

1 Q. During an offload, how many Hydro employees are required to be on the marine
2 terminal?

3

4

5 A. The number of Hydro employees that are required to be on the marine terminal
6 depends on what operation is taking place:

- 7 • Tie up of the tanker (8);
8 • Flange and de-flange (4);
9 • Untying and let go (8); and
10 • Discharge of cargo (3).

11 It should be noted that these totals do not include the personnel from the vessel,
12 Coast Guard, security people, tank gaugers, and the like. The total number of
13 people on the dock could rise to 20.
