

1 Q. Please provide Hydro's latest RSP report, and provide an estimate of the "current
2 portion" RSP adjustment that would apply to industrials as at January 1, 2014.

3

4

5 A. The October 2013 RSP report is provided in IR-IC-NLH-014 Attachment 1. The
6 current portion RSP adjustment that would apply to Industrials as at January 1,
7 2014 is currently estimated at 2.84 mills per kWh owing to Hydro based on the
8 forecasted December 31, 2013 closing Industrial Customer RSP balance of
9 \$1,009,747 divided by the year ended December 31, 2013 forecasted sales. The
10 actual adjustment will vary somewhat when it is filed with the Board in early
11 January.

Newfoundland and Labrador Hydro

Rate Stabilization Plan Report October 31, 2013

Summary of Key Facts

The Rate Stabilization Plan of Newfoundland and Labrador Hydro (Hydro), as amended by Board Order No. P.U. 40 (2003) and Order No. P.U. 8 (2007), is established for Hydro's utility customer, Newfoundland Power, and Island Industrial customers to smooth rate impacts for variations between actual results and Test Year Cost of Service estimates for:

- Hydraulic production;
- No. 6 fuel cost used at Hydro's Holyrood generating station;
- Customer load (Utility and Island Industrial); and
- Rural rates.

The Test Year Cost of Service Study was approved by Board Order No. P.U. 8 (2007) and is based on projections of events and costs that are forecast to happen during a test year. Finance charges are calculated on the balances using the test year Weighted Average Cost of Capital which is currently 7.529% per annum. Holyrood's operating efficiency is set, for RSP purposes, at 630 kWh/barrel regardless of the actual conversion rate experienced.

	2007 Test Year Cost of Service			
	Net Hydraulic	No. 6 Fuel	Utility	Industrial
	Production	Cost	Load	Load

(1) The Fuel Variance initially allocated to Rural Island Interconnected is re-allocated between Utility and Labrador Interconnected customers in the same proportion which the Rural Deficit was allocated in the approved Cost of Service Study, which is 89.10% and 10.90% respectively. The Labrador Interconnected amount is then removed from the plan and written off to net income (loss).

(1) The Rural Rate Alteration is allocated between Utility and Labrador Interconnected customers in the same proportion which the Rural Deficit was allocated in the approved Cost of Service Study, which is 89.10% and 10.90% respectively. The Labrador Interconnected amount is then removed from the plan and written off to net income (loss).

(2) The RSP adjustment rate for the Utility is 0.533 cents per kwh effective July 1, 2013 to June 30, 2014.

(3) Per Board Order No. P.U. 26(2013), \$49 million of the January 1, 2007 to August 31, 2013 accumulated Load Variation component of the RSP has been credited to the Industrial Customer balance as at August 31, 2013, and the remaining balance of \$112,573,325 has been transferred to the Utility Customer balance.

(4) The August Adjustment of \$112,573,325 has been reallocated to the Utility RSP Surplus (Page 13).

(1) The RSP adjustment rate for Industrial Customers excluding Teck Resources and Vale is 0.785 cents per kWh effective January 1, 2008. The rate for Teck Resources and Vale is 2.000 cents per kWh. Per Board Order No. P.U. 26(2013), the current plan RSP adjustment rate has been set to zero.

(2) Per Board Order No. P.U. 26(2013), \$49 million of the January 1, 2007 to August 31, 2013 accumulated Load Variation component of the RSP has been credited to the Industrial RSP Surplus (Page 14) as at September 1, 2013, and the remaining balance has been transferred to the Utility RSP Surplus (Page 13).

(3) The August Adjustment of \$10,870,627 has been reallocated to the Industrial RSP Surplus (Page 14).
