

IR-IC-NLH-007  
NLH 2013 Interim Rates Application

---

Page 1 of 1

1     Q.    Please confirm, as per the filing of October 15, 2013, that the industrial RSP fuel  
2           rider, absent any new Board order as of January 1, 2014, would be 14.85  
3           mills/kW.h.

4

5

6     A.    The 14.85 mills/kWh is the fuel rider forecast using sales for the 12 months ended  
7           September 30, 2013. In accordance with the RSP rules, the \$5,236,905 Industrial  
8           Allocation of the forecast fuel increase (as determined at September 30, 2013) will  
9           be divided by sales for the year ended December 31, 2013 for the actual fuel rider  
10           calculation. The actual mill rate will therefore vary.
