FW: NLH - 2015 Interim Rates Application - CA - Objection to IC request for extension

From: Thomas Johnson

Sent: February 19, 2015 7:19 AM

To: NL Public Utilities Board

Subject: TRIM: RE: Newfoundland and Labrador Hydro - 2015 Interim Rates Application

Dear Ms Blundon,

This application is very time sensitive and the effect of the granting of this request would be to delay Hydro's reply and the Board's consideration of the matter well into next week. The other concern is that the original schedule which was well known to the parties did not anticipate that any of the intervenors would have the opportunity to have the benefit of other intervenors' submissions before making their own. The Consumer Advocate objects to there being a further delay beyond that already sought by and granted to the Industrial customers. Certainly, an extension to Monday is not appropriate, in our view.

Tom Johnson
