.  
22

23 CA-NLH-168 (Re: Response to CA-NLH-53) In GRA, Volume II, Exhibit 3 it is  
24 stated certain facilities for construction supply to Muskrat Falls  
25 “will be fully contributed and is assigned as common due to the  
26 system capacity benefits”. Please identify any assets that have been  
27 assigned as common and quantify the system capacity benefits;  
28 i.e., capacitor banks and other terminal station equipment.  
29

30 CA-NLH-169 (Re: Response to PUB-NLH-89) The response indicates that Hydro  
31 considered whether a source of funding was available to facilitate

1 phasing in rate increases for customers on the Labrador  
2 Interconnected Systems, but was unable to identify such a funding  
3 source. Did Hydro consider funding by other customer classes  
4 similar to what is currently being done for the rural deficit, or the  
5 \$37.6 million subsidy being conveyed to the ICs? Please address  
6 the pros and cons of using similar methodologies to fund a rate  
7 phase-in for Labrador Interconnected customers.

8  
9 CA-NLH-170 (Re: Response to CA-NLH-9) Please confirm that Hydro knows its  
10 marginal cost structure prior to the Labrador in-feed (i.e., 2014 to  
11 2017), and provide the annual marginal costs of capacity and  
12 energy for this period.

13  
14 CA-NLH-171 (Re: Response to CA-NLH-31) Please file the annual marginal  
15 costs of capacity and energy both pre- and post-infeed used in the  
16 TRC test evaluating CDM programs.

17  
18 CA-NLH-172 (Re: Response to IC-NLH-74) Hydro’s July 2010 Generation  
19 Planning Issues Report lists as a key issue that it “must continue to  
20 take into account the consideration of demand reduction initiatives  
21 through demand management programs and rate design”. Please  
22 provide a list of all such demand reduction initiatives undertaken  
23 since the 2010 report was issued and provide an estimate of the  
24 impact on Island Interconnected system demand requirements.

25  
26 CA-NLH-173 (Re: Response to CA-NLH-70) The report in Exhibit 11 states  
27 “such a mechanism for the curtailable load has cost of service  
28 implications”. Please quantify the cost of service implications.

29  
30 CA-NLH-174 (Re: Response to CA-NLH-70) The report in Exhibit 11 states  
31 “Hydro and NP agree to propose changes to the wholesale demand

1 and energy rate to accommodate a change in the treatment of NP's  
2 curtailable load at Hydro's next GRA". Please confirm that  
3 changes to NP's demand and energy rate to accommodate a change  
4 in the treatment of NP's curtailable load have not been proposed  
5 by Hydro and NP at this GRA.

6  
7 CA-NLH-175 (Re: Response to CA-NLH-70) The response states "Hydro is  
8 proposing that the parties discuss options for treatment of NP  
9 curtailable load that address Hydro's concerns" (listed in Section  
10 2.1 of Exhibit 9). Specifically, what is Hydro proposing? Please  
11 provide details of Hydro's expectations of the parties to this GRA  
12 with regard to treatment of NP's curtailable load.

13  
14 CA-NLH-176 (Re: Response to IC-NLH-72) The response states "Both requests  
15 were denied for reasons unnoted at the time". Has Hydro since  
16 found out the reasons why the requests were denied, and if so,  
17 what are they?

18  
19 CA-NLH-177 (Re: Response to NP-NLH-119) The response states "Although  
20 Hydro did not perform any analysis with respect to the potential  
21 impact on NP's cash flow under the proposed wholesale rate,  
22 Hydro is willing to explore options during the GRA process".  
23 Please provide details of what Hydro is proposing, including  
24 format and timing to explore such options.

25  
26 CA-NLH-178 (Re: Response to PUB-NLH-96) The response states "Such  
27 mechanisms, however, can also protect consumers from  
28 overpaying". Are such mechanisms necessary to protect customers  
29 from overpaying when there is an allowed range of return on rate  
30 base in place?

