

1 Q. Please confirm that if Hydro's proposal to adopt interim rates based upon its
2 untested 2013 Test Year included Hydro's customers served by the Labrador
3 Interconnected System that Hydro's forecast 2014 return on rate base would
4 increase by over \$4 million. If Hydro is unable to provide this confirmation, please
5 explain in detail the effect on Hydro's forecast 2014 return on rate base of adopting
6 interim rates on January 1, 2014 based upon Hydro's untested 2013 Test Year for
7 customers served by the Labrador Interconnected System.

8
9
10 A. If Hydro's proposal to adopt interim rates based upon its 2013 Test Year included
11 Hydro's customers served by the Labrador Interconnected System, Hydro's forecast
12 2014 return on rate base would increase by over \$4 million if rates for these
13 customers were not otherwise implemented for the entire year.
