

1 Q. If required to do so, what is the earliest possible date by which Hydro could file with
2 the Board an application to install a new combustion turbine at the Holyrood site
3 (or at another site)? If such application was filed, within what time period (months)
4 could such a project be completed, measured from the date of approval of such
5 project by the Board?

6

7

8 A. There is presently a projected deficit in system generation capacity in 2015. An
9 application concerning the least-cost and reliable solution for this is currently being
10 prepared for submission to the Board by the end of March 2014. Please refer to
11 Hydro's response to IC-NLH-008. The combustion turbine options referenced in
12 Hydro's response to IC-NLH-008 are being considered with a target installation date
13 of late 2015.