31

1 CA-NLH-179 (Re: Response to CA-NLH-61) What is the purpose of the lower  
2 bound on the allowed range of return on rate base if “shortfalls  
3 remain to the account of the shareholder”?  
4

5 CA-NLH-180 (Re: Response to CA-NLH-79) The response states “If the load  
6 variation component did not exist, Hydro would likely seek other  
7 regulatory deferral mechanisms given the magnitude of the load  
8 variations indicated above”. Please provide examples of the  
9 regulatory deferral mechanisms that Hydro might seek if the load  
10 variation component did not exist.  
11

12 CA-NLH-181 Does Hydro believe there will continue to be a need for the RSP  
13 following commissioning of the Labrador in-feed?  
14

15 CA-NLH-182 (Re: Response to CA-NLH-12 of Application on RSP Rules and  
16 Components of the Rates to be Charged to Industrial Customers)  
17 Hydro states that the subsidy granted the IC class through the  
18 Government OCs is \$37.6 million. Please put the level of this  
19 subsidy into perspective as follows: 1) by comparing it to the  
20 average annual revenues received from the IC class during the  
21 period 2008 to 2012 and equating it to the number of years of free  
22 power received by the IC class (i.e., had rates not been frozen and  
23 the load variation component had been assigned on the basis of  
24 load ratio share as proposed), and 2) by deriving the Dollar amount  
25 that Newfoundland Power’s customers would have received if an  
26 equivalent subsidy had been offered them; i.e., take the equivalent  
27 number of years of free power received by the IC class and apply it  
28 to the average annual revenues received from NP during the 2008  
29 to 2012 period.  
30

1 CA-NLA-183 (Re: Table 3.6, P. 3.22) Please reconcile opening and closing Net  
2 Fixed Assets as reported on Table 3.6 to Net Fixed Assets as  
3 reported in the CA-NLH-116 Schedule 1.  
4

5 CA-NLH-184 Please reconcile 2013 Additions to Plant in Service on CA-NLH-  
6 116 to original 2013 Capital Budget as shown in CA-NLH-119.  
7

8 CA-NLH-185 Please discuss the impact to 2013 Additions to Plant in Service on  
9 CA-NLH-116 as a result of the reduced expected total  
10 expenditures shown in CA-NLH-119.  
11

12 CA-NLH-186 (Re: CA-NLH-116, 119) Does Hydro propose to reduce its Net  
13 Fixed Assets in the 2013 Forward Average Rate Base to allow for  
14 reduced expenditures?  
15

16 CA-NLH-187 (Re: CA NLH-116) Hydro has projected that 2015 Additions to  
17 Plant in Service will be \$203,407,026, almost twice the amount  
18 projected in future years. Please explain the mechanism would  
19 Hydro have in place, or propose to put in place, to address the  
20 impact of such a significant expenditure, should it in fact take  
21 place.  
22

23 CA-NLH-188 (Re: CA-NLH-126) Please provide a copy of the Lead/Lag study to  
24 support the calculation of the Net Lag days used in this calculation.  
25

26 CA-NLH-189 (Re: CA-NLH-126) Please discuss if any significant accounting or  
27 operational policy changes have been introduced by Hydro (i.e.  
28 changes in billing cycles) subsequent to the Lead/Lag study used to  
29 support the calculation of the Net Lag days used in this calculation.  
30

