

1 Q. What value do Hydro's customers place on unsupplied energy in cents/kWh? For  
2 example, when Hydro evaluates different long- range expansion plans, what value is  
3 placed on the differences in unsupplied energy between plans?

4

5

6 A. Hydro does not determine what value Hydro's customers place on unsupplied  
7 energy in cents/kWh. Hydro is aware that customers are inconvenienced when  
8 supply is not provided and takes all reasonable steps to provide reliable service at  
9 least cost.
