

1    Q.    **Reference: RFI V-NLH-066 to V-NLH-069**

2       The response illustrates that the O&M expenses are classified /allocated based on  
3       the original cost of the plant in service. Are the original costs all expressed in  
4       constant year dollars? If not, please provide a 2013 test year cost of service with the  
5       original costs restated in 2013 dollars.

7

8    A.    O&M expenses are classified/allocated based on the original cost of the plant in  
9       service which is accounted for in the in-service year dollars. Given that Hydro has  
10      more than 40,000 assets with in-service years ranging back to the 1960s, this  
11      request is onerous and cannot be completed within the time frame for this  
12      proceeding.