- 1 CA-NLH-190 (Re: CA-NLH-126) Please explain and show the calculation of the  
2 HST adjustment.  
3
- 4 CA-NLH-191 (Re: Table 3.6, P. 3.22) Please explain where Fuel is reported for  
5 the purposes of reporting in the audited financial statements.  
6
- 7 CA-NLH-192 (Re: Table 3.6, P. 3.22 and CA-NLH-127) Please explain what  
8 makes up the components of the monthly Fuel amount (i.e. are  
9 these measures (dip values) taken at the end of each month). Please  
10 identify by location, tank, quantity and price.  
11
- 12 CA-NLH-193 Hydro's Table 3.6 shows Fuel increasing by \$25,011 from 2007  
13 (\$25,874) to 2013 (\$50,885). CA-NLH-127 shows an opening  
14 balance for 2013 fuel of \$26,890 and an average value of \$50,885.  
15 What are the driver(s) of fuel that would propel almost a 100%  
16 increase from 2007 and from the opening balance of 2013?  
17
- 18 CA-NLH-194 Hydro has reported Fuel on Finance Schedule 1 Page 5 of 11 for  
19 2007 to 2013. The value for 2011 is shown as \$33,680 and the  
20 value for 2012 is \$50,308. Please provide similar analysis for the  
21 calculation of average balances for 2011 and 2012 as provided in  
22 CA-NLH-127 for 2013.  
23
- 24 CA-NLH-195 For the years 2010, 2011 and 2012 please reconcile the opening  
25 balances from CA-NLH-127 and the question above to where Fuel  
26 is reported to the values reported in the audited financial  
27 statements.  
28
- 29 CA-NLH-196 Hydro has reported 2012 Fuel on Finance Schedule 1 Page 5 of 11  
30 as \$50,308 and 2013 Fuel as \$50,885. Both years show  
31 considerable increase over previous years. Using the average cost

1 per litre as found on Table 4.8 one can determine an estimated  
 2 value for average litres of fuel in storage. Based on the following it  
 3 would appear that fuel capacity storage has increased by about  
 4 10,000 litres. Is this a reasonable assumption to explain the  
 5 increase in fuel included in rate base? Please identify where  
 6 storage facilities were constructed. If Storage capacity has not  
 7 changed please provide explanation for the significant increase in  
 8 2012 and 2013.

	2007	2008	2009	2010	2011	2012	2013
Fuel (per Finance Schedule 1 Page 5 of 11) (212 of 258)	\$ 25,874	\$ 34,389	\$ 20,817	\$ 29,908	\$ 33,680	\$ 50,308	\$ 50,885
Average Cost per Litre (Section 4: Rates and Regulation Table 4.8 Page 4.24) (246 of 258)	0.74415	0.99913	0.83102	0.85506	1.02919	1.07926	1.12417
Average Litres	34,770	34,419	25,050	34,978	32,725	46,613	45,265

9  
10

11 CA-NLH-197 (Re: Table 3.6) Please explain where Material and Supplies are  
 12 reported for the purposes of reporting in the audited financial  
 13 statements.

14

15 CA-NLH-198 (Re: Table 3.6 and CA-NLH-128) Please explain what makes up  
 16 the material components of the monthly Materials and Supplies  
 17 amount.

18

19 CA-NLH-199 (Re: Table 3.6 and CA-NLH-131) Hydro states that “it is the  
 20 opinion of Lummus Consultants that it is common practice in the  
 21 utility industry to include such charges in rate base.” Can Hydro or  
 22 Lummus support this opinion by providing a sample list  
 23 jurisdictions that have provided for the inclusion of deferred values  
 24 as a component of rate base?

25

26 CA-NLH-200 (RE: Table 3.9) Hydro includes in the deferred charges 3 items;  
 27 Foreign Exchange, CDM and General Rate Application. Hydro has  
 28 previously or is applying currently for other deferral accounts;

1 Rate Stabilization, Isolated systems diesel and power purchase  
2 costs. Hydro has excluded these deferral accounts from inclusion  
3 in rate base. Can Hydro comment on why it has chosen to do so?  
4

5 CA-NLH-201 (Re: Table 3.9 and CA-NLH-130) Hydro has acknowledged that it  
6 will not achieve the proposed 2013 CDM spending that it has  
7 included in the calculation of the deferred charge amount. Does  
8 Hydro intend to adjust its rate base calculation to account for this  
9

10 CA-NLH-202 Further to CA-NLH107, please provide summaries of exit  
11 interviews as regards reason for voluntary resignation for those  
12 who resigned from 2006 to 2013.  
13

14 CA-NLH-203 Further to CA-NLH-105, please provide a copy of the following  
15 documentation relating to the Mercer Review: (i) copy of letter(s)  
16 of engagement (ii) copy of all draft reports provided to Hydro by  
17 Mercer, (iii) copy of Mercer's final reported to Hydro.  
18

19 CA-NLH-204 Please provide a copy of Mercer's invoice(s) in relation to  
20 Mercer's review.  
21

22 CA-NLH-205 Further to CA-NLH-110, please explain why under the head of  
23 miscellaneous costs, the sub-heading of Energy Management  
24 increased from \$153,784 in 2012 to \$1,239,986 in 2013?  
25

26 CA-NLH-206 Further to CAN-NL-113, what is the sub-heading of "taxes" for  
27 2013 of \$3,218,570 comprised of.  
28

29 CA-NLH-207 Further to CA-NLH-099, what is Hydro's forecast for the Rural  
30 Deficit for the next 5 years.  
31

1 CA-NLH-208 Further to CA-NLH-099, please express the totals of the Rural  
2 Deficit for the years 2007 to 2012 in 2013 dollars.  
3

4 CA-NLH-209 Further to CA-NLH-114, please explain and show how the 2013  
5 forecast cost recovery subheading of Intercompany Administration  
6 fee of (\$3,950,186) was derived.  
7

8 CA-NLH-210 Further to CA-NLH-103, please file a copy of Hydro's test year  
9 corporate operating budget submission that was presented to  
10 Hydro's leadership for approval, and detail what changes, if any,  
11 were made to same upon its review by leadership and the reason  
12 for these changes.  
13

14 CA-NLH-211 Has Hydro made an allowance for productivity in its test year  
15 operating expenses? If so, please explain how the productivity  
16 allowance was arrived at. If not, please explain why not.  
17

18 CA-NLH-212 Further to CA NLH-104, Hydro states that in 2012 it budgeted for  
19 27 vacancies; however the actual vacancy was 52 full time  
20 employees. Hydro also states that in 2012 there were 34  
21 retirements and 11 voluntary resignations and three employees  
22 commenced a leave of absence. How many retirements, voluntary  
23 resignations and leaves of absence, respectively, did Hydro  
24 forecast in its 2012 budget?  
25

26 CA-NLH-213 In CA-NLH-104, Hydro states that "Through the recruitment and  
27 retention initiatives, the company anticipates reducing vacancies  
28 into the future. Therefore, the vacancy forecast was increased by  
29 27 full time employees for 2012 to 40 full time employees for  
30 2013." Please indicate what the company plans to do into the

1 future that it was not already doing in 2012 as regards recruitment  
2 and retention initiatives.  
3

4 CA-NLH-214 Further to CA-NLH-104, Hydro states that it forecasted 40  
5 vacancies for 2013 but its experience as of September 1, is  
6 trending closer to 50. How is Hydro's experience, as at November  
7 1, 2013, trending?  
8

9 CA-NLH-215 In the Board's last NP GRA Order and Decision, the Board  
10 required (see p. 56) NP to file a report by April 1, 2013 "which  
11 provides an update on the conservation programs, an evaluation of  
12 the referenced heat pumps and recommendations in relation to the  
13 appropriate process to be followed for review of the conservation  
14 programs". The Board also states "The process for the review of  
15 the conservation programs can be assessed thereafter with the input  
16 of Newfoundland and Labrador Hydro and the Consumer  
17 Advocate". Is Hydro prepared to provide an update on its  
18 conservation programs by April 1, 2014?  
19

20 CA-NLH-216 Re PUB-NLH-027, please provide the same data as shown in  
21 Attachment 1 for 2013 and please also show the table for 2012 and  
22 2013 in which the column "Atlantic Canadian Utilities (Average)  
23 excludes Hydro.  
24

25 CA-NLH-217 Re: PUB-NLH-027, Hydro states at page 293 that Hydro's plan  
26 provides 100% reimbursement of eligible drugs with the employee  
27 paying the full cost of dispensing fees. Hydro goes on to states  
28 that Hydro's plan is consistent "within the range of the comparator  
29 group, which provides between 80% and 100% coverage for  
30 eligible expenses with some form of employee-paid contribution  
31 towards the dispensing fee that ranges from a full payment to a
